l'Economie de la Connaissance

FOREWORD

Over the past decade, new digital tools like the Internet of Things (IoT) and artificial intelligence have transformed entire industries, bringing forth a new technological era now known as the fourth industrial revolution. Digital technologies, such as Building Information Modeling (BIM), have recently begun to transform the construction industry, gradually changing the way new buildings are designed, built and maintained.

Technical standardization, by helping to codify best practices and technical requirements, can not only guarantee interoperability and quality of work in the construction sector, but also provide a platform for those new technologies helping the industry respond to local and global challenges..

At the national level, the *Institut Luxembourgeois de la Normalisation, de l'Accréditation, de la Sécurité et qualité des produits et services* (ILNAS), a public administration under the supervision of the Minister of the Economy, is the national standards body. In this frame, ILNAS is a member of European (CEN, CENELEC, ETSI) and international (ISO, IEC, ITU-T) standardization organizations and, among other missions, allows the participation of the national market in the development of standards within these entities.

In order to promote and develop technical standardization in Luxembourg, ILNAS leads the implementation of the "[Luxembourg Standardization Strategy 2020-2030](#)", signed by the Minister of the Economy, which identifies the Construction sector as one of the most relevant for national economic growth, along with the Information and Communication Technologies and Aerospace sectors.

Directly linked to this strategy, ILNAS has drawn up the "[Luxembourg's policy on technical standardization in the construction sector 2020-2025](#)", which is implemented with the support of the Economic Interest Group "*Agence pour la Normalisation et l'Economie de la Connaissance*" (ANEC EIG – Standardization Department). This policy aims to promote and strengthen the use of technical standards by the national market, to reinforce the position of Luxembourg in the global construction standardization landscape - particularly through a stronger involvement of national stakeholders in the relevant standardization technical committees - and to pursue the development of research and education programs in standardization for the construction domain.

This Standards Analysis of the construction sector was created to facilitate market access to relevant information. The standardization technical committees related to the construction sector are grouped into five main categories which are divided into different sub-sections to facilitate access to the most important information for each business sector.

ILNAS, with the support of ANEC GIE, remains at the service of national stakeholders in order to encourage and assist any initiative related to this topic.

Jean-Marie REIFF, Director
ILNAS

Jean-Philippe HUMBERT, Deputy Director
ILNAS

INTRODUCTION

Technical standardization is an efficient tool for construction professionals who want to reinforce their knowledge, preserve their know-how and anticipate future good practices. ILNAS contributes to its development at national level and actively promotes its use for the benefit of the market. The Institute undertakes several activities in order to develop a network of experts, support the transfer of knowledge to national stakeholders, and strengthen their participation in related technical standardization committees.

This new version of the Standards Analysis of the construction sector offers national stakeholders guidance for a potential future involvement in the standards development process. It provides information on the technical committees related to the construction sector on European and international level, as well as details on the national standardization context.

The Standards Analysis is based on information provided by the following standardization organizations:

The International Organization for Standardization (ISO)

The International Electrotechnical Commission (IEC)

The European Committee for Standardization (CEN)

The European Committee for Electrotechnical Standardization (CENELEC)

Institut luxembourgeois de la normalisation, de l'accréditation, de la sécurité et qualité des produits et services (ILNAS)

The Standards Analysis keeps the same organization as version 2.0. The first part is composed of five sections representing the breakdown of the construction sector adopted in this document. Each of them includes all the related technical committees organized by specific topics:

- “Study & Design” divided into 16 main topics,
- “Building Construction & Civil Engineering” divided into 16 main topics,
- “Installation” divided into 22 main topics,
- “Completion & Finishing” divided into 15 main topics,
- “Safety, Machinery & Equipment” divided into 11 main topics.

The second part provides figures on the national involvement in the standardization process, and lists the national delegates as well as the technical standardization committees in which they participate.

1 TECHNICAL COMMITTEES RELATED TO CONSTRUCTION

This chapter presents the national, European and international technical committees related to the construction sector, offering a complete picture of technical standardization in this domain. They are presented using tables that summarize the main information related to their area of work. In order to facilitate the identification of relevant technical committees, they are spread out first across five major sections, and then with a more refined approach by trade and/or topic.

STUDY & DESIGN

- Buildings & Civil Engineering Works
- Structural Design
- Digital Modelling
- Geographic Information
- Technical Drawings
- Geotechnics
- Acoustics
- Sustainability & Environment
- Energy Performance
- Maintenance & Facility Management
- Conformity
- Accessibility
- Cleanroom technology
- Spectator facilities
- Crime prevention
- Conservation of Cultural Heritage

BUILDING CONSTRUCTION & CIVIL ENGINEERING

- Steel & Aluminum
- Welding
- Fasteners & Structural Bearings
- Timber Structures
- Cement
- Concrete
- Masonry - Aggregates - Natural stones
- Greenhouses
- Earthworks
- Geosynthetics
- Road Networks
- Railway Networks
- Water Networks
- Gas Networks
- Electricity Networks: Overhead Lines
- Electricity Networks: Power & Energy

INSTALLATION

- Piping
- Valves, Pumps & Compressors
- Cooling & Ventilation Systems
- Heating Systems
- Gas
- Chimneys
- Domestic Appliances for Water
- Sanitary Appliances
- Fire Safety
- Building Management Systems
- Lifts, escalators & moving walks
- Wind Energy
- Solar Energy
- Lighting
- High Voltage
- Low Voltage
- Electrical Energy Storage Systems
- Protection from Lightning & Surges
- Electric Cables & Accessories
- Power Transformers & Capacitors
- Electrical Installations
- Communication Cables & Equipment

COMPLETION & FINISHING

- Wood & Timber
- Gypsum
- Coatings
- Sealing
- Sealant
- Roof
- Doors & Windows
- Glass in Building
- Paints & Varnishes
- Wallcoverings
- Ceramic Tiles
- Ceilings
- Floor Coverings
- Floor Screeds
- Surfaces for Sports Areas

SAFETY, MACHINERY & EQUIPMENT

- Personal Protective Equipment
- Tools
- Work at Height
- Cranes
- Machinery
- Chains, Ropes, Webbing, Slings & Accessories
- Mechanical Vibration & Shock
- Live Working
- Temporary Works Equipment
- Aerial Ropeways, Funicular Ropeways & Surface Lifts
- Measuring Equipment for Electrical & Electromagnetic Quantities

1.1.3 Digital Modelling			
	CEN/TC 442	Building Information Modelling (BIM)	
	23 Standards	13 Projects	National delegates: 7 
Scope	Standardization in the field of structured semantic life-cycle information for the built environment. The committee will develop a structured set of standards, specifications and reports which specify methodologies to define, describe, exchange, monitor, record and securely handle asset data, semantics and processes with links to geospatial and other external data.		
10	Working Groups under TC		
WG 1	Terminology		
WG 2	Exchange information		
WG 3	Information Delivery Specification		
WG 4	Support Data Dictionaries		
WG 5	Chairperson's Advisory Group		
WG 6	Infrastructure		
WG 7	Horizontal role		
WG 8	Competence		
WG 9	Digital twins in built environment		
WG 10	Strategy and planning		
	ISO/TC 59/SC 13	Buildings and civil engineering works - Organization and digitization of information about buildings and civil engineering works, including building information modelling	
	21 Standards	8 Projects	National delegates: 2 
Scope	SC 13 is charged by TC 59 to focus on international standardization of information through the whole life cycle of buildings and infrastructure across the built environment: - to enable interoperability of information; - to deliver a structured set of standards, specifications and reports to define, describe, exchange, monitor, record and securely handle information, semantics and processes, with links to geospatial and other related built environment information; - to enable object-related digital information exchange.		
8	Working Groups under SC		
JWG 12	Joint ISO/TC 59/SC 13 - ISO/TC 184/SC 4 WG: Development of building data related standards		
JWG 14	Joint ISO/TC 59/SC 13 - ISO/TC 211 WG: GIS-BIM interoperability		
TF 1	Terminology		
TF 2	Business Planning and Strategy		
WG 6	Framework for object-oriented information exchange		
WG 8	Building information models - Information delivery manual		
WG 11	Product data for building services systems model		
WG 13	Implementation of collaborative working over the asset lifecycle		
	CEN/WS Smart-CE-Marking	Smart CE marking for the construction industry	
	1 Standards	0 Projects	National delegates: 0
Scope	The agreement on a common digital format to provide the information within a Declaration of Performance (DoP) in a standardised way, including the provision of guidance to develop the product specific parts of a DoP.

1.1.2 Structural Design

	ISO/TC 98 Bases for design of structures		
	22 Standards	0 Projects	National delegates: 0
Scope	Standardization of the bases for design of structures irrespective of the material of construction including especially terminology and symbols, load, forces and other actions and limitations of deformations. Consideration and coordination of basic reliability requirements concerning the structures as a whole, including consideration of structures made of particular materials (steel, stone, concrete, wood, etc.) as far as is necessary for the preparation of a common approach to reliability in liaison with the relevant technical committees.		
3	Sub-Committees		
SC 1	Terminology and symbols		
SC 2	Reliability of structures		
SC 3	Loads, forces and other actions		

	CEN/TC 250 Structural Eurocodes		
	140 Standards	73 Projects	National delegates: 25 
Scope	Standardization of structural and geotechnical design rules for building and civil engineering works taking into account the relationship between design rules and the assumptions to be made for materials, execution and control.		
5	Working Groups under TC		
WG 1	Policy, procedures and links with other standards

	Geographic Information		
	54 Standards	23 Projects	National delegates: 0
Scope	<p>Standardization in the field of digital geographic information for Europe:</p> <p>The committee will produce a structured framework of standards and guidelines, which specify a methodology to define, describe and transfer geographic data and services. This work will be carried out in close co-operation with ISO/TC 211 in order to avoid duplication of work. The standards will support the consistent use of geographic information throughout Europe in a manner that is compatible with international usage. They will support a spatial data infrastructure at all levels in Europe.</p>		

1.1.5 Technical Drawings

IEC	IEC/TC 3 Documentation, graphical symbols and representations of technical information		
	42 Standards	10 Projects	National delegates: 0
Scope	<p>Standardization in the field of documentation, graphical symbols and representations of technical information, covering</p> <p>1) Rules, principles and methods focusing on machine sensible representation of information. This includes but is not limited to:</p> <ul style="list-style-type: none"> - Definition and identification of classes and properties (e.g. sematic data), - ontologies and data dictionaries (e.g. CDD), - Information models for structuring of technical data and document management, - information exchange based on existing communication means. <p>It includes definition, co-ordination and management of the information required during the whole life cycle of a device, system, or plant, also covering aspects of documentation.</p> <p>2) Rules, principles and methods focusing on human sensible representation of the information. This includes but is not limited to:</p> <ul style="list-style-type: none"> - presentation of information in documentation, - graphical symbols for use in documentation, - graphical symbols for the human interaction with equipment. <p>The standards deal with the presentations and graphical symbols as shown in documents or on equipment, independently of their forms of representation, analogue or digital, but may also include requirements for the development of documentation.</p> <p>3) Rules, principles and methods for general and safety related marking, identification and arrangement of information in electrical installations, equipment and man-machine interfaces. This includes but is not limited to:</p> <ul style="list-style-type: none"> - the meanings of colours and alternative means, when used for marking and identification, - the arrangement of indicating devices and actuators, - coding principles for indicating and actuating devices, - terminal designation of electrical and electronic components, apparatus and equipment, - designation of certain designated conductors, - marking of electrical and electronic equipment with ratings related to supply and to its properties, - marking of bare and insulated conductors.

WG 7	Laboratory measurement of airborne and structure borne sound from building equipment			
WG 12	BIM Acoustics			

	ILNAS/TC 103		Acoustics	
	1 Standards	0 Projects	National delegates:	15 
Scope (extract)	Acoustics in residential buildings. Setting of performance criteria for the different types of existing noise. Initiation of a process for supervising acoustics in residential buildings (...).			

1.1.8 Sustainability & Environment

	ISO/TC 59/SC 17 Sustainability in buildings and civil engineering works		
	13 Standards	2 Projects	National delegates: 0
Scope	Standardization in the field of sustainability of new and existing construction works in the context of the UN Sustainable Development Goals and climate change mitigation and adaptation. The environmental, economic, and social aspects of sustainability and circular economy are included as appropriate.		
4	Working Groups under TC		
WG 1	General principles and terminology		
WG 3	Environmental declaration of products		
WG 4	Environmental performance of buildings		
WG 5	Civil engineering works		

	ISO/TC 205 Building environment design		
	40 Standards	16 Projects	National delegates: 0
Scope (extract)	Standardization in the design of new buildings and retrofit of existing buildings for acceptable indoor environment and practicable energy conservation and efficiency. Building environment design addresses the technical building systems and related architectural aspects, and includes the related design processes, design methods, design outcomes, and design-phase building commissioning. Indoor environment includes air quality, and thermal, acoustic, and visual factors. (...)

WG 5	Product circularity data sheet		

	CEN/TC 350 Sustainability of construction works		
	13 Standards	7 Projects	National delegates: 8 
Scope (extract)	<p>The committee is responsible for the development of horizontal standardized methods for the assessment of the sustainability aspects of new and existing construction works (buildings and civil engineering works) in the context of the UN Sustainable Development Goals and of the circular economy. The methodological basis will be developed in the context of current needs, European strategies, such as mitigation, adaptation and resilience to climate change, and life cycle thinking. The standards describe coherent methodologies for the assessment of sustainability of construction works covering the assessment of environmental, social and economic performance (aspect and impacts) of buildings and civil engineering works, and the provision of construction product environmental information (EPD). (...)</p>

SC 10	Steel tubes, and iron and steel fittings			
SC 11	Steel castings and forgings			
SC 12	General issues			

	ISO/TC 167		
	Steel and aluminium structures		
	2 Standards	9 Projects	National delegates: 0
Scope	Standardization in the field of structural use of steel and alloys of aluminium as applied in building, civil engineering and related structures. The standards shall comprise the requirements for the design, fabrication and erection of steel and aluminium structures, together with materials, structural components and connections.		
2	Working Groups under TC		
WG 3	Execution of steel structures		
WG 4	Structural bolting		

	CEN/TC 135		
	Execution of steel structures and aluminium structures		
	6 Standards	7 Projects	National delegates: 3 
Scope	Standardization of rules for execution of steel and aluminium structures for building and civil engineering works including rules for inspection and control.		
5	Working Groups under TC		
WG 2	Technical requirements for the execution of steel structures		
WG 14	Execution of aluminium structures and steel structures with cold formed structural sheeting		
WG 15	EN 1090-1, Requirements for conformity assessment of structural components		
WG 16	Revision of EN 1090-3		
WG 17	Product category rules complementary to EN 15804 for Steel and Aluminium structural products for use in construction works		

1.2.2 Welding

	ISO/TC 44		
	Welding and allied processes		
	321 Standards	45 Projects	National delegates: 1 
Scope	Standardization of welding, by all processes, as well as allied processes; these standards include terminology, definitions and the symbolic representation of welds on drawings, apparatus and equipment for welding, raw materials (gas, parent and filler metals) welding processes and rules, methods of test and control, calculations and design of welded assemblies, welders' qualifications, as well as safety and health. Excluded: electrical safety matters related to welding which are the responsibility of IEC/TC 26.		
3	Working Groups under TC		
JAG	IIW – ISO/TC 44 – CEN/TC 121 Coordination Committee		
TF 1	Review of ISO/TC 261 standards dealing with welding		
WG 5	Welding simulation		
12	Sub-Committees		
SC 3	Welding consumables		
SC 5	Testing and inspection of welds		
SC 6	Resistance welding and allied mechanical joining		
SC 7	Representation and terms		
SC 8	Equipment for gas welding, cutting and allied processes		
SC 9	Health and safety		
SC 10	Quality management in the field of welding		
SC 11	Qualification requirements for welding and allied processes personnel		
SC 12	Soldering materials		
SC 13	Brazing materials and processes		
SC 14	Welding and brazing in aerospace		
SC 15	Underwater welding		

	CEN/TC 121			Welding and allied processes		
	339 Standards	73 Projects	National delegates:	1		
Scope	Standardization of welding by all processes, as well as allied processes; these standards include terminology, definitions and the symbolic representation of welds on drawings, apparatus and equipment for welding, raw materials (gas, parent and filler metals) welding processes and rules, methods of test and control, design of welded joints, qualification and/or education of welding personnel, as well as safety and health. Excluded are electrical arc welding equipment and electrical safety matters related to welding which are the responsibility of CENELEC/TC 26.					
3	Working Groups under TC					
WG 3	Welding consumables					
WG 19	Equipment for gas welding, cutting and allied processes					
WG 21	Testing of welds					
1	Sub-Committees					
SC 4	Quality management in the field of welding					

	IEC/TC 26			Electric welding		
	29 Standards	2 Projects	National delegates:	0		
Scope	To prepare standards for electrical safety, EMC and EMF matters related to the construction, installation and use of equipment for electric welding and allied processes in both normal and adverse welding environments, taking into account all safety aspects for protection against electrical and mechanical hazards for professional and non-professional use and all aspects to protect the environment. All electric welding processes are covered except electromagnetic processing.					
2	Working Groups under TC					
WG 1	Safety requirements for electric welding equipment					
WG 5	EMC and EMF requirements for electric welding equipment					

	CLC/TC 26			Electric welding		
	30 Standards	3 Projects	National delegates:	0		
Scope	To prepare standards for electrical safety, EMC and EMF matters related to the construction, installation and use of equipment for electric welding and allied processes in both normal and adverse welding environments, taking into account all safety aspects for protection against electrical and mechanical hazards for professional and non-professional use and all aspects to protect the environment. All electric welding processes are covered except electromagnetic processing.					
2	Working Groups under TC					
WG 1	Safety requirements for electric welding equipment					
WG 5	EMC and EMF requirements for electric welding equipment					

	ISO/IIW			International Institute of Welding		
	29 Standards	2 Projects	National delegates:	0		
Scope	The technical field of the IIW encompasses the joining, cutting and surface treatment of metallic and non-metallic materials by such processes as welding, brazing, soldering, thermal cutting, thermal spraying, adhesive bonding, microjoining and embraces allied fields including quality assurance, non-destructive testing, standardization, inspection, health and safety, education, training, qualification, design and fabrication. (...)					

1.2.3 Fasteners & Structural Bearings

ISO	ISO/TC 2		Fasteners	
	195 Standards	40 Projects	National delegates: 0	
Scope	Standardization of fasteners and fastened connections, including: <ul style="list-style-type: none"> - terms and definitions, - dimensions and tolerances, - mechanical, physical and functional properties, - fastener coatings and finishes, - test methods, - acceptance and quality procedures, - design and calculation of fastened assemblies/joints, - assembly methods, - assembly/joint qualification. The term fastener covers all types of products designed to mechanically join two or more parts to form a solid or movable fastened connection or to contribute essentially to establish this function, such as bolts, screws, nuts, washers, pins and rivets. Assembly/joint qualification includes qualification of the assembly/joint, the assembly tools as well as the qualification of the personnel. Excluded: Fasteners for aerospace applications, keys, and hose clamps.			
3	Working Groups under TC			
WG 13	Washer and non-threaded fasteners			
WG 17	Stainless steel fasteners			
WG 18	Pre-applied adhesive systems for threaded fasteners			
5	Sub-Committees			
SC 7	Reference standards			
SC 11	Fasteners with metric external thread			
SC 12	Fasteners with metric internal thread			
SC 13	Fasteners with non-metric thread			
SC 14	Surface coatings			

cen	CEN/TC 185		Fasteners	
	198 Standards	29 Projects	National delegates: 0	
Scope	Standardization in the field of mechanical fasteners, taking cognizance of the ISO standards prepared by ISO/TC 2. Note: The term "Mechanical fastener" covers all types of products designed to connect mechanically two or more structural parts to form a solid or movable joint or to contribute essentially to establish this function, such as screws, nuts, washers, pins and rivets.			
1	Working Groups under TC			
WG 6	Structural bolting			

cen	CEN/TC 167		Structural bearings	
	12 Standards	0 Projects	National delegates: 0	
Scope	Standardization of structural bearing device used for bridges, stadiums, industrial buildings etc. describing the various types and giving the recommendations for design, specifications for materials, manufacture and installation, criteria for acceptance and testing. Excluded, for example, are: connections between piers and columns obtained by reinforced concrete, welded or bolted connections.			
1	Working Groups under TC			
WG 1	Revision of EN 1337			

1.2.4 Timber Structures

	ISO/TC 165		Timber structures	
	51 Standards	6 Projects	National delegates: 0	
Scope	<p>Standardization concerning structural applications of timber, wood -based panels, other wood based products, and related lignocellulosic fibrous materials including:</p> <ul style="list-style-type: none"> - requirements for design; - structural properties, performance, and design values of materials, products, components, and assemblies and; - test methods and requirements to establish related structural, mechanical and physical properties and performance. <p>Note: In cases where topics of TC 165 are also a subject, for non-structural purposes, of the Technical Committee of the relevant material or product (e.g. TC 89 or TC 218) a strong liaison with the relevant Technical Committee will be established.</p>			
5	Working Groups under TC			
WG 2	Structural glued wood products			
WG 7	Connections and assemblies			
WG 10	Characteristic values and design specifications			
WG 11	Solid and mechanically laminated timber products			
WG 12	Structural use of bamboo			

	CEN/TC 124		Timber structures	
	42 Standards	10 Projects	National delegates: 0	
Scope	<p>Preparation of standards for the structural use of timber, covering :</p> <ul style="list-style-type: none"> - test methods for the determination of strength and stiffness for solid timber, glued laminated timber, mechanical joints, wood based panel products, timber structures and their components; - solid timber: preferred sizes, strength grading and strength classes system (included glued laminated timber), evaluation of mechanical properties; - glued laminated timber: essential requirements, production requirements and control, structural full size finger joints; - mechanical fasteners. 			
7	Working Groups under TC			
WG 1	Test methods			
WG 2	Solid timber			
WG 3	Glued laminated timber			
WG 4	Connectors			
WG 5	Prefabricated wall, floor and roof elements			
WG 6	Wood poles			
WG 7	Preparation of the revision of harmonised standards			

1.2.5 Cement

	ISO/TC 74		Cement and lime (Stand-by)	
	7 Standards	0 Projects	National delegates: 0	
Scope	<p>Standardization - including definitions, methods of test and specifications - of various kinds of cement, and lime used in building construction and engineering, either for binding together the construction materials or as a constituent part of all kinds of paste, mortar and concrete.</p>			

	CEN/TC 51			Cement and building limes		
	40 Standards	9 Projects	National delegates:	1		
Scope	Standardization in the field of definitions and terminology, specifications and methods of test for cements and limes used in building and civil engineering.					
7	Working Groups under TC					
WG 6	Definitions and terminology of cement					
WG 10	Masonry cement					
WG 11	Building lime					
WG 12	Special performance criteria					
WG 13	Assessment of conformity					
WG 14	Hydraulic binders for road bases					
WG 15	Test methods of cement and its constituents					

	ISO/TC 77			Products in fibre reinforced cement (Stand-by)		
	4 Standards	0 Projects	National delegates:	0		
Scope	Standardization in the field of products in fibre reinforced cement and calcium silicate containing essentially inorganic hydraulic binders, asbestos and other fibres; to include specifications, dimensions, test methods and specific values for acceptance and application requirements. Standardization of test methods for asbestos and other fibres appropriate to their use in the manufacture of fibre reinforced cement products. Excluded : - products in concrete covered by ISO/TC 71; - products in gypsum covered by ISO/TC 152.					

1.2.6 Concrete

	ISO/TC 71			Concrete, reinforced concrete and pre-stressed concrete		
	73 Standards	33 Projects	National delegates:	0		
Scope	Standardization of the technology of concrete, of the design and construction of concrete, reinforced concrete and pre-stressed concrete structures, so as to ensure progressive development both in quality and in price reduction; and of definitions and terms, as well as testing procedures, to facilitate international exchange of research work.					
4	Working Groups under TC					
AHG 1	Concrete materials terminology					
CAG	Chair Advisory Group					
WG 1	Life-cycle management of concrete structures					
WG 2	Design of concrete-filled steel tubular (CFST) hybrid structures					
7	Sub-Committees					
SC 1	Test methods for concrete					
SC 3	Concrete production and execution of concrete structures					
SC 4	Performance requirements for structural concrete					
SC 5	Simplified design standard for concrete structures					
SC 6	Non-traditional reinforcing materials for concrete structures					
SC 7	Maintenance and repair of concrete structures					
SC 8	Environmental management for concrete and concrete structures					

	CEN/TC 104			Concrete and related products		
	179 Standards	30 Projects	National delegates:	3		
Scope	<p>CEN/TC 104 deals with the standardisation of provisions for concrete and related products, in particular with respect to properties and requirements for:</p> <ul style="list-style-type: none"> - fresh and hardened concrete; - production and delivery of fresh concrete; - constituent materials of concrete, e.g. mixing water, additions and admixtures; - sheaths for prestressing tendons; grout for prestressing tendons; - fibres for use in concrete; - execution of concrete structures; - production and execution of sprayed concrete; - products for the protection and repair of concrete structures. <p>Additionally relevant test methods and provisions for the assessment of conformity for the products and procedures mentioned above are standardized.</p> <p>Not covered by the scope of TC 104 are:</p> <ul style="list-style-type: none"> - the constituent materials; aggregate (see CEN/TC 154), Pigments (see CEN/TC 298) and Cement (see CEN/TC 51); - the design of concrete structures and components (see CEN/TC 250/SC 2); - precast concrete products (see CEN/TC 229); - prefabricated autoclave aerated and no-fines light weight concrete components (see CEN/TC 177). 					
10	Working Groups under TC					
WG 4	Fly ash for concrete					
WG 9	Silica fume for concrete					
WG 10	Sprayed concrete					
WG 11	Fibres for concrete					
WG 14	Concrete: Health, Hygiene and Environment					
WG 15	Ground granulated blast furnace slag					
WG 16	Joint Working Group CEN/TC 104/SC 1, CEN/TC 104/SC 2 and CEN/TC 288 - Concrete for special geotechnical works and foundations					
WG 17	Curing compounds					
WG 18	Specification of ground calcium carbonate as an addition for concrete					
WG 19	Decarbonisation, resource efficiency and sustainability					
4	Sub-Committees					
SC 1	Concrete - Specification, performance, production and conformity					
SC 2	Execution of concrete structures					
SC 3	Admixtures for concrete					
SC 8	Protection and repairs of concrete structures					

	ILNAS/TC 102			Concrete		
	0 Standards	7 Projects	National delegates:	10		
Scope	<p>Creation of the following national normative documents:</p> <ul style="list-style-type: none"> - National application document for standard EN 206 – Concrete - Specification, performance, production and conformity - National annex of standard EN 13670 - Execution of concrete structures - National annex of standard EN 13369 - Precast concrete products; <p>Creation of additional national annexes in the field of concrete for the following European standards:</p> <ul style="list-style-type: none"> - EN 1338 - Concrete pavers - Requirements and test methods - EN 1339 - Concrete slabs - Requirements and test methods - EN 1340 - Elements for concrete curbs - Requirements and test methods - EN 1433 - Hydraulic channels for traffic areas used by pedestrians and vehicles - Classification, requirements, principles of construction and testing, marking and assessment of conformity. 					

	CEN/TC 177 Prefabricated reinforced components of autoclaved aerated concrete or light-weight aggregate concrete with open structure		
	26 Standards	0 Projects	National delegates: 0
Scope	Standards for prefabricated reinforced components of autoclaved aerated concrete or lightweight aggregate concrete with open structure (expanded clay, pumice, etc.).		
2	Working Groups under TC		
WG 1	Prefabricated Reinforced Components of AAC		
WG 3	Test methods		

	CEN/TC 229 Precast concrete products		
	49 Standards	27 Projects	National delegates: 2 
Scope	Standardization of precast concrete products (plain, prestressed, or reinforced or composite steel/concrete) covering terminology, performance criteria, preferred shapes and dimensions, tolerances, relevant physical properties special test methods, special features due to transport, erection and connections, not duplicating the work of other TCs, referring however, to concrete material properties covered by TC 104, properties for reinforcing steel covered by ECISS/TC 19, all general design and structural aspects covered by the Eurocodes, particularly Eurocode 2, and excluding products covered by other technical committees (including TC 125, 128, 164, 165, 177, 178...)		
4	Working Groups under TC		
WG 1	Products for which the stability requirements is predominant		
WG 3	Products for which the stability requirements is not dominant		
WG 4	Products which do not warrant a specific standard and which could be referred to in specific standards		
WG 5	Sustainability of concrete products and structural concrete cast in situ		

1.2.7 Masonry – Aggregates – Natural stones

	CEN/TC 125 Masonry		
	79 Standards	3 Projects	National delegates: 1 
Scope	Standardization in the field of masonry units of clay, calcium silicate, dense aggregate concrete, lightweight aggregate concrete, autoclaved aerated concrete, natural stone, manufactured stone, mortar for masonry, ancillary components for masonry and associated test methods.		
10	Working Groups under TC		
WG 1	Masonry units		
WG 2	Mortar		
WG 3	Ancillary components		
WG 4	Test methods		
WG 5	Application of external rendering and internal plastering		
WG 6	Thermal properties for masonry		
WG 7	Dangerous substances		
WG 8	Environmental product declaration		
WG 9	Clay flooring blocks		
WG 10	Brick slips		

	CEN/TC 154		Aggregates	
	57 Standards	12 Projects	National delegates:	0
Scope	Standardization in the field of natural, recycled and manufactured aggregates, by specifying aggregate performance characteristics, sampling and methods of test.			
4	Working Groups under TC			
WG 10	Armourstone			
WG 11	Railway ballast			
WG 12	Aggregates from secondary source			
WG 13	Dangerous substances			
5	Sub-Committees			
SC 1	Aggregates for concrete, mortar and grouts			
SC 3	Bituminous bound aggregates			
SC 4	Hydraulic bound and unbound aggregates			
SC 5	Lightweight aggregates			
SC 6	Test methods			

	CEN/TC 246		Natural stones	
	48 Standards	0 Projects	National delegates:	0
Scope	<p>Definitions, requirements and test methods for natural stones relating to rough blocks, slabs, semi-finished and finished products intended for use in building and for monuments with the exception of items in the field of work covered by other Technical Committees.</p> <p>The WG 4 (JWG 229/246) covers the agglomerated stones for floor coverings, wall coverings and ancillary uses, for interior and exterior use, with resin or cement binders or a combination of the two and does not cover pressed tiles such as terrazzo tiles which are the territory of CEN/TC 229, or natural stone which is the territory of CEN/TC 246.</p> <p>Note: Reference should be made as far as possible to existing test methods. Submission of WG 4 documents for the formal vote must be decided by resolutions of the two CEN/TCs.</p>			
4	Working Groups under TC			
WG 1	Terminology, classification and characteristics			
WG 2	Test methods			
WG 3	Product specifications			
WG 4	Agglomerated stones (JWG 229/246)			

	CEN/TC JWG 229/246		Agglomerated stones	
	0 Standards	0 Projects	National delegates:	0

1.2.8 Greenhouses

	CEN/TC 284		Greenhouses	
	2 Standards	1 Projects	National delegates:	0
Scope	Standardization in the field of permanent and non-permanent greenhouses. To coordinate work in relation to greenhouses in other functional and material related CEN/TCs, and to establish the appropriate liaisons.			

1.2.9 Earthworks

	CEN/TC 396		Earthworks	
	14 Standards	6 Projects	National delegates: 0	
Scope	Terminology for earthworks (terms and definition); Test methods (characterisation for earthworks of natural soils and rocks) in laboratory and in situ including improved soils treated with binders or lime or other "additives" used in earthworks. Classification systems of soils and rocks suitable for use in embankment construction, possibly leading to a unified classification system or principles/rules for classifying soils and rocks for earthworks purposes; Characterisation of extraction ability ("excavatability"); Design of earthworks; Quality control of works and monitoring.			
8	Working Groups under TC			
WG 1	General matters			
WG 2	Soil and rock classification for Earthworks			
WG 4	Quality control			
WG 5	Hydraulic fill			
WG 6	Hydraulic placement of mineral waste			
WG 7	Use of alternative materials in earthworks			
WG 8	Test methods			
WG 9	Sustainable earthworks			

	CEN/TC 321		Explosives for civil uses	
	59 Standards	55 Projects	National delegates: 0	
Scope	Standardization of explosives substances and articles, including safety requirements, terminology, categorization and test methods. Pyrotechnic articles and ammunition are excluded and explosives intended for use by the armed forces of the police are also excluded.			
2	Working Groups under TC			
WG 4	Detonators and relays			
WG 6	Explosives and propellants			

	CEN/TC 451		Water wells and borehole heat exchangers	
	0 Standards	4 Projects	National delegates: 1 	
Scope	Standardization in the field of design, environmental aspects, drilling, construction, completion, operation, monitoring, maintenance, rehabilitation and dismantling of wells and borehole heat exchangers for uses of groundwater and geothermal energy. Oil, gas and other mining activities in these fields are excluded from the scope.			
2	Working Groups under TC			
WG 1	Water wells			
WG 2	Borehole heat exchangers			

1.2.10 Geosynthetics

	ISO/TC 221		Geosynthetics	
	45 Standards	13 Projects	National delegates:	2
Scope	Standardization of all geosynthetic products including geotextiles, geomembranes, geocomposite clay liners and other geosynthetic related products.			
5	Working Groups under TC			
WG 2	Terminology, identification and sampling			
WG 3	Mechanical properties			
WG 4	Hydraulic properties			
WG 5	Durability			
WG 6	Design using geosynthetics			

	CEN/TC 189		Geosynthetics	
	76 Standards	9 Projects	National delegates:	4
Scope	Standardization related to geosynthetics; terminology, sampling before testing, identification and marking rules, test methods, requirements related to the intended used.			
6	Working Groups under TC			
WG 1	Geotextiles and geotextile-related products - General and specific requirements			
WG 2	Terminology, identification, sampling and classification			
WG 3	Mechanical testing			
WG 4	Hydraulic testing			
WG 5	Durability			
WG 6	Geosynthetic barriers - General and specific requirements			

1.2.11 Road Networks

	CEN/TC 226		Road equipment	
	55 Standards	24 Projects	National delegates:	1
Scope	To prepare specifications for safety, traffic control and other road equipment in the following fields : a) Safety fences and barriers, including guard rails, safety fences, crash barriers, crash absorbers and bridge parapets; b) Horizontal signs including road studs and road markings; c) Vertical signs including signs, cones and marker posts; d) Traffic lights including signals, traffic control and danger lamps; e) Street lighting, performance requirements only; f) Other equipment including bollards, anti-glare screens and noise protection devices			
8	Working Groups under TC			
WG 1	Crash barriers, safety fences, guard rails and bridge parapets			
WG 2	Horizontal road signs			
WG 3	Vertical signs			
WG 4	Traffic control			
WG 6	Noise reducing devices			
WG 10	Passive safety of support structures for road equipment			
WG 11	Variable message signs			
WG 12	Road interaction - ADAS / Autonomous vehicles			

	CEN/TC 227		Road materials	
	174 Standards	23 Projects	National delegates:	1 
Scope	To prepare specifications, test methods, compliance criteria for materials for construction and maintenance of roads, airfields and other trafficked areas.			
7	Working Groups under TC			
WG 1	Bituminous mixtures			
WG 2	Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)			
WG 3	Materials for concrete roads including joint fillers and sealants			
WG 4	Hydraulic bound and unbound mixtures (including byproducts and waste materials)			
WG 5	Surface characteristics			
WG 6	Sustainability			
WG 7	Chairman's Advisory Group			

	CLC/BTTF 69-3		Road traffic signal systems	
	3 Standards	0 Projects	National delegates:	0
Scope	To prepare a standard, as described in BT (DE/NOT)141 (Road traffic signal systems).			
1	Working Groups under TC			
WG 02	Road traffic signal systems			

	CEN/TC 336		Bituminous binders	
	62 Standards	15 Projects	National delegates:	0
Scope	Terminology, methods of sampling, standardisation of test methods, classification and specifications for bituminous binders. Group of products covered by standardisation: petroleum refined bitumens, modified bitumens, bituminous emulsions, fluxed and cutback bitumens - Used for paving and industrial applications.			
2	Working Groups under TC			
WG 1	Bituminous binders for paving			
WG 2	Fluxed bitumen and bituminous emulsions			

	CEN/TC 178		Paving units and kerbs	
	13 Standards	0 Projects	National delegates:	0
Scope	Standardization of the performance requirements and their associated methods of test of paving units, kerbs and accessories manufactured from clay, concrete, natural stone or other materials used for the surfacing of footways, roads and other paved areas (dock, industrial, parking) considering their application.			
5	Working Groups under TC			
WG 1	Precast concrete products			
WG 2	Natural stone products			
WG 3	Clay products			
WG 4	Test methods for simulation of ageing of pavers by polishing			
WG 5	Tactile Paving			

1.2.12 Railway Networks

	ISO/TC 269		Railway applications	
	31 Standards	26 Projects	National delegates: 3	
Scope	Standardization of all systems, products and services specifically related to the railway sector, including design, manufacture, construction, operation, and maintenance of parts and equipment, methods and technology, interfaces between infrastructure, vehicles and the environment, excluding those electrotechnical and electronic products and services for railways which are within the scope of IEC/TC 9.			
9	Working Groups under TC			
AG 17	Strategic liaison group			
AHG 1	Scopes and terminology			
AHG 2	Rail vehicle hydrogen refueling equipment			
AHG 7	Migration strategy			
CAG 1	Chair's Advisory Group			
WG 5	Railway quality management system			
WG 6	Fire protection			
WG 8	Platform barrier systems			
WG 9	Wheel-rail contact geometry			
3	Sub-Committees			
SC 1	Infrastructure			
SC 2	Rolling stock			
SC 3	Operations and services			

	CEN/TC 256		Railway applications	
	310 Standards	146 Projects	National delegates: 4	
Scope	Standardization of all applications (except electrical and electronic subjects), in the field of railways, including urban transport, specifically intended for vehicles and fixed installations.			
12	Working Groups under TC			
WG 1	Fire Protection			
WG 3	Acoustics			
WG 6	Aerodynamics			
WG 7	Ride comfort			
WG 10	Vehicle/Track Interaction			
WG 19	Classification systems and documentation			
WG 32	Gauge			
WG 43	Ground based services			
WG 44	Persons of Reduced Mobility (PRM)			
WG 48	Rolling Stock Maintenance			
WG 51	Advisory Group Labour Health and Safety			
WG 56	Chairman's Advisory Group			
4	Sub-Committees			
SC 1	Infrastructure			
SC 2	Rolling stock products			
SC 3	Rolling Stock Systems			
SC 4	Cross-functional applications			

IEC	IEC/TC 9 Electrical equipment and systems for railways		
	159 Standards	26 Projects	National delegates: 3 
Scope	<p>To prepare international standards for the railways field which includes rolling stock, fixed installations, management systems (including supervision, information, communication, signalling and processing systems) for railway operation, their interfaces and their ecological environment. These standards cover railway networks, metropolitan transport networks (including metros, tramways, trolleybuses and fully automated transport systems) and magnetic levitated transport systems. These standards relate to systems, components and software and they will deal with electrical, electronic and mechanical aspects, the latter being limited to items depending on electrical factors. These standards deal with electromechanical and electronic aspects of power components as well as with electronic hardware and software components.</p>		
51	Working Groups under TC		
WG 40	Railway applications-Urban Guided Transport Management and Command/Control Systems		
WG 43	Railway applications - Train communication network (TCN)		
WG 46	Onboard multimedia systems for railways		
WG 48	ODIS - On board Driving Information System		
WG 50	Railway applications – Fixed installations – Electronic power converter		
PT 591	Railway Applications - Rolling Stock - Specification and verification of energy consumption		
PT 641	Railway applications - Fixed installations - Requirements for the validation of simulation tools used for the design of traction power supply systems		
PT 668	Railway applications – Signalling and control systems for non UGTMS Urban Rail systems		
PT 62848-3	Railway application – Fixed installations – D.C. surge arresters and voltage limiting devices – Part 3: Application Guide		
PT 62973-2	Railway applications - Batteries for auxiliary power supply systems - Part 2: Nickel Cadmium (NiCd) batteries		
PT 62973-3	Railway applications – Rolling stock – Batteries for auxiliary power supply systems – Part 3: Lead acid batteries		
PT 62973-4	Railway applications - Rolling stock - Batteries for auxiliary power supply systems - Part 4: Secondary sealed nickel-metal hydride batteries		
PT 62973-5	Railway applications - Rolling stock - Batteries for auxiliary power supply systems - Part 5: Lithium-ion batteries		
PT 63190	Railway applications – Fixed installations – Electric traction – Copper and copper alloy messenger wires for overhead contact line systems

1.2.13 Water Networks

	CEN/TC 164		
	Water supply		
	231 Standards	68 Projects	National delegates: 0
Scope	To establish standards for the installation and performance requirements of systems, constructions of components used for the water supply from the production facility, including the treatment of the water, to the taps attached or unattached to a sanitary appliance with the view of maintaining the quality of water as stated in Directive 80/778.		
11	Working Groups under TC		
WG 1	External systems and components		
WG 2	Internal systems and components		
WG 3	Effects of materials in contact with drinking water		
WG 8	Sanitary tapware		
WG 9	Chemicals and filtering media for water treatment		
WG 10	Hot water and cold water storage within dwellings		
WG 12	Flexible hoses assemblies		
WG 13	Water conditioning equipment inside buildings		
WG 14	Valves and fitting for buildings and devices to prevent pollution by backflow		
WG 15	Security of drinking water supply		
WG 16	In-situ generating and dosing of biocides for water treatment		

	ISO/TC 282		
	Water reuse		
	32 Standards	14 Projects	National delegates: 0
Scope	<p>Standardization of water reuse of any kind and for any purpose. It covers both centralized and decentralized or on-site water reclamation, and direct and indirect reuse applications, taking into consideration the potential for unintentional exposure or ingestion. It includes technical, economic, environmental and societal aspects of water reuse. Water reuse comprises a sequence of the stages and operations involved in collection, conveyance, processing, storage, distribution, consumption, drainage and other handling of wastewater, and treated effluent, including water that is reused in repeated, cascaded and recycled ways. The scope of ISO/PC 253 (Treated wastewater reuse for irrigation) is merged therein.</p> <p>Excluded:</p> <ul style="list-style-type: none"> - the limits of allowable water quality in water reuse, which should be determined by the governments, WHO and other relevant competent organizations. - all aspects of ISO/TC 224 scope (service activities relating to drinking water supply systems and wastewater systems -- Quality criteria of the service and performance indicators) - methods for the measurement of water quality, which are covered by ISO/TC 147. 		
4	Working Groups under TC		
CAG	Chair Advisory Group		
CTG 1	Communications Task Group		
WG 2	Terminology		
WG 3	Water systems for biopharma industries		
4	Sub-Committees		
SC 1	Treated wastewater reuse for irrigation		
SC 2	Water reuse in urban areas		
SC 3	Risk and performance evaluation of water reuse systems		
SC 4	Industrial water reuse		

	CEN/TC 165		Waste water engineering	
	123 Standards	25 Projects	National delegates:	1 
Scope	<p>Functional standards, standards for performance and installation in the field of wastewater engineering for systems and components.</p> <p>Where there is no existing material related TC, product standards for all components of discharge pipes, drain and sewer pipes, pipelines, separators etc. according to the resolutions of BT (for the organization of work in the field of metallic tubes see resolution BT 160/1989).</p> <p>Standards for design, calculation, construction, commissioning, operation and maintenance in the field of wastewater engineering, from the point of origin (with the exception of the product standards for sanitary appliances*) up to the point of disposal, including treatment plants and use of treated wastewater for purposes other than agricultural irrigation.</p> <p>*) flushing cisterns, urinals, kitchen sinks, basins bidets, baths, (including whirlpool baths) and shower trays, see TC 163 Resolution 2 (London), WG 3 and 4.</p>			
16	Working Groups under TC			
WG 1	General requirements for pipes			
WG 2	Vitrified clay pipes			
WG 4	Manhole tops, gully tops, drainage channels and other ancillary components for use outside buildings			
WG 7	Steel pipes			
WG 8	Separators			
WG 9	Concrete pipes			
WG 10	Installation of buried pipes for gravity drain and sewer systems			
WG 11	Gratings, covers and other ancillary components for use inside buildings			
WG 12	Structural design of buried pipelines			
WG 13	Renovation and repair of drains and sewers			
WG 21	Drainage systems inside buildings			
WG 22	Drain and sewer systems outside buildings			
WG 30	Terminology in the field of wastewater engineering			
WG 40	Wastewater treatment plants > 50 PT			
WG 41	Small type sewage treatment plants (< 50 inhabitants)			
WG 50	Use of treated wastewater			

	CEN/TC 107		Prefabricated district heating and district cooling pipe system	
	20 Standards	11 Projects	National delegates:	0
Scope	<p>Standardization of:</p> <ul style="list-style-type: none"> - prefabricated insulated district heating and district cooling pipe systems including pipes, joints, fittings, valves, expansion cushions and surveillance systems, and - design and installation of prefabricated insulated pipe systems for district heating and district cooling. 			
10	Working Groups under TC			
WG 2	Basic consideration			
WG 3	PUR-foam properties			
WG 4	Joint casing systems			
WG 5	Fitting, Valves and Twin Pipes			
WG 9	PE Casings			
WG 10	Flexible pipe systems for district heating			
WG 11	Surveillance systems			
WG 12	Polymer Service Pipes			
WG 13	Preinsulated district heating pipe systems - Design and installation			
WG 14	District cooling			

	CEN/TC 203		
	Cast iron pipes, fittings and their joints		
	18 Standards	8 Projects	National delegates: 0
Scope	Standardization of cast iron pipes, fittings, accessories, and their joints for water supply, drainage and sewerage, gas supply and other application. Valves, pumps and malleable iron parts are excluded.		
6	Working Groups under TC		
WG 1	Water pipelines under pressure		
WG 3	Soil & Drain pipelines		
WG 7	Influence of non metallic materials used by ductile iron pipelines on potable water		
WG 8	Coatings for pipes, fittings and accessories		
WG 9	Revision of EN 545, EN 598 and EN 969		
WG 10	Life cycle costs (LCC) and Life cycle assessment (LCA) for ductile iron pipe systems		

	CEN/TC 92		
	Water meters		
	9 Standards	6 Projects	National delegates: 0
Scope	Standardization for meters to measure volume flow of cold potable water and heated water enclosed in full conduits, irrespective of technology applied.		
1	Working Groups under TC		
WG 2	General requirements		

1.2.14 Gas Networks

	CEN/TC 234		
	Gas infrastructure		
	31 Standards	15 Projects	National delegates: 0
Scope	<p>I) Standardisation of functional requirements in the field of gas infrastructure* from the input of gas into the on-shore transmission network up to the inlet connection of gas appliances;</p> <p>II) Determination and coordination of the gas infrastructure aspects in the technical work dealt with by other CEN/TCs and any other bodies, whether or not reporting to the Sector Forum Gas Infrastructure;</p> <p>III) To act as a focus for standardisation issues in the field of gas infrastructure.</p> <p>*including transmission, distribution, storage, compression, regulation and metering, installation, injection of non-conventional gases, gas quality issues and others.</p>		
14	Working Groups under TC		
WG 1	Gas installations		
WG 2	Gas supply systems up to and including 16 bar and pressure testing		
WG 3	Gas Transportation		
WG 4	Gas underground storage		
WG 5	Gas measuring		
WG 6	Gas pressure regulation		
WG 7	Gas compression		
WG 8	Industrial piping		
WG 10	Service Lines		
WG 11	Gas Quality		
WG 12	Safety and Integrity management		
WG 13	PNR H2NG/H2 in NG systems		
WG 14	Methane emissions		
WG 15	CAG - Convenors and Secretaries group		

	CEN/TC 235 Gas pressure regulators and associated safety devices for use in gas transmission and distribution		
	2 Standards	3 Projects	National delegates: 0
Scope	Standardization of the requirements for the construction, performance, testing and marking of gas pressure regulators and associated safety devices for use in gas transmission and distribution for pressures up to 100 bar.		
1	Working Groups under TC		
WG 1	Safety shut-off devices, safety relief devices and small regulators with or without safety devices used in gas transmission and/or distribution.		

	CEN/TC 237 Gas meters		
	10 Standards	2 Projects	National delegates: 0
Scope	Standardization of the requirements for the construction, performance and safety of gas meters, including diaphragm, rotary displacement and turbine and electronic gas meters, and all associated conversion devices.		
7	Working Groups under TC		
WG 2	Rotary displacement gas meters		
WG 3	Turbine meters		
WG 4	Associated conversion devices		
WG 5	General requirements		
WG 8	Diaphragm meters		
WG 9	Ultrasonic gas meters		
WG 10	Thermal-mass flow-meter based gas meters		

	CEN/TC 238 Test gases, test pressures, appliance categories and gas appliance types		
	62 Standards	5 Projects	National delegates: 0
Scope	Standardization of test gases, test pressures, appliance categories and gas appliance types as a reference standard to serve as the basis for the elaboration of standards for gas appliances, including mirroring the activity work of ISO/TC193 'Natural gas'.		
2	Working Groups under TC		
WG 1	EN 437		
WG 2	Emission measurements		

	CEN/TC 282 Installation and equipment for LNG		
	17 Standards	3 Projects	National delegates: 0
Scope	Developing and maintaining standards in the field of installations, equipment and procedures used for production, transportation, transfer, storage, regasification and use of LNG, taking into account the programme of work of other CEN technical committees dealing with LNG. Standardization covers the supply chain from the inlet to the outlet of the relevant natural gas/LNG facilities, and comprises both onshore and offshore siting options for them. Standardization involves contribution to and adoption of ISO standards (under Vienna Agreement) as well of development of homegrown European standards. CEN/TC 282 further coordinates questions concerning LNG in the technical work of technical committees dealing with cryogenic equipment.		
1	Working Groups under TC		
WG 5	Design of onshore installations		

1.2.15 Electricity Networks: Overhead Lines

	IEC/TC 7 Overhead electrical conductors		
	17 Standards	3 Projects	National delegates: 0
Scope	<p>To prepare International Standards and Specifications for fabrication and utilization of overhead electrical conductors, including:</p> <ul style="list-style-type: none"> - All types of overhead ground wires, - All shapes of round and non-round wires, - Conductors made of various metals such as aluminium, steel, copper, or composite material supporting core etc. and their combinations, - Test methods for assessment of overhead electrical conductor performance in operation, - Have the cooperation with TC11 on hardware and accessories directly connected to conductor for the purpose of maintaining electrical/mechanical continuity, - Have the cooperation with SC86A on aerial optical cables used either for phase conductors or ground wires, such as the publication of the original OPGW standard now named IEC 60794-4. 		
5	Working Groups under TC		
MT 1	Aluminium and aluminium alloy with and without steel or alternative reinforcement stranded conductors		
PT 61597	Maintenance of IEC 61597/TR		
PT 62818	IEC 62818		
PT 63089	Development of IEC 63089/Ed1		
JWG 13	IEC 61284 - Requirements and tests for fittings Managed par TC 11		

	CLC/TC 7X Overhead electrical conductors		
	20 Standards	1 Projects	National delegates: 0
Scope	<p>Preparation and maintenance of European standards regarding fabrication, test methods and utilization of:</p> <ul style="list-style-type: none"> - all kinds of overhead electrical conductors including ground wires made of various materials (aluminium, steel, copper, composite) - all shapes of round and non-round wires for conductors and cores - hardware directly connected to conductors. 		
1	Working Groups under TC		
WG 01	Conductors for Overhead Lines - Characteristics of Greases (Revision of EN 50326)		

	IEC/TC 11 Overhead lines		
	14 Standards	1 Projects	National delegates: 0
Scope	<p>To prepare International Standards for Overhead Lines above 1 kV AC and 1.5 kV DC Nominal Voltage, excluding railway traction supports and line materials. These Standards will provide design criteria that may serve as a guide to national regulations differing from each other only in the local conditions and in the assumed safety level. These Standards will deal with mechanical loadings and strength of the line, with clearances and with tests on supports, fittings and foundations. Including design requirements for supports and foundations to be able withstand the required mechanical loadings. Excluding Recommendations dealing with tests on conductors and insulators established respectively by Technical Committees Nos 7 and 36.</p>		
4	Working Groups under TC		
JWG 13	IEC 61284 - Requirements and tests for fittings		
WG 14	Requirements and tests for aeronautical warning balls		
MT 1	Maintenance of TC 11 documents		
MT 2	Maintenance of IEC 466 Parts		

CENELEC	CLC/TC 11 Overhead electrical lines exceeding 1 kV a.c. (1,5 kV d.c.)		
	31 Standards	1 Projects	National delegates: 0
Scope	To prepare harmonized standard for overhead electrical lines. The standard(s) will specify the general requirements that should be met by the design and construction of an overhead line to ensure that the line is suitable for its purpose with regard to safety of persons, maintenance, operation and environmental consideration. CENELEC, CEN, IEC publications and other relevant documents have to be considered.		
7	Working Groups under TC		
WG 08	Maintenance of CLC/TC 11 Standards		
WG 08-01	Maintenance of CLC/TC 11 standards		
WG 08-02	Maintenance of CLC/TC 11 standards		
WG 08-03	Maintenance of CLC/TC 11 standards		
WG 09	Restructuring EN 50341		
WG 10	Final Review EN 50341-1		
WG ED	Editing Committee of TC 11		

CENELEC	CLC/BTTF 129-1 Thermal resistant aluminium alloy wire for overhead line conductor		
	1 Standards	0 Projects	National delegates: 0
Scope	To revise prEN 62004:2006 "Thermal resistant aluminium alloy wire for overhead line conductor".		

CENELEC	CLC/BTTF 132-1 Aluminium conductors steel supported (ACSS type) for overhead electrical lines		
	1 Standards	0 Projects	National delegates: 0
Scope	To handle the VILAMOURA notification BT/ES0023/NOT under Spanish convenorship with participation of AT, BE, DE, FR and IT NCs		

IEC	IEC/TC 122 UHV AC transmission systems		
	8 Standards	2 Projects	National delegates: 0
Scope	Standardization in the field of AC transmission technology for highest voltage of the system exceeding 800 kV, particularly the preparation of systems-oriented specifications such as those for planning, design, technical requirements, construction, commissioning, reliability, availability, operation and maintenance. Development of processes for specifying requirements and demonstrating whether the required performance of UHV systems is assured. Responsibility for equipment standards remains with product TCs, except for specific equipment which is not within the scope of an existing TC but is nevertheless essential for the UHV transmission system. The UHV AC Transmission TC will consult and coordinate with the product TCs in all systems-related aspects of equipment standards.		
4	Working Groups under TC		
WG 1	System design		
WG 2	Substation and Transmission Line Design		
WG 3	Commissioning		
WG 4	Maintenance		

	IEC/TC 36		Insulators	
	50 Standards	17 Projects	National delegates: 0	
Scope	Standardization of insulators for high voltage systems and equipment including bushings, insulators for overhead lines and substations and their couplings.			
15	Working Groups under TC			
WG 11	Revision of IEC 60815, Edition 1: Guide for the selection of insulators in respect of polluted conditions			
PT 63264	Fiber optical bushings for a.c. voltage greater than 1 000 v and d.c. voltage greater than 1 500 v – definitions, test methods and acceptance criteria			
PT 63414	Artificial pollution tests on high-voltage insulators made of hydrophobicity transfer materials to be used on a.c. and d.c. systems			
PT 63432	Room temperature vulcanising (RTV) silicone rubber for outdoor insulators			
MT 14	Revision of Chapter 471 of IEC 60050			
MT 15	Review of IEC 61245 Ed.1.0			
MT 16	Review of IEC/TS 62073

MT 18	Revision of IEC 61109, 61466-1,-2 & IEC 62609 and IEC 61952-2			
MT 19	Revision of IEC 62217			
MT 20	Revision of IEC 60383-1			
MT 21	Revision of IEC 60120, IEC 60372 and IEC 60471			
MT 23	Revision of IEC 60437			
MT 24	Revision of IEC 62772 and IEC 61462			
JWG 22	Atmospheric and altitude correction Managed by TC 42			
1	Sub-Committees			
SC 36A	Insulated bushings			

	CLC/SR 36		Insulators	
	38 Standards	8 Projects	National delegates: 0	

	CLC/TC 36A		Insulated bushings	
	18 Standards	1 Projects	National delegates: 0	
Scope	To prepare harmonized standards for bushings for use in electrical apparatus, transformers and installations.			
3	Working Groups under TC			
WG 01	Open type bushings for liquid filled transformers			
WG 02	Plug-in type bushings for liquid filled transformers and apparatus			
WG 03	Revision of EN 50366 and EN 50386			

1.2.16 Electricity Networks: Power & Energy

	IEC/TC 8 System aspects of electrical energy supply		
	24 Standards	45 Projects	National delegates: 0
Scope	<p>To prepare and coordinate, in co-operation with other TC/SCs, the development of international standards and other deliverables with emphasis on overall system aspects of electricity supply systems and acceptable balance between cost and quality for the users of electrical energy. Electricity supply system encompasses transmission and distribution networks, generators and loads with their network interfaces.</p> <p>This scope includes, but is not limited to, standardization in the field of:</p> <ul style="list-style-type: none"> • Terminology for the electricity supply sector; • Characteristics of electricity supplied by public networks; • Network management from a system perspective; • Connection of network users (generators and loads) and grid integration; • Design and management of de-centralized electricity supply systems (e.g. microgrids, systems for rural electrification). <p>While relying on efficient and secure data communication and exchange, TC 8's scope does not include standards for communication with appliances and equipment connected to the electric grid or for communication infrastructure serving the electric grid.</p> <p>TC 8 is responsible for basic publications (horizontal standards) on standard voltages, currents and frequencies ensuring the consistency of the IEC publications in these fields.</p> <p>TC 8 cooperates also with several organizations active in the field of electricity supply such as CIGRE, CIRED, IEEE, AFSEC, IEA.</p>		
10	Working Groups under TC		
WG 11	Power Quality		
MT 1	Maintenance of IEC 60038, IEC 60059 and IEC 60196		
MT 8	To define a general framework and procedures for maintenance of electrical energy supply networks		
JWG 1	Terminology linked to SC 8A, SC 8B, SC 8C		
JWG 9	LVDC distribution linked to SyC LVDC		
JWG 10	Distributed energy resources connection with the grid linked to TC 120, TC 82, SC 22E		
JWG 12	Requirements for measurements used to control DER and loads linked to TC 85, TC 95, SC 77A		
JWG 44	Prosumer's Low Voltage Installation Managed by TC 64		
AG 1	Chairman's Advisory Group (CAG)		
AG 13	Digital content and system approach		
3	Sub-Committees		
SC 8A	Grid Integration of Renewable Energy Generation		
SC 8B	Decentralized electrical energy systems		
SC 8C	Network Management in Interconnected Electric Power Systems		

	CLC/TC 8X System aspects of electrical energy supply		
	28 Standards	4 Projects	National delegates: 0
Scope	<p>To prepare the necessary standards framework and coordinate the development, in cooperation with other TC/SCs, of CENELEC standards needed to facilitate the functioning of electricity supply systems in open markets.</p> <p>TC8X also covers High Voltage Direct Current (HVDC) transmission for DC voltages above 100 kV.</p>		
3	Working Groups under TC		
WG 01	Physical characteristics of electrical energy (former BTTF 68-6)		
WG 03	Requirements for connection of generators to distribution networks		
WG 06	System aspects for HVDC grid		

IEC	IEC/TC 57 Power systems management and associated information exchange		
	232 Standards	37 Projects	National delegates: 0
Scope	<p>To prepare international standards for power systems control equipment and systems including EMS (Energy Management Systems), SCADA (Supervisory Control And Data Acquisition), distribution automation, teleprotection, and associated information exchange for real-time and non-real-time information, used in the planning, operation and maintenance of power systems. Power systems management comprises control within control centres, substations and individual pieces of primary equipment including telecontrol and interfaces to equipment, systems and databases, which may be outside the scope of TC 57. The special conditions in a high voltage environment have to be taken into consideration.</p> <p>Note 1: Standards prepared by other technical committees of the IEC and organizations such as ITU and ISO shall be used where applicable.</p> <p>Note 2: Although the work of TC 57 is chiefly concerned with standards for electric power systems, these standards may also be useful for application by the relevant bodies to other geographical widespread processes.</p> <p>Note 3: Whereas standards related to measuring and protection relays and to the control and monitoring equipment used with these systems are treated by TC 95, TC 57 deals with the interface to the control systems and the transmission aspects for teleprotection systems. Whereas standards related to equipment for electrical measurement and load control are treated by TC 13, TC 57 deals with the interface of equipment for interconnection lines and industrial consumers and producers requiring energy management type interfaces to the control system.</p>		
20	Working Groups under TC		
WG 3	Telecontrol protocols		
WG 10	Power system IED communication and associated data models

JWG 15	Distributed energy storage systems based on Electrically Chargeable Vehicles Managed by TC 69		
JWG 25	Communications for monitoring and control of wind power plants Managed by TC 88		
JAG 26	Horizontal security function for OT Managed by TC 65		

GENELEC	CLC/TC 57 Power systems management and associated information exchange		
	128 Standards	17 Projects	National delegates: 0
Scope	<p>To prepare international standards for power systems control equipment and systems including EMS (Energy Management Systems), SCADA (Supervisory Control And Data Acquisition), distribution automation, teleprotection, and associated information exchange for real-time and non-real-time information, used in the planning, operation and maintenance of power systems. Power systems management comprises control within control centres, substations and individual pieces of primary equipment including telecontrol and interfaces to equipment, systems and databases, which may be outside the scope of TC 57. The special conditions in a high voltage environment have to be taken into consideration.</p> <p>NOTE 1: Standards prepared by other technical committees of the IEC and organizations such as ITU and ISO shall be used where applicable.</p> <p>NOTE 2: Although the work of TC 57 is chiefly concerned with standards for electric power systems, these standards may also be useful for application by the relevant bodies to other geographical widespread processes.</p> <p>NOTE 3: Whereas standards related to measuring and protection relays and to the control and monitoring equipment used with these systems are treated by TC 95, TC 57 deals with the interface to the control systems and the transmission aspects for teleprotection systems. Whereas standards related to equipment for electrical measurement and load control are treated by TC 13, TC 57 deals with the interface of equipment for interconnection lines and industrial consumers and producers requiring energy management type interfaces to the control system</p>		

IEC	IEC/TC 13 Electrical energy measurement and control		
	76 Standards	10 Projects	National delegates: 0
Scope	<p>Standardization in the field of a.c. and d.c. electrical energy measurement and control, for smart metering equipment and systems forming part of smart grids, used in power stations, along the network, and at energy users and producers, as well as to prepare international standards for meter test equipment and methods.</p> <p>Excluded: Standardization for the interface of metering equipment for interconnection lines and industrial consumers and producers (covered by TC 57).</p>		
7	Working Groups under TC		
WG 11	Electricity metering equipment		
WG 14	Data exchange for meter reading, tariff and load control		
WG 15	Smart Metering Functions and Processes		
PT 62057	Test equipment, techniques and procedures for electrical energy meters		
PT 62057-3	Test equipment, techniques and procedures for electrical energy meters - Part 3: Automatic Meter Testing System (AMTS)		
JWG 16	Mapping between the common information model CIM and DLMS/COSEM data models and message profiles linked to TC 57		
JAHG 17	Initial study into synergy and interplay between IEC/TC 13 and IEC/TC 69 linked to TC 69		

GENELEC	CLC/TC 13 Electrical energy measurement and control		
	85 Standards	11 Projects	National delegates: 0
Scope	<p>Standardization in the field for metering equipment and systems (using whenever possible IEC standards), including smart metering systems, for electrical energy measurement, tariff- and load control, customer information and payment, for use in power stations, along the network and at energy end users, as well as to prepare international standards for meter test equipment and methods.</p> <p>Excluded: Standardization for the interface of metering equipment for interconnection lines and industrial consumers and producers requiring energy management type interfaces to the control system, covered by IEC/TC 57.</p>		
2	Working Groups under TC		
WG 01	Electricity meters for active energy of class a, b and c		
WG 03	Measuring systems for stationary supply equipment		

GENELEC	CLC/BTTF 128-2		Erection and operation of electrical test equipment	
	1 Standards	0 Projects	National delegates: 0	
Scope	To revise EN 50191:1999 "Erection and operation of electrical test equipment".			

IEC	IEC/TC 22		Power electronic systems and equipment	
	131 Standards	22 Projects	National delegates: 0	
Scope	<p>To prepare international standards regarding systems, equipment and their components for electronic power conversion and electronic power switching, including the means for their control, protection, monitoring and measurement.</p> <p>Note 1.- Components which are comprised within the scope include electronic devices.</p> <p>Note 2.- The scope does not include telecommunications apparatus other than power supplies to such apparatus.</p> <p>Group Safety Function: Power electronic converter systems and equipment for solar, wind, tidal, wave, fuel cell or similar energy sources.</p>			
6	Working Groups under TC			
WG 11	Application independent definitions			
MT 3	Maintenance Team for IEC 60146 series and 61148			
MT 8	Maintenance team for IEC/TS 62578			
MT 9	Maintenance team for IEC 62477-1			
AG CAG	Chairman's Advisory Group (CAG)			
JMT 10	Maintenance team for IEC 62477-2 linked to TC 99			
4	Sub-Committees			
SC 22E	Stabilized power supplies			
SC 22F	Power electronics for electrical transmission and distribution systems			
SC 22G	Adjustable speed electric power drive systems (PDS)			
SC 22H	Uninterruptible power systems (UPS)			

GENELEC	CLC/TC 22X		Power electronics	
	91 Standards	19 Projects	National delegates: 0	
Scope	<p>To prepare standards dealing with power electronics. The standards will deal with equipment, their component parts (especially electronic devices) and their extension to the system aspect. Standards for power converters interfacing general power systems to dedicated systems, for example railways, shall be dealt with jointly by TC 22X and relevant product committees.</p> <p>The following are excluded:</p> <ul style="list-style-type: none"> - converters for rolling stock; - converters and charging equipment for electrical vehicles; - emitters for telecommunication; - dimmers for lighting. 			
3	Working Groups under TC			
WG 07	Power supplies			
WG 08	Management of New Approach Directives			
WG 09	Material Efficiency for Circular Economy

1.3.1 Piping

	ISO/TC 5 Ferrous metal pipes and metallic fittings		
	61 Standards	10 Projects	National delegates: 0
Scope	Standardization in the field of steel tubes, cast iron pipes, flexible metallic tubes and metallic fittings, flanges, pipe supports, pipe threads and gauges, metallic and organic coatings and protections. Excluded : - steel for tubes (ISO/TC 17); - aircraft pipes (ISO/TC 20); - tubes and equipment (other than flanges) pipe threads and gauging within the field of work of the petroleum and natural gas industries (ISO/TC 67); - connections for fluid power systems (ISO/TC 131).		
5	Sub-Committees		
SC 1	Steel tubes		
SC 2	Cast iron pipes, fittings and their joints		
SC 5	Threaded fittings, solder fittings, welding fittings, pipe threads, thread gauges		
SC 10	Metallic flanges and their joints		
SC 11	Metal hoses and expansion joints		

	CEN/TC 342 Metal hoses, hose assemblies, bellows and expansion joints		
	12 Standards	2 Projects	National delegates: 0
Scope	Standardization in the field of metal hoses, hose assemblies, bellows and expansion joints for general applications and for specific applications as required by the market, but avoiding overlap conflict with other functional CEN/TC's.		
3	Working Groups under TC		
WG 1	Hose assemblies and fittings		
WG 2	Expansion joints		
WG 3	Hose assemblies for gas applications		

	ISO/TC 138 Plastics pipes, fittings and valves for the transport of fluids		
	349 Standards	51 Projects	National delegates: 0
Scope	Standardization of pipes, fittings, valves and auxiliary equipments intended for the transport of fluids and made from all types of plastic materials, including all types of reinforced plastics. Metal fittings used with plastics pipes are also included. This standardization includes - for pipes, flanges, fittings, valves and auxiliary equipments - dimensions and their tolerances; requirements for chemical, mechanical and physical properties and appropriate test methods; requirements and test methods for other properties relevant to particular applications; temperature and pressure ratings.		
1	Working Groups under TC		
AG 0	Advisory group		
8	Sub-Committees		
SC 1	Plastics pipes and fittings for soil, waste and drainage (including land drainage)		
SC 2	Plastics pipes and fittings for water supplies		
SC 3	Plastics pipes and fittings for industrial applications		
SC 4	Plastics pipes and fittings for the supply of gaseous fuels		
SC 5	General properties of pipes, fittings and valves of plastic materials and their accessories - Test methods and basic specifications		
SC 6	Reinforced plastics pipes and fittings for all applications		
SC 7	Valves and auxiliary equipment of plastics materials		
SC 8	Rehabilitation of pipeline systems		

	CEN/TC 155		
	Plastics piping systems and ducting systems		
	256 Standards	38 Projects	National delegates: 0
Scope	Standardization of requirements and test methods for geometrical, chemical, physical and other characteristics of components, joints and systems; - where "Function TC's" exist, standardization of the plastics related requirements and test methods for fitness for purpose of complete systems related to the application shall be done in liaison with these "Function TC's"; in such cases are excluded from the work of CEN/TC 155 those general requirements for fitness for purpose that are independent of the plastics materials; - where "Function TC's" exist, standardization of the plastics related aspects of Codes of Practice and commissioning rules for specified applications shall be done in liaison with these "Function TC's"... (see resolution BT 155/1989).		
18	Working Groups under TC		
WG 1	Installation outside building structures of flexible piping systems and rainwater infiltration and storage/attenuation systems		
WG 8	Systems for water supply and pressure drainage and sewerage - PVC (solid wall)		
WG 12	Pressure systems of polyolefin material for gas supply, water supply and drainage and sewerage		
WG 13	Systems with structured-wall pipes for non-pressure drainage and sewerage - PE, PP, PVC-U		
WG 14	Systems of glass-reinforced thermosetting plastics for all applications - Polyester, epoxy and polyester resin based concrete		
WG 16	Systems for hot and cold water applications		
WG 17	Rehabilitation of pipeline systems		
WG 20	Thermoplastics ancillaries for soil and waste discharge and gravity buried drainage and sewerage systems		
WG 21	Internal CEN/TC 155 Guidance documents and templates for standards development		
WG 23	Thermoplastics systems for industrial applications		
WG 25	Recycling of PVC-U, PE and PP materials		
WG 26	Systems for storm water handling		
WG 27	Environmental aspects		
WG 28	Material assessment related to long term performance of non-pressure plastic piping systems		
WG 31	CPR and DWD		
WG 32	Valves		
WG 33	Thermoplastics piping systems for soil & waste discharge and non-pressure drainage and sewerage		
WG 34	Polyamid piping systems for gas supply		

	CEN/TC 208		
	Elastomeric seals for joints in pipework and pipelines		
	21 Standards	1 Projects	National delegates: 0
Scope	Standardization of material requirements and test methods for elastomeric seals for joints and diaphragms used in systems for the conveyance of fluids, for example, cold and hot water, waste water, gas, hydrocarbons and other fluids.		
3	Working Groups under TC		
WG 1	Elastomeric seals for hot and cold water and waste water		
WG 2	Elastomeric seals for gas, hydrocarbons and other fluids		
WG 4	Seals and diaphragms for gas appliances and gas equipment		

	CEN/TC 218		Rubber and plastics hoses and hose assemblies	
	70 Standards	16 Projects	National delegates: 0	
Scope	Preparation of European standards for rubber and plastics hoses and hose assemblies for all applications, including methods of test, taking account of work already carried out by ISO, European trade associations and national standard bodies (with the exception of fire fighting hoses).			
3	Working Groups under TC			
WG 1	Rubber and plastics hoses, couplings and hose assemblies for industrial, chemical and petrochemical applications			
WG 2	Rubber and plastics hoses and hose assemblies for hydraulic applications			
WG 4	Basic specifications and test methods for rubber and plastics hoses, hose assemblies and tubing			

	CEN/TC 74		Flanges and their joints	
	38 Standards	11 Projects	National delegates: 0	
Scope	Standardization of flanges and their joints in pipelines and piping systems, for all applications excluding hydraulic and pneumatic load transmission. Definition of "nominal pressure" and "nominal size"; - flanges: dimensions and tolerances, selection of materials, technical conditions of delivery; - bolts, screws and nuts: selection of required bolts, screws and nuts, dimensions, technical conditions of delivery, materials; - gaskets: dimensions and tolerances, materials, technical conditions of delivery; - calculation method for flanges design; - determination of P/T ratings.			
5	Working Groups under TC			
WG 2	Steel flanges			
WG 3	Cast iron flanges			
WG 8	Gaskets			
WG 9	Bolting			
WG 10	Calculation methods			

	CEN/TC 267		Industrial piping and pipelines	
	22 Standards	17 Projects	National delegates: 0	
Scope	Standardization of rules constituting a design and manufacturing code comprising the choice of materials, design, fabrication, installation, inspection and testing of industrial piping and pipeline, including the choice of safety systems. The meaning of "industrial piping" is the following: Pipes or pipe networks located on the premises of an industrial site. The meaning of "pipelines" is the following: Pipes or pipe networks located outside premises of an industrial site. The following are excluded from the scope of CEN/TC 267: - Pipelines for waste water, and piping for waste water, the latter being directly evacuated via the sewer system outside of industrial premises and/or in the environment (dealt within CEN/TC 165); - Pipelines for gaseous fuels (that is to say any fuel that is in gaseous state at a temperature of 15°C and at a pressure of 1 bar (dealt with in CEN/TC 234); - Piping and pipelines for water for human consumption (dealt with in CEN/TC 164). - Pipelines for petroleum and natural gas industries (dealt with in CEN/TC 12).			
7	Working Groups under TC			
WG 1	General			
WG 2	Metallic materials			
WG 3	Design and calculation			
WG 4	Manufacturing and installation			
WG 5	Inspection and testing			
WG 8	Maintenance of EN 13480 series			
WG 9	Aluminium and aluminium alloy piping			

1.3.2 Valves, Pumps & Compressors

	ISO/TC 153		Valves	
	29 Standards	6 Projects	National delegates: 0	
Scope	Standardization in the field of industrial valves, valve actuators including their attachments, and steam traps. The standardization to include parameters covering interchangeability, valve mating details for actuator mounting, testing, marking, quality requirements, terminology and other relevant parameters. Excluded : <ul style="list-style-type: none"> - safety and relief valves and other pressure relief devices which are the responsibility of ISO/TC 185; - production valves for wellhead equipment and valves for cross country pipelines for the petroleum and natural gas industries which are the responsibility of ISO/TC 67; - valves forming the final control element used for industrial process control systems which are the responsibility of IEC/TC 65; - valves having an envelope predominantly made of plastics which are the responsibility of ISO/TC 138; - valves for sanitary use; - solenoids. 			
6	Working Groups under TC			
AHG 1	Environmental requirements applicable to valves			
WG 1	Valve actuators and valve actuators attachments			
WG 5	Fugitive emissions			
WG 12	Isolating valves for low-temperature applications			
WG 15	Automatic steam traps			
WG 16	Valve actuation			

	CEN/TC 69		Industrial valves	
	86 Standards	11 Projects	National delegates: 1 	
Scope	The standardization of valves for all industrial applications and for all types of fluids, including : <ul style="list-style-type: none"> - steam traps; - valve actuator interface; - safety devices against excessive pressure (safety valves and bursting disks); - control valves (excluding the actuator element and their interface); but excluding: sanitary valves (as defined by CEN/TC 164/WG 8).			
6	Working Groups under TC			
WG 1	Basic standards			
WG 4	Butterfly valves			
WG 10	Safety devices against excessive pressure			
WG 12	Valves for the process industry			
WG 15	Diaphragm valves			
WG 19	Valves for hydrogen applications and networks			

	CEN/TC 197		Pumps	
	51 Standards	1 Projects	National delegates: 0	
Scope	Standardization in the field of safety and all other aspects of pumps and pumping machinery for liquids including machines using pumps for their principal mode of action.			
5	Working Groups under TC			
WG 1	Water pumps efficiency			
WG 2	Circulation pumps			
WG 5	High-pressure water jet machines - Safety requirements			
WG 6	Vehicle cleaning appliances safety standard			
WG 7	Pumps and pump units for liquids			

	CEN/TC 232		Compressors, vacuum pumps and their systems	
	5 Standards	1 Projects	National delegates: 0	
Scope	<p>Standardization in the field of compressors and vacuum pumps, portable and stationary, for all compressible gases, and their systems. This work does not apply to sealed motor compressors used in refrigerating and heat pump systems in which the refrigerant is evaporated and condensed in a closed circuit. (Covered by CEN/TC 182).</p>			

1.3.3 Cooling & Ventilation Systems

	ISO/TC 86		Refrigeration and air-conditioning	
	49 Standards	28 Projects	National delegates: 0	
Scope	<p>Standardization in the fields of refrigeration and air-conditioning, including terminology, mechanical safety, methods of testing and rating equipment, measurement of sound levels, refrigerant and refrigeration lubricant chemistry, with consideration given to environmental protection. The scope includes factory-assembled air-conditioners (cooling), heat pumps, dehumidifiers, refrigerants, and refrigerant reclaiming and recycling equipment as well as other devices, components and equipment such as humidifiers, ventilation equipment and automatic controls used in air-conditioning and refrigeration systems that are not covered by other ISO technical committees.</p>			
5	Sub-Committees			
SC 1	Safety and environmental requirements for refrigerating systems			
SC 4	Testing and rating of refrigerant compressors			
SC 6	Testing and rating of air-conditioners and heat pumps			
SC 7	Testing and rating of commercial refrigerated display cabinets			
SC 8	Refrigerants and refrigeration lubricants			

	CEN/TC 44		Commercial and Professional Refrigerating Appliances and Systems, Performance and Energy Consumption	
	13 Standards	5 Projects	National delegates: 0	
Scope	<p>Standardization of Appliances and Systems for refrigeration for preparation, catering retail and wholesale of food and beverage related products such as:</p> <ul style="list-style-type: none"> - refrigerated & frozen food display cabinets with or without incorporate condensing unit; - refrigerators & frozen food storage cabinets, Walk In Cold Room, ice maker and ice cream machines; - refrigeration systems composed of remote elements with respect to: <ul style="list-style-type: none"> - performance requirements and related test methods; - requirements and test methods for determination of energy consumption; <p>Industrial scale production plants are excluded. Condensing Units and Chillers appliances are excluded. Safety and Environmental matters are excluded.</p>			
6	Working Groups under TC			
WG 1	Commercial refrigerated display cabinets			
WG 2	Service refrigerated cabinets and counters for use in commercial kitchens			
WG 4	Walk-in cold rooms			
WG 5	Refrigerated display cabinets for artisan and self made gelato			
WG 6	Commercial beverage coolers and ice cream freezers			
WG 7	Walk-in cold rooms packaged Refrigerating Units			

	CEN/TC 182 Refrigerating systems, safety and environmental requirements		
	20 Standards	11 Projects	National delegates: 0
Scope	Standardization of requirements in the field of safety and environment for the design, construction, installation, testing, operation, maintenance, repair and disposal of refrigerating systems used for cooling and/or heating. Performance of Appliances and Systems for refrigeration for preparation, catering retail and wholesale of food and beverage related products are excluded.		
7	Working Groups under TC		
WG 2	Design and testing		
WG 4	Competence		
WG 6	Revision of EN 378		
WG 7	JWG CEN/TC 182/CEN/TC 54 Pressure vessels for refrigerating systems		
WG 9	Tightness of components		
WG 11	Revision of EN 14624		
WG 12	Flammable Refrigerants Standardization Request M/555		

	CEN/TC 156 Ventilation for buildings		
	88 Standards	18 Projects	National delegates: 0
Scope	Standardization of terminology, testing and rating methods, dimensioning and fitness for purpose of natural and mechanical ventilation systems and components for buildings subject to human occupancy.		
15	Working Groups under TC		
WG 1	Terminology		
WG 2	Natural and mechanical powered residential ventilation		
WG 3	Ductwork		
WG 4	Air terminal devices		
WG 5	Air handling units		
WG 8	Installation		
WG 9	Fire precautions for air distribution systems in buildings		
WG 14	Ventilation of commercial kitchens		
WG 16	Joint Working Group between CEN/TC 156 and CEN/TC 113 - Multifunctional balanced ventilation units for single family dwellings, including heat pumps		
WG 17	Fans		
WG 18	Ventilation in hospitals		
WG 20	Ventilation and Room-Conditioning Systems in non-Residential Buildings		
WG 21	Energy performance calculation of ventilation and cooling systems		
WG 23	Ventilation for Buildings - Inspection and checking		
WG 24	Chairman Advisory Group		

INSTALLATION

1.3.4 Heating Systems

	CEN/TC 57		Central heating boilers	
	14 Standards	6 Projects	National delegates: 0	
Scope	To establish European Standards with regard to constructional and performance requirements as well as efficiency tests for liquid and solid fuel-fired central heating boilers as well as boiler bodies of gas-fired central heating boilers to be equipped with a forced draught burner, oil fired air-heaters, heat storage units and hot water performance requirements (regarding efficiency) of storage tanks as part of a hot water storage system.			
8	Working Groups under TC			
WG 1	Central heating boilers for solid fuels			
WG 2	Requirements for efficiency and emission and test methods for central heating boilers			
WG 4	Low pressure boilers			
WG 5	Heating boilers for fuel oil			
WG 6	Airborne noise emissions			
WG 7	Pellet burners			
WG 8	Energy efficiency requirements for warm water storage tanks			
WG 9	Electrical power consumption for heat generators			

	CEN/TC 58		Safety and control devices for burners and appliances burning gaseous or liquid fuels	
	20 Standards	2 Projects	National delegates: 0	
Scope	Safety and control devices for equipment burning gaseous or liquid fuels, ranging from small domestic appliances to large industrial burners. Excluding the following: - mechanical controls other than gas controls - devices for transmission and distribution equipment			
5	Working Groups under TC			
WG 11	Generics			
WG 12	Electronics			
WG 13	Mechanics			
WG 14	Sensors			
WG 15	Advisory Group 1 Hydrogen			

	CEN/TC 109		Central heating boilers using gaseous fuels	
	16 Standards	5 Projects	National delegates: 0	
Scope	All the gas-fired central heating boilers, including the boilers of the condensing type, with or without integrated domestic hot water production, of all types and all nominal inputs, i.e. : - the boilers fitted with atmospheric burners or premixed burners (fan-assisted or not), - the units composed of a boiler body and its fan-assisted burner, constituting an indissociable entity, - the assemblings of a boiler body (according to the requirements prescribed by the CEN/TC 57) and a fan-assisted burner (according to the requirements prescribed by the CEN/TC 131), but only for the specific characteristics suited to the utilisation of gaseous fuels.			
5	Working Groups under TC			
WG 1	Domestic central heating boilers using gaseous fuels			
WG 3	Assembly of boiler bodies and forced draught burners			
WG 4	Hot water production of central heating boilers for domestic use			
WG 5	Steering Group ECOTEST			
WG 6	Material efficiency			

	CEN/TC 269		Shell and water-tube boilers	
	34 Standards	19 Projects	National delegates: 0	
Scope	Standardization of rules for the design, manufacture, materials, equipment and testing of shell boilers and water-tube boilers.			
2	Working Groups under TC			
WG 1	Water-tube boilers			
WG 2	Shell boilers			

	CEN/TC 295		Residential solid fuel burning appliances	
	10 Standards	6 Projects	National delegates: 0	
Scope	Standardization in the field of residential heating and cooking appliances burning solid fuels: to include solid mineral fuel burning appliances, wood- burning appliances and multifuel appliances. The standardization to cover appliance construction, performance, (e.g. efficiency and emissions), safety and commissioning requirements, together with their associated test methods and installation and operating instructions. The standardization of test fuels and test methods for the assessment of the suitability of fuels for the various appliance types.			
6	Working Groups under TC			
WG 1	Appliances fired by solid fuels			
WG 2	Appliances fired by pellets			
WG 3	Heat storage stoves (SHRA) and sauna stoves			
WG 4	Tiled Stoves			
WG 5	Measurement methods			
WG 6	CPR and Mandates			

	CEN/TC 46		Fireplaces for liquid fuels	
	4 Standards	2 Projects	National delegates: 0	
Scope	Standardisation in the field of fireplaces for liquid fuels, this includes oil stoves (oil stoves with vaporising burners) and appliances operated with ethanol (liquid or gel). The standardisation covers appliance construction, performance, (e.g. efficiency and emissions), safety and commissioning requirements, together with their associated test methods and installation and operating instructions.			
2	Working Groups under TC			
WG 1	Oil stoves with vaporizing burners			
WG 2	Fireplaces for Ethanol/Gel			

	CEN/TC 48		Domestic gas-fired water heaters	
	2 Standards	1 Projects	National delegates: 0	
Scope	Preparation of European standards for domestic gas-fired water heaters, i.e. instantaneous water heaters and storage water heaters, excluding central heating boilers derived from these appliances and also excluding appliances combining these two preceding types.			
1	Working Groups under TC			
WG 1	Revision of EN 26 and EN 89			

	CEN/TC 62 Independent gas-fired space heaters		
	9 Standards	1 Projects	National delegates: 0
Scope	Preparation of standards for independent gas-fired space heaters and decorative fuel effect appliances, excluding dedicated LPG appliances.		
1	Working Groups under TC		
WG 3	Chairman's Advisory Group		

	CEN/TC 180 Decentralized gas heating		
	6 Standards	0 Projects	National delegates: 0
Scope	To prepare standards for: a) non-domestic, overhead, gas-fired radiant tube heaters; b) non-domestic, overhead, gas-fired radiant luminous heaters; c) domestic and non-domestic gas-fired air heaters intended for installation with or without air distribution ducts.		
3	Working Groups under TC		
WG 1	Non domestic gas-fired overhead radiant tube and luminous heaters - Safety and Efficiency		
WG 2	Gas fired air heaters - Safety and Efficiency		
WG 3	Non-domestic gas fired overhead radiant strips and continuous radiant tube heaters - Safety and Efficiency		

	CEN/TC 228 Heating systems and water based cooling systems in buildings		
	43 Standards	8 Projects	National delegates: 0
Scope	<p>Standardisation of functional requirements for all types of heating systems, including domestic hot water production, water based cooling emission and distribution systems in buildings and power generation systems in the direct environment of the building. Furthermore standardisation in relation to energy performance of buildings. The work includes:</p> <ul style="list-style-type: none"> - General performance requirements for heating systems, - General requirements for design of heating systems, water based cooling systems and power generation systems; - Requirements for installation and commissioning, including system tests on the heating and water based cooling system as a whole; - Requirements for preparation of instructions for operation, maintenance and use of heating and water based cooling systems; - Requirements for inspection of heating systems; - Methods for calculation of design heat loads, as basis for sizing of heating equipment; - Methods for calculation of energy use of heating systems, water based cooling systems and power generation systems in the direct environment of the building (e.g. wind power, thermo solar and photovoltaic), including energy economy and environmental impact, as basis for supporting energy performance criteria and/or energy certification of heating systems, water based cooling systems and power generation systems on building or building unit level; - Assessment of energy performance of district heating and cooling systems; - Co-operation with other CEN/TCs (such as CEN/TC 156) responsible for related systems and products in order to establish a common terminology and a common set of technical parameters that can be used for both product declaration and design information. <p>The wind turbines handled by CEN/TC 228 are small plants as they may occur in domestic production and use of electricity in connection with buildings. The same applies to photovoltaic, CEN/TC 228 describes a process by which electrical energy, which is produced by building integrated or additive photovoltaic systems in the direct environment of the building, is determined.</p> <p>Not covered are:</p> <ul style="list-style-type: none"> - requirements on products such as heating and cooling units, wind power units and photovoltaic units which are in the responsibility of dedicated Technical Committees (such as CEN/TC 57, CEN/TC 109, CEN/TC 113, CEN/TC 130, CEN/TC 182, CEN/TC 312 CLC/TC 82 and CLC/TC 88); - cooling generation systems (covered by CEN/TC 156); - calculation of cooling load (covered by CEN/TC 156). 		
2	Working Groups under TC		
WG 1	General performance requirements of heating systems and sub-systems in buildings		
WG 4	Calculation methods and system performance and evaluation		

	CEN/TC 113 Heat pumps and air conditioning units		
	18 Standards	3 Projects	National delegates: 0
Scope	Standardization of testing and requirements for the performance of factory assembled heat pumps, air conditioning units (ducted and non ducted), hydronic room fan coil units, and liquid chilling packages whether vapour compression or sorption, regardless of energy used, for domestic or commercial purposes excluding industrial processes and also excluding the rational use of gas energy which is within the scope of CEN/TC 299. Also the standardization of rating conditions, performance testing and the presentation of data of refrigerant compressors and condensing units.		
8	Working Groups under TC		
WG 6	Refrigerant compressors - Presentation of performance data		
WG 7	Heat Pumps, air conditioners and chilling liquid packages - testing and rating at part load conditions		
WG 8	Rating and testing for performance		
WG 9	Sound rating of heat pumps, air conditioners and liquid chilling packages		
WG 10	Heat pumps for domestic hot water production and revision of EN 16147		
WG 11	Direct expansion-to-water units		
WG 14	Hydronic fan coil units		
WG 15	Roof-top units		

1.3.5 Gas

	CEN/TC 236 Non industrial manually operated shut-off valves for gas and particular combinations valves-other products		
	2 Standards	0 Projects	National delegates: 0
Scope	Standardization of the requirements for fitness for purpose (for design, performance, testing, marking, packing, instructions for installation and use) of manually operated shut-off valves for domestic and commercial not directly buried installations inside or outside of buildings, and other particular types of valves strictly combined to particular products or component considered as a whole (e.g. safety flexible metallic hose assemblies and connection valves for domestic gas appliances).		
1	Working Groups under TC		
WG 1	Revision of existing standards		

	CLC/TC 216 Gas detectors		
	16 Standards	3 Projects	National delegates: 0
Scope	To standardize general and specific requirements for the construction, safety, performance and testing for electrical apparatus for sensing the presence of gas or vapour and for providing an indication, alarm and/or other output function, the purpose of which is to give a warning of explosion hazard, fire hazard or health hazard. The standardization work of TC 216 concerns domestic gas detectors and those industrial and commercial gas detectors that are not included in the scope of CLC/SC 31-9. To provide information and guidance, as appropriate, on the selection, installation and operation of such apparatus.		
5	Working Groups under TC		
WG 05	Detectors in car parks and tunnels		
WG 13	Revision of EN 50379-2		
WG 14	Specification for portable electrical apparatus designed to measure draught & gas pressures of heating appliances and systems		
WG 15	Working group for the revision of EN 50194-1		
WG 16	Working Group for the revision of EN 50292		

INSTALLATION

1.3.6 Chimneys

	CEN/TC 166		Chimneys	
	35 Standards	10 Projects	National delegates: 0	
Scope	Standardization in the field of chimneys and vents used for conveying the products of combustion from appliances to outside atmosphere and the connecting pieces and ancillaries needed for their construction and operation. Structurally independent chimneys are excluded.			
4	Working Groups under TC			
WG 1	General requirements			
WG 2	Thermal and fluid dynamic calculation methods for chimneys			
WG 4	Chimneys and their components with inner linings of plastic			
WG 6	Clay/Ceramic and Concrete chimneys and components			
1	Sub-Committees			
SC 2	Chimneys and their components with inner linings of metal			

	CEN/TC 297		Free-standing industrial chimneys	
	10 Standards	2 Projects	National delegates: 0	
Scope	Standardization in the field of free-standing chimneys for industrial and utility applications including terminology, performance requirements, safety aspects, design as far as not covered by the Eurocodes, construction and maintenance of the shell, lining and accessories. A chimney may also be considered as free-standing, if it is guyed or supported or if it stands on another structure. All flue gas ducts to the chimney are outside the scope. Note: "Utility applications" can include schools, hospitals, assembly rooms, theatres, swimming pools, prisons etc.			

1.3.7 Domestic Appliances for Water

	CEN/TC 402		Domestic Pools and Spas	
	9 Standards	0 Projects	National delegates: 0	
Scope	Standardization in the field of domestic swimming pools, spas and other types of pools and their related materials, equipment and accessories, used for domestic/private purposes.			
5	Working Groups under TC			
WG 1	Pool structure - design, product and installation			
WG 2	Pool water circulation, filtration and treatment			
WG 3	Mini pools			
WG 4	Domestic spas and hot tubs			
WG 5	Domestic pools - Environmental impacts			

	CEN/TC 426		Domestic appliances used for water treatment not connected to water supply	
	1 Standards	1 Projects	National delegates: 0	
Scope	Standardization of requirements for safety, performance and labelling of water treatment like filtration, sparkling etc. appliances used in domestic and similar environment for which the intended use is the treatment of drinking water only. This Project Committee covers safety requirements and test methods for water treatment devices that are not connected to water supply in buildings and provides requirements and recommendations for instruction manuals, so that these appliances can be used and maintained properly. Appliances with heating water systems are excluded from the scope of this Project Committee.			

1.3.8 Sanitary Appliances

	CEN/TC 163 Sanitary appliances		
	32 Standards	2 Projects	National delegates: 0
Scope	<p>To establish standards for the performance requirements and the corresponding test methods for all sanitary appliances to ensure that the appliance, irrespective of the material of which they are made, will give satisfactory performances.</p> <p>To establish physical and hygiene characteristics, to establish standards on connecting dimensions and to establish tests on the material used in manufacturing sanitary appliances.</p> <p>This Committee is responsible for traps where they are an integral part of the appliances.</p>		
2	Working Groups under TC		
WG 3	Closet bowls, flushing cisterns, urinals, bidets and kitchen sinks		
WG 4	Baths (W/Pools) - Shower trays (Performance testing)		

1.3.9 Fire Safety

	ISO/TC 92 Fire safety		
	161 Standards	21 Projects	National delegates: 0
Scope	<p>Standardization of the methods of assessing</p> <ul style="list-style-type: none"> - fire hazards and fire risk to life and to property; - the contribution of design, materials, building materials, products and components to fire safety and methods of mitigating the fire hazards and fire risks by determining the performance and behaviour of these materials, products and components, as well as of buildings and structures. <p>Excluded:</p> <ul style="list-style-type: none"> - materials and equipments already covered by other technical committees; - fields covered by other ISO and IEC committees. 		
6	Working Groups under TC		
CAG 1	Technical programme management group (TPMG)		
TG 2	Fire fighters		
WG 8	Fire terms and definitions		
WG 13	Fire safety – Statistical data collection		
WG 14	Large outdoor fires and the built environment

4	Sub-Committees		
SC 1	Fire initiation and growth		
SC 2	Fire containment		
SC 3	Fire threat to people and environment		
SC 4	Fire safety engineering		

	ISO/TC 21 Equipment for fire protection and fire fighting		
	93 Standards	8 Projects	National delegates: 1 
Scope	<p>Standardization in the field of all fire protection and fire fighting apparatus and equipment including extinguishing media as well as the personal equipment of the fire fighter, and related work on terminology, classification and symbols.</p> <p>Approval of advisory documents relating to the general principles and application of equipment and apparatus for fire protection and fire fighting.</p> <p>Excluded: protective clothing dealt with by ISO/TC 94.</p>		
6	Sub-Committees		
SC 2	Manually transportable fire extinguishers		
SC 3	Fire detection and alarm systems		
SC 5	Fixed firefighting systems using water		
SC 6	Foam and powder media and firefighting systems using foam and powder		
SC 8	Gaseous media and firefighting systems using gas		
SC 11	Smoke and heat control systems and components		

	CEN/CLC/JTC 4 Services for fire safety and security systems		
	2 Standards	0 Projects	National delegates: 0
Scope	<p>The Technical Committee should develop standards for services for fire safety and security systems. The standards specify the requirements for quality of services supplied by companies and the competencies of their involved staff charged with the planning and design, engineering, installation and hand over, maintenance and repair of fire safety and/or security systems*.</p> <p>* Examples of fire safety and/or security systems, are fire detection-, fire extinguishing -, voice alarm-, intruder alarm-, hold up-, access control , social alarm-, smoke and heat exhaust ventilation-, CCTV systems, control equipment for escape and evacuation route, and combination of such systems as mentioned before.</p>		
1	Working Groups under TC		
WG 1	Remote Services for fire safety and security systems		

	CEN/TC 127 Fire safety in buildings		
	92 Standards	43 Projects	National delegates: 0
Scope	<ol style="list-style-type: none"> 1) To develop standards utilizing relevant existing work where available e.g. in ISO, IEC, CENELEC, CEC and EFTA assessing the fire behaviour of building products, components and elements of construction, 2) To develop standards for classification of products, components and elements of construction, appropriate to the fire risks related to their application, 3) To develop standards for assessing fire hazard and for providing fire safety in buildings. 		
8	Working Groups under TC		
WG 1	Structural and separating elements		
WG 2	Services		
WG 3	Fire Doors		
WG 4	Reaction to fire		
WG 5	Roofs

WG 04	Editing Committee			

	CEN/TC 247 Building Automation, Controls and Building Management		
	30 Standards	4 Projects	National delegates: 0
Scope	Standardisation of building automation, controls and building management systems and services for residential and non-residential buildings. These standards include the definitions, requirements, functionality and test methods of building automation products and systems for automatic control of building services installations. The primary integration measures include application interfaces, systems and services to ensure an efficient technical building management in cooperation with commercial and infrastructural building management. Excluded from this scope are areas of building automation which are under the responsibility of other CEN/CENELEC TC's.		
2	Working Groups under TC		
WG 4	Open System Data Transmission		
WG 6	Electronic control equipment for HVAC applications, integrated room automation, controls and management systems		

	IEC/TC 79 Alarm and electronic security systems		
	46 Standards	8 Projects	National delegates: 0
Scope	<p>To prepare international standards for the protection of buildings, persons, areas and properties against fraudulent actions having the purpose to enter in a place or to take or to use something without permission and other threat related to persons.</p> <p>The scope includes, but is not limited to equipment and systems, either used by ordinary persons or by trained people in the following residential and non-residential applications:</p> <ul style="list-style-type: none"> - Access control systems; - Alarm transmission systems; - Video surveillance systems; - Combined and/or integrated systems even including fire alarm systems*; - Fire detection and fire alarm systems*; - Intruder and hold-up alarm systems; - Remote receiving and/or surveillance centres; - Social alarm systems. <p>These systems can be used for providing a local or remote alarm; they can be used for calling private guards, social assistance, fire brigade or police force. They can be used for recording and transmission of dated or undated information, sounds, pictures of places and people for surveillance purposes.</p> <p>The standards cover:</p> <ul style="list-style-type: none"> - terminology; - technical characteristics regarding performance criteria, reliable operation, installation, maintenance; - testing for detection, monitoring, recording, triggering an alarm and transmission to a remote centre including procedures and protocols for communication. <p>Electrical safety, environmental conditions and behaviour of alarm systems regarding electromagnetic compatibility are also considered with reference to the appropriate standards (e.g. Guide ISO/IEC 51). * ISO/TC 21/SC 3 is in charge of the production of standards for "Fire detection and alarm systems".</p>

1.3.12 Lighting

	ISO/CIE			International Commission on Illumination		
	13 Standards	4 Projects	National delegates:	0		
Scope	<p>The International Commission on Illumination (abbreviated as CIE from its French title) is an organization devoted to international cooperation and exchange of information among its member countries on all matters relating to the science and art of lighting.</p> <p>The objectives of the CIE are</p> <ul style="list-style-type: none"> - to provide an international forum for the discussion of all matters relating to science, technology and art in the fields of light and lighting and for the interchange of information in these fields between countries; - to develop basic standards and procedures of metrology in the fields of light and lighting; - to provide guidance on the application of principles and procedures in the development of international and national standards in the fields of light and lighting; - to prepare and publish standards, reports and other publications concerned with all matters relating to science, technology and art in the fields of light and lighting; - to maintain liaison and technical interaction with other international organizations concerned with matters related to science, technology, standardization and art in the fields of light and lighting. <p>Within these objectives, light and lighting embrace such fundamental subjects as vision, photometry and colorimetry, involving natural and man-made radiations in the ultraviolet, visible and infrared regions of the spectrum, and also applications covering all uses of light, indoors and out, including environmental and aesthetic effects, as well as means for the production and control of light and radiation.</p> <p>Standards produced by the CIE are a concise documentation of data defining aspects of light and lighting for which international harmony requires a unique definition. CIE Standards are therefore a primary source of internationally accepted and agreed data, which can be taken, essentially unaltered, into universal standard systems.</p> <p>For the development of some standards in the field of light and lighting, ISO has established a working relationship with the International Commission on Illumination, which has been recognized by the ISO Council as an international standardizing body.</p> <p>Further information about the CIE can be found on the CIE Web site.</p>					

	ISO/TC 274		
	Light and lighting		
	9 Standards	5 Projects	National delegates: 0
Scope	Standardization in the field of application of lighting in specific cases complementary to the work items of the International Commission on Illumination (CIE) and the coordination of drafts from the CIE, in accordance with the Council Resolution 42/1999 and Council Resolution 10/1989 concerning vision, photometry and colorimetry, involving natural and man-made radiation over the UV, the visible and the IR regions of the spectrum, and application subjects covering all usage of light, indoors and outdoors, energy performance, including environmental, non-visual biological and health effects and lighting related information modelling systems.		
5	Working Groups under TC		
CAG	Chair advisory group		
JAG	Joint Advisory Group (ISO/TC274 – CIE)		
JWG 1	Energy performance of lighting in buildings (joint working group with CIE-JTC 6)		
JWG 5	Lighting for work places (joint working group with CIE-JTC 15)		
WG 2	Commissioning process of lighting systems		

	CEN/TC 169		
	Light and lighting		
	30 Standards	12 Projects	National delegates: 0
Scope	CEN/TC 169 is responsible for standards in the field of vision, photometry and colorimetry, involving natural and man-made optical radiation over the UV, the visible and the IR regions of the spectrum, and application subjects covering all usages of light, indoors and outdoors, including environmental, energy and sustainability requirements and aesthetics and nonimage forming biological aspects as well as lighting related information modelling systems.

GENELEC	CLC/TC 82		
	Solar photovoltaic energy systems		
	116 Standards	36 Projects	National delegates: 0
Scope	To prepare European Standards for systems of and components for photovoltaic conversion of solar energy into electrical energy and for all elements in the entire photovoltaic energy system. The standards will deal with EMC, Machine, CPD and LVD directives. The CLC/TC 82 will especially develop standards in areas where there are special European concerns. The CLC/TC 82 will cooperate closely with IEC/TC 82 and the National Committees. The aim will be to support the accelerated market introduction by harmonization of standards.		
2	Working Groups under TC		
WG 01	Wafers, cells and modules		
WG 02	Bos components and systems		

IEC	IEC/TC 117		
	Solar thermal electric plants		
	9 Standards	7 Projects	National delegates: 0
Scope	<p>To prepare international standards for systems of Solar Thermal Electric (STE) plants for the conversion of solar thermal energy into electrical energy and for all the elements (including all sub-systems and components) in the entire STE energy system.</p> <p>The standards would cover all of the current different types of systems in the STE field, as follows:</p> <ul style="list-style-type: none"> - Parabolic trough; - Solar tower; - Linear Fresnel; - Dish; - Thermal storage. <p>The standards would define terminology, design and installation requirements, performance measurement techniques and test methods, safety requirements, "power quality" issues for each of the above systems.</p> <p>The standards would also address issues of connectivity and interoperability with the power grid related to connections, bi-directional communicates and centralized control (Smart Grid) and environmental aspects.</p>

GENELEC	CLC/TC 88		Wind turbines	
	51 Standards	13 Projects	National delegates: 0	
Scope	<p>Standardisation in the field of wind energy generation systems including wind turbines, wind power plants onshore and offshore and interaction with the electrical system(s) to which energy is supplied. These standards address site suitability and resource assessment, design requirements, engineering integrity, modelling requirements, measurement techniques, test procedures, operation and maintenance. Their purpose is to provide a basis for design, quality assurance and technical aspects for certification. The standards address site-specific conditions, all systems and subsystems of wind turbines and wind power plants, such as mechanical, and electrical systems, support structures, control and protection as well as communication systems for monitoring, centralised and distributed control and evaluation, implementation of grid connection requirements for wind power plants, and environmental aspects of wind power development. The TC 88 standards will be developed based on and in agreement with appropriate EN/IEC/ISO standards.</p>			

1.3.15 High Voltage

	IEC/TC 17 High-voltage switchgear and controlgear		
	75 Standards	18 Projects	National delegates: 0
Scope	To prepare standards, technical specifications and technical reports covering high-voltage switchgear and controlgear as well as their assemblies having a rated voltage above 1 kV a.c. and 1,5 kV d.c., together with associated control digital communication, measuring, signaling, protective, regulating and other equipment.		
7	Working Groups under TC		
WG 6	Common specifications for DC switchgear		
WG 10	High-voltage switchgear and controlgear - Part 320: Environmental aspects and life cycle Assessment rules		
WG 11	Elaborate on catalogue data		
MT 1	Maintenance of IEC 62271-1		
MT 2	Maintenance of IEC 62271-3: High-voltage switchgear and controlgear - Part 3: Digital interfaces based on IEC 61850		
MT 3	Maintenance of IEC 62271-4		
MT 9	Maintenance of IEC TR 62063		
2	Sub-Committees		
SC 17A	Switching devices		
SC 17C	Assemblies		

	CLC/TC 17AC High-voltage switchgear and controlgear		
	70 Standards	11 Projects	National delegates: 0
Scope	To prepare harmonized standards for high-voltage switchgear and controlgear including their assemblies for rated voltages above AC 1 kV or above DC 1,5 kV. Note: In general, relevant IEC standards will be transposed into EN via the Dresden Agreement. To prepare and revise harmonized standards for enclosures of gas-filled high-voltage switchgear having a design pressure higher than atmospheric pressure. To observe and support European activities related to standardization in the field of high voltage switchgear and controlgear in order to ensure the availability of EN suitable to cover the essential requirements of European Directives.		
3	Working Groups under TC		
WG 02	Maintenance of EN 50052		
WG 03	Revision of EN 50089		
WG 04	Revision of EN 50187		

	IEC/TC 99 Insulation co-ordination and system engineering of high voltage electrical power installations above 1,0 kV AC and 1,5 kV DC		
	11 Standards	6 Projects	National delegates: 0
Scope	Standardisation of: a) insulation co-ordination for high voltage systems in specifying basic principles of insulation co-ordination, definitions and standard insulation levels for all type of electrical equipment considering field of applications, minimum air clearances, test requirements and test procedures; and b) common rules and particular requirements for system engineering and erection of high voltage electrical power installations for power generation, transmission, distribution, and consumer premises, in both indoor and outdoor situations, with particular consideration of safety aspects. High voltage (HV) covers nominal voltages above 1,0 kV AC and 1,5 kV DC and includes the voltages referred to as medium voltage (MV), extra-high voltage (EHV) and ultra-high voltage (UHV).		
10	Working Groups under TC		
WG 12	Principles to be observed in the design and erection of high voltage installations - Safety of high voltage installations		
MT 4	Maintenance of IEC 61936-1

	CLC/TC 99X Power installations exceeding 1 kV a.c. (1,5 kV d.c.)		
	11 Standards	2 Projects	National delegates: 0
Scope	To prepare harmonized standards for high voltage power installations (exceeding 1 kV a.c. or 1,5 kV d.c.) located indoors or outdoors, including earthing. The standards will specify the design requirements of the installations, and the selection and erection of electrical equipment in order to ensure the safety of persons and the proper operation of the installations. The standards will not be applicable to factory built and type tested equipment, but will be relevant to the installation of this equipment. The standards will not be applicable to overhead and underground lines between separate installations.		
3	Working Groups under TC		
WG 01	Earthing aspects		

	IEC/TC 115 High Voltage Direct Current (HVDC) transmission for DC voltages above 100 Kv		
	16 Standards	14 Projects	National delegates: 0
Scope	Standardization in the field of HVDC Transmission technology above 100kV. The task includes HVDC system oriented standards as design aspects, technical requirements, construction and commissioning, reliability and availability, and operation and maintenance. Standards of HVDC equipment so far related to the system aspects will be prepared in close collaboration with the relevant Technical Committees and Subcommittees.		
22	Working Groups under TC		
WG 2	Reliability and availability evaluation of HVDC system		
WG 3	Electromagnetic performance of high voltage direct current (HVDC) overhead transmission lines		
WG 4	Guidelines on Asset Management of HVDC Installations (former PT1)		
WG 5	System design of HVDC project

1.3.17 Electrical Energy Storage Systems

	IEC/TC 120	Electrical Energy Storage (EES) Systems	
	11 Standards	11 Projects	National delegates: 0

Scope	<p>1. Standardization in the field of grid integrated EES Systems.</p> <ul style="list-style-type: none"> - TC 120 focuses on system aspects on EES Systems rather than energy storage devices. - TC 120 investigates system aspects and the need for new standards for EES Systems. - TC 120 also focuses on the interaction between EES Systems and Electric Power Systems (EPS). <p>2. For the purpose of TC120, “grid” includes and is not limited to applications in:</p> <ul style="list-style-type: none"> a) transmission grids b) distribution grids c) commercial grids d) industrial grids e) residential grids f) islanded grids g) MUSH(Municipal/Military, Utilities/Universities, Schools, Hospitals) grids h) ICI (Institutional, Commercial and Industrial) grids <p>It is also confirmed that TC120 can include “smart grid.” Storage in railway systems is considered if it contributes as an EES System to the grid as referenced in2 a-f.</p> <p>Note: grid: electricity supply network (ISO/IEC 15067-3) smart grid: electric power system that utilizes information exchange and control technologies, distributed computing and associated sensors and actuators, for purposes such as:</p> <ul style="list-style-type: none"> - to integrate the behaviour and actions of the network users and other stakeholders - to efficiently deliver sustainable, economic and secure electricity supplies (IEV 617-04-13) <p>3. EES Systems include any type of grid-connected EES Systems which can both store electrical energy from a grid or any other source and provide electrical energy to a grid. By that feature it maintains the balance between electrical energy demand and supply over a period of time. TC 120 considers all storage technologies as long as they are capable to store and to discharge electrical energy. (Energy storage itself is not in the scope of the work.) Note: Thermal storage systems are included in the scope, only from the electricity exchange point of view. Unidirectional energy storage systems such as UPS are not included in the scope of TC 120.</p> <p>4. The scope of TC 120 is to prepare normative documents dealing with the system aspects of EES Systems. For example, TC 120 deals with defining unit parameters, testing methods, planning and installation, guide for environmental issues and system safety aspects.</p>

GENELEC	CLC/TC 23BX		Switches, boxes and enclosures for household and similar purposes, plugs and socket outlet for D.C.	
	41 Standards	15 Projects	National delegates: 0	

Scope	<p>a) To prepare standards for general purpose switches including electronic switches, time-delay switches, remote control switches and isolating switches, Fireman's switches, for a.c. only, with rated voltage not exceeding 440 V, and with a maximum rated current not exceeding 125 A, intended for household and similar purposes, either indoors or outdoors.</p> <p>b) To prepare standards for switches and related accessories for use in Home and Building Electronic Systems (HBES), with a working voltage not exceeding 250 V a.c. and a rated current up to and including 16 A, intended for household and similar purposes, either indoors or outdoors and to associate electronic extension units.</p> <p>c) To prepare standards for general purpose plugs and fixed and portable socketoutlets, with a rated voltage not exceeding 440 V d.c. and a rated current not exceeding 10A, intended to be used in restricted access areas where only skilled or instructed people have access.</p> <p>d) To prepare standards for general purpose boxes and enclosures for household devices, boxes and enclosures with provision for suspension means, connecting boxes and enclosures, floor boxes and enclosures, enclosures for housing protective devices and similar power consuming devices with a rated voltage not exceeding 440 V, intended for household and similar purposes, either indoors or outdoors.</p> <p>e) To prepare standards for ancillary products which relate to/incorporate products covered by a), b), c), e.g. luminaire couplers, adaptors/cable reels, indicator light units, etc.</p>			
	7	Working Groups under TC		
WG 01	Requirements and tests on EN 60669 - Parts 2			
WG 03	Boxes and enclosures for electrical accessories for household and similar fixed electrical installations			
WG 04	Cable reels			
WG 06	Luminaire Couplers			
WG 07	WG on plug and socket-outlet system for d.c.			
WG 11	EN 60669-1			
WG 12	Cord Extension Sets			

GENELEC	CLC/TC 23E		Circuit breakers and similar devices for household and similar applications	
	67 Standards	7 Projects	National delegates: 0	

Scope	<p>To prepare harmonized standards for electrical circuit breakers for overcurrent protection, devices protecting against electric shock and all related accessories. These devices are used for household and similar purposes. The word "similar" includes locations such as offices, commercial and industrial premises, hospitals, public buildings etc.</p> <p>This equipment is intended for fixed installations or for use in or with appliances or other equipment. This equipment may include electronic components.</p>			
	3	Working Groups under TC		
WG 01	Maintenance of TC23E standards			
WG 02	Self-reclosing devices (SRD)			
WG 04	Power frequency overvoltage protective device for household and similar applications (POP)			

GENELEC	CLC/SR 23G		Appliance couplers	
	18 Standards	1 Projects	National delegates: 0	

GENELEC	CLC/TC 23H Plugs, Socket-outlets and Couplers for industrial and similar applications, and for Electric Vehicles		
	27 Standards	2 Projects	National delegates: 0
Scope	<p>To prepare standards for industrial plugs, socket-outlets and couplers suitable for use in industrial, commercial, private or public locations, either indoors or outdoors.</p> <p>To prepare standards for other accessories, such as industrial cable reels among others, intended for use with industrial plugs, socket-outlets and couplers.</p> <p>To prepare standards for connection products intended for the connection of electric vehicles to the supply network and/or to dedicated supply equipment.</p> <p>The rated voltages of products covered by these standards lie within IEC 60038.</p>		
4	Working Groups under TC		
WG 1	Low voltage plugs, socket-outlets and couplers for industrial purpose, industrial cable reels, and conversion adapters for industrial use		
WG 2	Plugs, socket-outlets and couplers for electric vehicles		
WG 4	High-voltage accessories		
WG 5	Contact interface for automated connection devices (ACD)		

GENELEC	CLC/SR 23J Switches for appliances

GENELEC	CLC/SR 23K Electrical energy efficiency products		
	1 Standards	2 Projects	National delegates: 0

GENELEC	CLC/TC 213 Cable management systems		
	52 Standards	15 Projects	National delegates: 0
Scope	<p>To prepare European standardization publications for products and systems used for the management of all types of cables, information and communication lines, electrical power distribution conductors and associated accessories.</p> <p>Management includes support and/or containment and/or retention and/or protection against external influences.</p>		
13	Working Groups under TC		
WG 01	Cable trunking systems and cable ducting systems		
WG 02	Conduit systems including conduit fixing devices and liquid tight sheathing (underground conduit is excluded).		
WG 04	Conduit systems intended to be buried underground		
WG 05	Cable tray systems and cable ladder systems		
WG 06	Cable ties for electrical installations		
WG 07	Fire performances and environmental performances of cable management systems		
WG 07-01	Resistance to fire		
WG 08	Cable cleats for electrical installations		
WG 09	Cover plates and cover tapes for the protection and warning of the location of buried cables or buried conduits in underground installations		
WG 10	Powertrack systems		
WG 11	Electromagnetic characteristics of linear cable management systems		
WG 12	Articulated systems and flexible systems for cable guiding		
WG CAG	Chairman's advisory group		

1.3.20 Power Transformers & Capacitors

INSTALLATION

IEC	IEC/TC 14		Power transformers	
	51 Standards	4 Projects	National delegates: 0	
Scope	Standardization in the field of power transformers, tap-changers and reactors for use in power generation, transmission and distribution. Generally these transformers have power ratings above 1 kVA single phase and 5 kVA polyphase with a higher voltage winding of 1000 V or more, however the scope includes lower voltage transformers and regulators used in power delivery applications. Excluded: - Instrument transformers - Testing transformers - Traction transformers mounted on rolling stock - Welding transformers - Transformers for applications covered by TC 96.			
24	Working Groups under TC			
WG 32	Power transformers and reactor fittings			
PT 60076-25	Power transformers - Part 25: Neutral grounding resistors - General design requirements and test procedures			
PT 60076-57-1202	Liquid Immersed Phase Shifting Transformers			
MT 60076-1	Power transformers - Part 1: General			
MT 60076-2	Temperature rise for liquid-immersed transformers			
MT 60076-3	Power transformers - Part 3: Insulation levels, dielectric tests and external clearances in air			
MT 60076-4	Power transformers - Part 4: Guide to the lightning impulse and switching impulse testing - Power transformers and reactors			
MT 60076-5	Ability to withstand short circuit			
MT 60076-6	Reactors			
MT 60076-7	Loading guide for oil-immersed power transformers			
MT 60076-9	To revise IEC 60616			
MT 60076-14	Liquid-immersed power transformers using high-temperature insulation materials			
MT 60076-16	Transformers for wind turbine applications			
MT 60076-18	To revise IEC 60076-18			
MT 60076-19	Power transformers - Part 19: Rules for the determination of uncertainties in the measurement of losses in power transformers and reactors			
MT 60076-21	Power transformers - Part 21: Standard requirements, terminology, and test code for step-voltage regulators			
MT 60076-57-129	Power transformers - Part 57-129: HVDC converter transformers			
MT 60214	Tap changers			
JWG 7	Dimensional bushing standardization Managed by SC 36A			
AG 37	Monitoring equipment for on-line power transformer surveillance			
AG 39	Functional classification of power transformers, reactors and accessories			
ahG 40	Power transformers related to energy transition such as PV, battery storage, e-chargers and hydrogen generation			
JMT 5	Maintenance Team for revision of IEC 62199 Bushings for DC application and IEC 60137 Bushings above 1kV. Managed by SC 36A			
JAHG 8	Bushing Application Guide Managed by SC 36A			

GENELEC	CLC/TC 14		Power transformers	
	58 Standards	8 Projects	National delegates: 0	
Scope	Standardization in the field of power transformers, tap-changers and reactors for use in power generation, transmission and distribution. Generally these transformers have power ratings above 1 kVA single phase and 5 kVA polyphase with a higher voltage winding of 1 000 V or more, however the scope includes lower voltage transformers and regulators used in power delivery applications. WG CAG	Chairman's advisory group			

GENELEC	CLC/TC 215		Electrotechnical aspects of telecommunication equipment	
	54 Standards	5 Projects	National delegates: 4 	
Scope	<ul style="list-style-type: none"> - To address standardization in the field of electrotechnical aspects of telecommunication equipment and associated infrastructures and liaise with other standardization bodies as appropriate. - To prepare harmonized standards (EN, TS or TR) covering all aspects of generic and application-specific telecommunications cabling (e.g. ISDN, LAN and others) within all types of premises. - These documents also cover the requirements and recommendations for building infrastructures related to the effective installation and operation of associated telecommunication equipment by reference to the existing or forthcoming standards provided by the relevant committees or using technical inputs from them. - To provide contributions to ETSI standards (EN and/or other deliverables) in areas related to those detailed above. - To serve as a mediator in those cases where in accordance with the CENELEC-ETSI-Agreement ETSI indicates to CENELEC the need of standardization activities (EN/TS/TR or contributions to ETSI deliverables) of electrotechnical aspects related to its work. - Identification of the appropriate TC within CENELEC, thereby providing proper assignment of the technical work to the responsible group of experts. - Where an appropriate TC within CENELEC cannot be identified, TC 215 may decide to establish a Working Group to resolve a specific task. - To review international standardization results of ISO/IEC JTC 1 as far as telecommunication equipment with respect to Customer Premises Cabling and Energy Efficient Data Centres are concerned. This includes coordination of harmonization and assignment to the responsible organisation in close cooperation with CEN bearing in mind JTC 1 being a joint ISO/IEC-Committee. 			
3	Working Groups under TC			
WG 01	Cabling design			
WG 02	Cabling installation - Quality assurance and installation practices			
WG 03	Facilities and infrastructures

1.4 Completion & Finishing

1.4.1	Wood & Timber	110
1.4.2	Gypsum.....	111
1.4.3	Coatings.....	112
1.4.4	Sealing.....	113
1.4.5	Sealant.....	113
1.4.6	Roof	114
1.4.7	Doors & Windows.....	114
1.4.8	Glass in Building	115
1.4.9	Paints & Varnishes	116
1.4.10	Wallcoverings.....	116
1.4.11	Ceramic Tiles	117
1.4.12	Ceilings	117
1.4.13	Floor Coverings.....	118
1.4.14	Floor Screeds.....	118
1.4.15	Surfaces for Sports Areas	118

COMPLETION & FINISHING

1.4.1 Wood & Timber

	ISO/TC 89		Wood-based panels	
	44 Standards	4 Projects	National delegates: 0	
Scope	Standardization in the field of panels such as fibreboards, particle boards and plywood based on lignocellulosic materials (derived from wood or other materials) including terminology, classification, dimensions, test methods and quality requirements.			
1	Working Groups under TC			
WG 5	Test methods			
3	Sub-Committees			
SC 1	Fibre boards [STANDBY]			
SC 2	Particle boards [STANDBY]			
SC 3	Plywood			

	CEN/TC 112		Wood-based panels	
	69 Standards	7 Projects	National delegates: 0	
Scope	Preparation of standards for wood-based panels and panels of other lignocellulosic materials covering: <ul style="list-style-type: none"> - terminology; - classification; - requirements; - product specifications; - methods of tests. 			
8	Working Groups under TC			
WG 2	Plywood			
WG 4	Test methods			
WG 5	Regulated dangerous substances			
WG 7	Semi-finished and finished products			
WG 8	Oriented strand boards (OSB)			
WG 9	Solid wood panels			
WG 11	Particleboards and fibreboards			
WG 13	Mandate			

	CEN/TC 38		Durability of wood and wood-based products	
	56 Standards	20 Projects	National delegates: 0	
Scope	Standardization of natural or conferred durability of wood and wood-based products against biological agents and their characteristics associated with exposure.			
8	Working Groups under TC			
WG 21	Durability - Classification (Use classes-natural durability)			
WG 22	Performance - Assessment and specifications (treated wood - Wood preservatives)			
WG 23	Fungal testing (basidiomycetes-microfungi)			
WG 24	Insect testing - (beetles - termites)			
WG 25	External Factors and Preconditioning			
WG 26	Physical/chemical factors (analytical methods)			
WG 27	Exposure Aspects			
WG 28	Performance classification			

	ISO/TC 218		Timber	
	60 Standards	5 Projects	National delegates: 0	
Scope	Standardization of round, sawn and processed timber, and timber materials in and for use in all applications, including terminology, specifications and test methods. Excluded: - those applications of timber as covered by ISO/ TC 165 "Timber structures".			
7	Working Groups under TC			
WG 1	Terminology			
WG 2	Round timber			
WG 3	Sawn and processed timber			
WG 4	Test methods			
WG 5	Parquet and wood flooring			
WG 6	Wooden products			
WG 7	Wood residue and post consumer wood			

	CEN/TC 175		Round and sawn timber	
	64 Standards	18 Projects	National delegates: 0	
Scope	Standardization of round and sawn timber in all uses, including timber prefabricated products and excluding structural aspects.			
10	Working Groups under TC			
WG 1	General matters, definitions, measurement methods			
WG 2	Sawn timber			
WG 4	Round timber			
WG 5	Environmental topics			
WG 32	Specific user requirements - Timber in joinery			
WG 33	Specific user requirements - Timber in flooring			
WG 34	Specific user requirements - Timber in packaging and pallets, and other timber products			
WG 37	Specific user requirements - Timber in stairs			
WG 38	Specific user requirements - Timber in cladding and panelling			
WG 39	Specific user requirements - Fire retardant treated wood			

1.4.2 Gypsum

	CEN/TC 241		Gypsum and gypsum based products	
	27 Standards	1 Projects	National delegates: 0	
Scope	To prepare European standards for gypsum plasterboard, gypsum plasters, gypsum units, gypsum based and ancillary products as well as for design and application of the products: definitions, performance requirements, specifications & test methods.			
3	Working Groups under TC			
WG 1	Powders			
WG 3	Board products			
WG 5	Framework and coordination			

COMPLETION & FINISHING

1.4.3 Coatings

	ISO/TC 107		Metallic and other inorganic coatings	
	162 Standards	8 Projects	National delegates:	2
Scope	<ul style="list-style-type: none"> - Standardization of the characteristics of protective and decorative metallic coating applied by electrolysis, fusion, vacuum or chemical means, mechanical deposition, ion plating. - Standardization of the characteristics of protective and decorative non-metallic coatings (excluding paints and other organic coatings) on metal surface applied by electrolysis, fusion, vacuum or chemical means. - Standardization of testing and inspection methods for such coatings. - Standardization of the preparation of the substrates prior to the deposition of metallic and inorganic coatings. 			
5	Working Groups under TC			
CAG	Chairman advisory group			
JWG 4	Joint ISO/TC 107 - ISO/TC 35/SC 9 WG: Thickness measurement methods for coatings, paints and varnishes			
WG 1	Thermal spraying			
WG 2	Vitreous and porcelain enamel coatings			
WG 5	Atomic layer deposition			
5	Sub-Committees			
SC 3	Electrodeposited coatings and related finishes			
SC 4	Hot dip coatings (galvanized, etc.)			
SC 7	Corrosion tests			
SC 8	Chemical conversion coatings			
SC 9	Physical vapor deposition coatings			

	CEN/TC 262		Metallic and other inorganic coatings, including for corrosion protection and corrosion testing of metals and alloys	
	162 Standards	10 Projects	National delegates:	0
Scope	Standardization in the field of metallic and other inorganic coatings, for corrosion protection of metals and for decorative and engineering purposes.			
5	Working Groups under TC			
WG 2	Hot dip galvanized coatings			
WG 5	Vitreous enamel coatings			
WG 12	Maintenance and ISO co-ordination			
WG 13	Coating qualification tests			
WG 14	Guidelines and specifications for electrodeposited coatings of zinc or cadmium (including supplementary treatments) on iron or steel			

	CEN/TC 240		Thermal spraying and thermally sprayed coatings	
	40 Standards	5 Projects	National delegates:	0
Scope	Standardization of definitions, acceptance test and quality control for thermal spraying equipment, specifications for spraying materials and sprayed coatings, including technical requirements, health and safety aspects, testing and testing procedures, basic rules for training and minimum requirements for operators.			

1.4.4 Sealing

	CEN/TC 361	Polymer modified bituminous thick coatings for waterproofing - Definitions/requirements and test methods		
	9 Standards	0 Projects	National delegates: 0	
	CEN/TC 254	Flexible sheets for waterproofing		
	66 Standards	8 Projects	National delegates: 1	
Scope	Preparation of European Standards on factory made flexible sheets for waterproofing for use in building construction and civil engineering.			
7	Working Groups under TC			
WG 1	Coordination			
WG 3	Material properties relevant to wind uplift resistance			
WG 6	Bridge deck waterproofing			
WG 9	Underlays for discontinuous roof coverings			
WG 10	Ageing			
WG 15	PCR			
WG 16	Extrapolation rules for resistance to root penetration			
2	Sub-Committees			
SC 1	Bitumen sheeting			
SC 2	Synthetic sheets			

1.4.5 Sealant

	ISO/TC 59/SC 8	Sealants		
	38 Standards	2 Projects	National delegates: 0	
Scope	Standardization in the field of buildings and civil engineering regarding: <ul style="list-style-type: none"> - general terminology; - test methods; - performance specifications; and - technical reports related to functional and user requirements of flexible sealing materials. Exclusion: Cementitious/mineral material (e.g., grouts)			
2	Working Groups under TC			
WG 5	Determination of higher movement capability			
WG 10	Aesthetic issues			

	CEN/TC 349	Sealants for joints in building construction		
	10 Standards	5 Projects	National delegates: 0	
Scope	European standardization on sealants for joints in building construction, by the preparation of European standards for their diverse applications.			
1	Working Groups under TC			
WG 2	Sealants for glazing			

	CEN/SS B02	Structures		
	16 Standards	1 Projects	National delegates: 0	

1.4.6 Roof

	CEN/TC 128 Roof covering products for discontinuous laying and products for wall cladding		
	43 Standards	22 Projects	National delegates: 2
Scope	Standardization in the area of general and specific requirements and test methods for roof covering products for discontinuous laying and products for wall cladding, including anchor devices intended to prevent persons from falling and/or to arrest falls, used in and on buildings and civil engineering works.		
3	Working Groups under TC		
WG 1	Mandates - Preparation		
WG 2	Pre-consideration Working Group		
WG 3	Renewable energy systems for roofs		
10	Sub-Committees		
SC 1	General requirements for roofing products - Types and scope of tests		
SC 2	Concrete roofing tiles		
SC 3	Clay roofing tiles		
SC 4	Fibre-cement products for roofing		
SC 6	Bitumen shingles and corrugated sheets for roofing		
SC 7	Roofing products from metal sheet		
SC 8	Slate and stone products for roofing		
SC 9	Prefabricated accessories for roofing		
SC 10	Gutters		
SC 11	Double skin metal faced insulating sandwich panels for roofing and cladding		

1.4.7 Doors & Windows

	ISO/TC 162 Doors, windows and curtain walling		
	22 Standards	1 Projects	National delegates: 0
Scope	Standardization in the field of doors, doorsets, windows, and curtain wall including hardware, manufactured from any suitable material covering the specific performance requirements, terminology, manufacturing sizes and dimensions, and methods of test. Excluded: The responsibility for dimensional coordination with other parts of buildings and general performance requirements derived from buildings as a whole, which devolves upon ISO/TC 59.		
3	Working Groups under TC		
WG 3	Terminology		
WG 4	Windows and doors		
WG 5	Curtain walling		

	CEN/TC 33 Doors, windows, shutters, building hardware and curtain walling		
	158 Standards	28 Projects	National delegates: 0
Scope	Definition of functions of doors, windows, shutters, building hardware, and curtain walls and performance levels and classification associated with these functions which characterize the usage including the ability to meet the essential requirements (of the Construction Products Directive), tests requirements and, if necessary, the essential dimensions, terminology, symbols, packaging, marking and labelling.		
7	Working Groups under TC		
WG 1	Windows and doors		
WG 3	Blinds and shutters		
WG 4	Building hardware		
WG 5	Industrial, commercial and garage doors and gates		
WG 6	Curtain walling		
WG 7	Burglary resistance		
WG 9	Powered Pedestrian Doors (PPD)		

1.4.8 Glass in Building

	ISO/TC 160		
	Glass in building		
	57 Standards	13 Projects	National delegates: 0
Scope	Standardization in the field of glass in building, including terminology, performance requirements and methods of calculation and test, design and construction rules, classification and specification of materials, including dimensional properties.		
11	Working Groups under TC		
CAG	Chair's Advisory Group		
WG 1	Basic glass products		
WG 2	Toughened glass		
WG 3	Laminated glass		
WG 4	Insulating glass units		
WG 5	Assembly rules and structural sealant glazing		
WG 6	Safety glazing tests		
WG 7	Airborne sound insulation of glazing		
WG 8	Light and energy transmission properties and thermal properties of glazing		
WG 9	Glass in building - Building integrated photovoltaics		
WG 10	Vacuum glass		
1	Sub-Committees		
SC 1	Product considerations		

	CEN/TC 129		
	Glass in building		
	85 Standards	14 Projects	National delegates: 0
Scope	Standardization in the field of glass used in building including: <ul style="list-style-type: none"> - definitions of all types of glass products, basic and processed; - definition of characteristics; - test methods for measurement of characteristics; - calculation methods for characteristics; - requirements e.g. durability; - classifications e.g. anti-bandit glazing; - glazing methods. 		
18	Working Groups under TC		
WG 1	Basic glass products		
WG 2	Toughened, heat strengthened and enamelled glass		
WG 3	Laminated glass		
WG 4	Insulating glass units		
WG 5	Coated glass for mirrors		
WG 6	Coated glass for windows		
WG 8	Mechanical strength		
WG 9	Light and energy transmission, thermal insulation		
WG 10	Sound insulating glazed assemblies		
WG 11	Fire resistant glazed assemblies		
WG 12	Glass in building - Assembly rules		
WG 14	Security		
WG 16	Bonded glazing		
WG 17	Management		
WG 18	Filmed glass		
WG 19	Acid etched glass and sand blasted glass		
WG 20	Health, Hygiene, Environment and Sustainability		
WG 21	Digital communication of glass in building characteristics		

1.4.9 Paints & Varnishes

	ISO/TC 35		Paints and varnishes	
	293 Standards	33 Projects	National delegates:	1
Scope	Standardization in the field of paints, varnishes and related products, including raw materials.			
4	Working Groups under TC			
CAG	Chairman's advisory group			
JWG 6	Joint ISO/TC 35 - ISO/TC 67 WG: Competency requirements of coating inspectors and applicators			
WG 4	Binders for paints and varnishes			
WG 5	Naval stores			
5	Sub-Committees			
SC 9	General test methods for paints and varnishes			
SC 12	Preparation of steel substrates before application of paints and related products			
SC 14	Protective paint systems for steel structures			
SC 15	Protective coatings: concrete surface preparation and coating application			
SC 16	Chemical analysis			

	CEN/TC 139		Paints and varnishes	
	340 Standards	33 Projects	National delegates:	0
Scope	Standardization in the field of paints, varnishes and related products. Establishment of methods of test and requirements for coating materials and coatings. Definition of terms.			
5	Working Groups under TC			
WG 1	Interior wall and facade coatings			
WG 2	Coating systems for wood			
WG 9	Testing of coil coated metals			
WG 10	Microbiology and leaching of substances			
WG 13	Reactive coatings for fire protection			

1.4.10 Wallcoverings

	CEN/TC 99		Wallcoverings	
	11 Standards	0 Projects	National delegates:	0
Scope	To elaborate ENs for wallcoverings in the sense that the term "wallcoverings" is used to cover all forms of flexible webs supplied in roll form for hanging onto walls or ceilings by means of an adhesive; it includes "finished wallcoverings", "wallcoverings for subsequent decoration", "heavy duty wallcoverings" and "textile wallcoverings" and cork wallcoverings in roll and panel form.			

1.4.11 Ceramic Tiles

	ISO/TC 189		Ceramic tile	
	34 Standards	3 Projects	National delegates: 0	
Scope	Standardization of ceramic tiles generally used for floor coverings and wall facings.			
10	Working Groups under TC			
WG 1	Test methods			
WG 2	Product specifications			
WG 3	Products for installation			
WG 4	Thin Tiles			
WG 6	Installation methods			
WG 7	Sustainability issues for ceramic tiling systems			
WG 8	Antimicrobial properties of ceramic tile surfaces			
WG 9	Low modulus adhesives for exterior tile finishing			
WG 10	Slip Resistance Measurement for Ceramic Tile			
WG 11	Uncoupling membranes for ceramic tile installation			

	CEN/TC 67		Ceramic tiles	
	27 Standards	8 Projects	National delegates: 0	
Scope	To establish European Standards concerning terminology, technical characteristics, dimensional characteristics and tolerances, test and control methods, design and installation of ceramic tiles.			
4	Working Groups under TC			
WG 1	Test methods			
WG 2	Specifications			
WG 3	Products for installation of ceramic tiles			
WG 5	Product category rules for ceramic tiles and installation products for ceramic tiling			

1.4.12 Ceilings

	CEN/TC 277		Suspended ceilings	
	1 Standards	0 Projects	National delegates: 0	
Scope	To establish EN's on suspended ceilings for building and civil engineering works covering items such as terminology, fire, acoustics, thermal performances and also specifications for installations and application. To coordinate the outgoing work in relation to suspended ceilings in other functional and material related TC's.			

	CEN/TC 357		Stretched ceilings	
	1 Standards	0 Projects	National delegates: 0	

1.4.13 Floor Coverings

	ISO/TC 219 Floor coverings		
	85 Standards	3 Projects	National delegates: 0
Scope	Standardization in the field of textile, resilient and laminate floor coverings. Excluded: wood, ceramic, terrazzo, concrete and raised access type floorings.		
4	Working Groups under TC		
WG 1	Textile floor coverings		
WG 2	Resilient floor coverings		
WG 3	Laminate floor coverings		
WG 4	Horizontal topics		

	CEN/TC 134 Resilient, textile, laminate and modular mechanical locked floor coverings		
	101 Standards	16 Projects	National delegates: 0
Scope	Standardization of definitions, requirements, classification and test methods, and development of guidance documents and reports for resilient, textile, laminate and modular mechanical locked floor coverings. The main use areas for floor coverings within the scope of CEN/TC 134 are residential (homes, apartments) and commercial, (health care, education, hospitality, public buildings, offices, retail, transportation). These areas are limited to indoor use. Excluded are screeds, raised access floors, paving, surfaces for sports areas, as well as parquet, wood veneer and bamboo floorings.		
5	Working Groups under TC		
WG 7	Resilient floor coverings		
WG 8	Textile floor coverings		
WG 9	Laminate floor coverings		
WG 10	Harmonization		
WG 11	Modular mechanical locked floor coverings (MMF)		

1.4.14 Floor Screeds

	CEN/TC 303 Floor screeds and screed materials		
	13 Standards	1 Projects	National delegates: 0
Scope	Standardization of floor screeds and screed materials for floorings in buildings and civil engineering works.		
2	Working Groups under TC		
WG 1	Terminology and properties		
WG 2	Test methods		

1.4.15 Surfaces for Sports Areas

	CEN/TC 217 Surfaces for sports areas		
	50 Standards	6 Projects	National delegates: 0
Scope	This European Standard specifies a method for the determination of the slip resistance of a sports surface in relation to a studded or smooth soled sports shoe.		
3	Working Groups under TC		
WG 2	Surfaces of sports halls		
WG 6	Synthetic surfaces primarily used outdoor		
WG 11	Test methods for sports surfaces.		

1.5

SAFETY, MACHINERY & EQUIPMENT

SAFETY ON CONSTRUCTION SITES

SAFETY IN USE OF EQUIPMENT AND MACHINERY

DESIGN AND USE OF MATERIALS AND MACHINERY

...

1.5 Safety, Machinery & Equipment

1.5.1	Personal Protective Equipment	122
1.5.2	Tools	124
1.5.3	Work at Height	125
1.5.4	Cranes	126
1.5.5	Machinery	127
1.5.6	Mechanical Vibration & Shock.....	129
1.5.7	Chains, Ropes, Webbing, Slings & Accessories.....	129
1.5.8	Aerial Ropeways, Funicular Ropeways & Surface Lifts	130
1.5.9	Live Working	131
1.5.10	Measuring Equipment for Electrical & Electromagnetic Quantities.....	132
1.5.11	Temporary Works Equipment.....	133

1.5.1 Personal Protective Equipment

	ISO/TC 94		Personal safety -- Personal protective equipment	
	198 Standards	56 Projects	National delegates: 1	
Scope	Standardization of the performance of personal protective equipment designed to safeguard wearers against all known possible hazards.			
3	Working Groups under TC			
CAG	Chairman advisory group			
WG 1	Compatibility of PPE items			
WG 2	Head protection			
5	Sub-Committees			
SC 3	Foot protection			
SC 6	Eye and face protection			
SC 13	Protective clothing			
SC 14	Firefighters' personal equipment			
SC 15	Respiratory protective devices			

	CEN/TC 158		Head protection	
	31 Standards	15 Projects	National delegates: 0	
Scope	To prepare European standards for all types of protective helmets.			
7	Working Groups under TC			
WG 1	Industrial safety helmets			
WG 3	Firefighters helmets			
WG 4	Helmets for cyclists			
WG 5	Helmets for horse riders			
WG 11	Headforms and test methods			
WG 13	Helmets for mountaineers			
WG 15	Helmets for S-EPAC users			

	CEN/TC 159		Hearing protectors	
	15 Standards	9 Projects	National delegates: 0	
Scope	To prepare European standards related to personal hearing protective equipment to be used when sound exposure is expected to be hazardous to the ear including fit testing systems for determination of the individual hearing protection performance.			
3	Working Groups under TC			
WG 2	Electronic and amplitude-sensitive hearing protectors			
WG 5	Hearing protectors - Selection and use			
WG 6	Hearing protectors - General requirements and test methods			

	CEN/TC 160 Protection against falls from height including working belts		
	23 Standards	10 Projects	National delegates: 3 
Scope	Standardization of requirements for personal protective equipment against falls (systems, subsystems and components), working belts and accessories including definitions of terms and establishment of test methods.		
5	Working Groups under TC		
WG 1	General requirements		
WG 2	Personal fall arresting systems, components and systems		
WG 3	Personal equipment for work positioning and/or prevention of falls from a height		
WG 5	Rescue equipment		
WG 6	Definitions		

	CEN/TC 161 Foot and leg protectors		
	21 Standards	7 Projects	National delegates: 0
Scope	To prepare European standards in the field of protective footwear and leg protectors. Note: leg protectors are defined as an extension of protective footwear.		
2	Working Groups under TC		
WG 1	PPE footwear - Test methods		
WG 2	PPE footwear - Requirements		

	CEN/TC 162 Protective clothing including hand and arm protection and lifejackets		
	158 Standards	48 Projects	National delegates: 2 
Scope	To prepare European Standards (requirements and testing) in the field of clothing to protect against physical and chemical hazards. Hand and arm protectors are included as well as high visibility clothing and clothing against drowning (e.g. lifejackets).		
13	Working Groups under TC		
WG 1	General requirements for protective clothing		
WG 2	Resistance to heat and fire of protective clothing		
WG 3	Protective clothing against chemicals, infective agents and radioactive contamination		
WG 4	Protective clothing against foul weather, wind and cold		
WG 5	Resistance to mechanical impact of protective clothing		
WG 6	Lifejackets		
WG 7	Visibility clothing and accessories		
WG 8	Protective gloves		
WG 9	Motorcycle rider protective clothing		
WG 10	Buoyant aids for swimming instruction		
WG 11	Body protection for sports		
WG 12	Diving suits		
WG 13	Joint Working Group between CEN/TC 162 and CEN/TC 161 - Test methods for permeation of chemicals through materials for protective footwear, gloves and clothing		

1.5.2 Tools

	IEC/TC 116 Safety of motor-operated electric tools		
	154 Standards	24 Projects	National delegates: 0
Scope	To prepare international safety standards for electric motor-operated hand-held tools, transportable tools and lawn and garden machinery.		
6	Working Groups under TC		
WG 7	Electric motor-operated hand-held transportable tools and lawn garden machinery - Safety - Part 1: General Requirements		
WG 8	Electric motor-operated hand-held tools		
WG 9	Electric motor-operated transportable tools		
WG 10	Electric motor-operated lawn and garden machinery		
WG 11	Dust measurement for electric motor-operated tools		
JWG 12	Electric motor-operated hand-held tools, transportable tools and lawn and garden machinery – Safety – Part 4-X linked to ISO/TC 23/SC 13		

	CLC/TC 116 Safety and environmental aspects of motor-operated electric tools		
	145 Standards	45 Projects	National delegates: 0
Scope	To prepare European safety and environmental aspects standards for electric motor-operated hand-held and transportable tools and lawn and garden machinery.		
4	Working Groups under TC		
WG 02	Electric motor-operated hand-held and transportable tools		
WG 04	Dust		
WG 05	Electric motor-operated lawn and garden machinery		
WG 06	Environmental aspects of motor-operated electric tools		

	CEN/TC 213 Cartridge operated hand-held tools – Safety		
	1 Standards	1 Projects	National delegates: 0
Scope	Standardization in the field of hand-held machines, using propulsive charges. Priority should be given to the development of a standard for safety requirements for the design, construction and use of cartridge operated fixing tools (system consisting of tool, fastener and cartridge, functioning as an integral whole). Safety standards relating to the fastening point made with the cartridge operated fixing systems are not included in the scope. Safety standards for other cartridge operated, hand-held machines must be investigated.		
1	Working Groups under TC		
WG 1	Cartridge Operated Fixing and Hard Marking tools		

	CEN/TC 255 Hand-held, non-electric power tools – Safety		
	15 Standards	1 Projects	National delegates: 0
Scope	<ol style="list-style-type: none"> 1) Standardization in the field of safety of non-electric hand-held power tools (including their use when mounted in fixtures) which can be both in one generic standard for aspects common to several types of tools, and standards for specific types of tools; 2) Coordination with CLC/TC 61F, CEN/TCs 65, 142, 144, 213, 151, 196 etc. for the purpose of ensuring the highest possible consistency in common safety measures; 3) Utilization of the work carried out in PNEUROP and other European Sector Committees or organizations; 4) Consideration of how B1-Standards for eg. the measurement of noise and vibration, and dust suppression, should be achieved in the field of responsibility and with the aid of the CEN committees established for the purpose; 5) Standardization of vocabulary, symbols, and pictograms related to safety of hand-held tools. 		

	CEN/SS 109		Small tools	
	8 Standards	0 Projects	National delegates:	0

1.5.3 Work at Height

	ISO/TC 214		Elevating work platforms	
	9 Standards	2 Projects	National delegates:	0
Scope	Standardization of terminology, ratings, general principles (technical performance requirements and risk assessment), safety requirements, test methods, maintenance and operation for elevating work platforms used to raise (elevate) and position personnel (and related work tools and materials) to a work position where a work task is to be performed.			
1	Working Groups under TC			
WG 1	Mobile elevating work platforms			

	CEN/TC 98		Lifting platforms	
	12 Standards	4 Projects	National delegates:	2 
Scope	Preparation of basic calculation and stability criteria, matters of construction, safety, testing and inspection of lifting platforms.			
8	Working Groups under TC			
WG 1	Mobile elevating work platforms			
WG 2	Lifting tables			
WG 3	Vehicle lifting devices			
WG 4	Tail lifts			
WG 5	Dock levellers			
WG 6	Jacks			
WG 7	Suspended access equipment			
WG 9	Mechanical Parking Devices			

	CEN/TC 93		Ladders	
	8 Standards	7 Projects	National delegates:	0
Scope	Standardization of portable ladders designed for general professional and non-professional use, attic stairs/loft ladders and ladders designed for specific professional use which are not covered by the scope of other Technical Committees.			
8	Working Groups under TC			
WG 1	Step stools			
WG 2	Single and multiple hinge-joint ladders			
WG 3	User information			
WG 7	Accessories			
WG 9	Loft ladders			
WG 10	EN 131-1 and EN 131-2			
WG 12	Telescopic ladders			
WG 13	Ladders with separate platform			

1.5.4 Cranes

	ISO/TC 96		Cranes	
	107 Standards	13 Projects	National delegates: 0	
Scope	Standardization in the field of cranes and related equipment which suspend loads by means of a load-handling device, particularly in respect of terminology, load rating, testing, safety, general design principles, maintenance, operation and load lifting attachments.			
2	Working Groups under TC			
AHG 1	Cranes and lifting appliances - Classification			
WG 3	Telematics			
9	Sub-Committees			
SC 2	Terminology			
SC 3	Selection of ropes			
SC 4	Test methods			
SC 5	Use, operation and maintenance			
SC 6	Mobile cranes			
SC 7	Tower cranes			
SC 8	Jib cranes			
SC 9	Bridge and gantry cranes			
SC 10	Design principles and requirements			

	CEN/TC 147		Cranes - Safety	
	33 Standards	17 Projects	National delegates: 2	
Scope	<p>Development and maintenance of safety standards for the design, manufacture and information to be provided for the following products:</p> <ol style="list-style-type: none"> 1. cranes (as defined in CEN/TC 147 Resolution 99); 2. equipment for the lifting of persons on/with certain cranes; 3. power driven winches and hoists, and their supporting structures; 4. hand-powered lifting machines; 5. non-fixed load lifting attachments; 6. manually controlled load manipulating devices. <p>Exceptions are:</p> <ul style="list-style-type: none"> - hoisting devices for gymnastic and playing field equipment; - robotic lifting machinery; - lifting attachments for the glass industry; - lifting machinery and attachments for medical use; - excavators used as cranes; - cable cranes. 			
11	Working Groups under TC			
WG 2	Design - General			
WG 3	Design - Requirements for equipment			
WG 11	Mobiles cranes			
WG 12	Tower cranes			
WG 14	Bridge and gantry cranes			
WG 15	Offshore cranes			
WG 17	Power driven winches and hoists			
WG 18	Loader cranes

WG 22	Manually controlled load manipulating devices			

1.5.5 Machinery

	ISO/TC 127		
	Earth-moving machinery		
	177 Standards	12 Projects	National delegates: 0
Scope	Standardization of nomenclature, use classification, ratings, technical requirements and test methods, safety requirements, operation, maintenance manual format for earth-moving and related machinery.		
5	Working Groups under TC		
AHG 3	Investigation regarding the differences between block handlers and wheel loaders		
CAG	Chair's Advisory Group		
SG 1	ISO Off-Road Mobile Work Machine		
WG 8	Sustainability		
WG 17	Rechargeable Energy Storage System (RESS) application for EMM (ISO 5757)		
4	Sub-Committees		
SC 1	Test methods relating to safety and machine performance		
SC 2	Safety, ergonomics and general requirements		
SC 3	Machine characteristics, electrical and electronic systems, operation and maintenance		
SC 4	Terminology, commercial nomenclature, classification and ratings		

	ISO/TC 110		
	Industrial trucks		
	84 Standards	19 Projects	National delegates: 0
Scope	Standardization in the field of power-operated industrial trucks, hand-operated industrial trucks (including sack trucks, hand carts, trailers), all types of wheels and castors excluding those with pneumatic tyres and rubber solid tyres for pneumatic tyre rims, comprising : - terminology and definitions; - safety requirements related to: design and construction; testing and inspection methods; operation and maintenance; - principal dimensions to facilitate interchangeability where essential to the interest of users and manufacturers. - Energy efficiency and other sustainability aspects Excluded: vehicles designed primarily for earth-moving or road transport.		
4	Sub-Committees		
SC 1	General terminology		
SC 2	Safety of powered industrial trucks		
SC 4	Rough-terrain trucks		
SC 5	Sustainability		

	ISO/TC 199		
	Safety of machinery		
	45 Standards	6 Projects	National delegates: 1 
Scope	Standardization of basic concepts and general principles for safety of machinery incorporating terminology, methodology, guards and safety devices within the framework of ISO/IEC Guide 51 and in cooperation with other ISO and IEC technical committees. Excluded: product safety standards, as defined in ISO/IEC Guide 51, and which are explicitly covered by the work of other ISO or IEC technical committees.		
8	Working Groups under TC		
WG 3	Safety of integrated manufacturing systems		
WG 5	General principles for the design of machinery and risk assessment		
WG 6	Safety distances and ergonomic aspects		
WG 7	Interlocking devices		
WG 8	Safe Control Systems		
WG 10	Fire prevention and protection		
WG 11	Permanent means of access to machinery		
WG 12	Human-machine-interactions		

	ISO/TC 195 Building construction machinery and equipment		
	38 Standards	19 Projects	National delegates: 0
Scope	<p>Standardization in the field of Machines and equipment used on construction sites, including:</p> <ul style="list-style-type: none"> - concrete machines (e.g. batcher, mixer, pump, sprayer, transport, vibrator, floating) - foundation machines (e.g. piling, diaphragm walling, earth boring, jetting, grouting, drill rigs for soil and rock mixture) - aggregate processing machines (e.g. screening, crushing) - road construction and maintenance machines and equipment - tunnel boring machines (TBMs) and associated machines and equipment [e.g. shielded tunnel boring machines, unshielded tunnel boring machines, telescopic shield machines, reaming machines, micro-tunneling machines, thrust boring machines, auger boring machines except for those used in mining], air locks, rescue chambers for TBMs, tunnel boring multi-service vehicles (MSVs)] - scaffolds - machines and plants for production and processing of building materials, including tooling of natural stone, manufacture of fine, heavy clay and refractory ceramics, production, treatment and processing of flat, hollow and special glass - machines and equipment for processing building materials on-site - road operation machinery and equipment, and associated services, concerning nomenclature, application, classification, ratings, technical requirements, test methods, safety requirements <p>Excluded:</p> <ul style="list-style-type: none"> - equipment for the extraction of solid mineral substances [e.g. road headers, continuous miners, rock drill rigs, raise boring machines, high wall miners, LHDs, mining auger boring machines, RMDSS (rapid mine development systems) (ISO/TC 82)]; - cranes (ISO/TC 96); - earth-moving machinery (ISO/TC 127); - elevating work platforms (ISO/TC 214); - building and civil engineering works (ISO/TC 59). 		
5	Working Groups under TC		
AG 1	Advisory group		
WG 2	Terminology		
WG 5	Road construction and maintenance equipment - Terminology and commercial specifications		
WG 6	Hand-held machinery and equipment		
WG 9	Safety of mobile road construction machinery		
3	Sub-Committees		
SC 1	Machinery and equipment for concrete work		
SC 2	Road operation machinery and associated equipment		
SC 3	Drilling and foundation machinery and equipment		

	CEN/TC 151 Construction equipment and building material machines - Safety		
	108 Standards	30 Projects	National delegates: 0
Scope	<p>Standardization in the field of safety of machines and equipment used on construction sites, for winter service and highway maintenance as well as for the production and processing of mineral building materials. In exceptional cases glass machinery used outside the building material sector (e.g. laboratory glass machinery) is included.</p> <p>Excluded are:</p> <ul style="list-style-type: none"> - Mining machinery and equipment (e.g. road headers, rock drill rigs, raise boring machines, shaft boring machines, load haul dump (LHD)), (covered by CEN/TC 196); - Cranes (covered by CEN/TC 147); - Elevating work platforms (covered by CEN/TC 98); - Building hoists (covered by CEN/TC 10/SC 1); - Industrial trucks (covered by CEN/TC 150). 		
12	Working Groups under TC		
WG 1	Earth-moving machinery - Safety		
WG 3	Drilling and foundation equipment		
WG 4	Tunnel boring machines (TBM) and associated machines and equipment - safety		
WG 5	Road construction machines - Safety		

WG 6	Machines and equipment to process building materials (portable, hand-guided, support-mounted, on rails or self-propelled) - Safety
WG 8	Concrete preparation and handling equipment - Safety
WG 9	Machines and plants for the production of cement, lime, and gypsum, including crushing, screening, sizing and recycling - Safety
WG 11	Machines and plants for mining and tooling of natural stone - Safety
WG 13	Machines and plants for the production, treatment and processing of flat glass - Safety
WG 15	Electromagnetic compatibility
WG 16	Road operation machinery - Safety requirements
WG 18	Machines and plants for the production, treatment and processing of hollow and special glass - Safety

1.5.6 Mechanical Vibration & Shock

	CEN/TC 231 Mechanical vibration and shock		
	46 Standards	1 Projects	National delegates: 1
Scope	<p>Standardization in the field of mechanical vibration and shock, including:</p> <ul style="list-style-type: none"> - methods for measuring and evaluating mechanical vibration and shock; - methods for assessing human exposure to mechanical vibration and shock in any kind of environment; - description of the effects caused by human exposure to mechanical vibration and shock and guidelines for the reduction of these effects; - methods for evaluating the effects of mechanical vibration and shock on structures; - methods for reducing by machine design, risks resulting from exposure to mechanical vibration and shock; - methods for measuring and assessing the vibration and shock reduction characteristics of personal protective equipment (e.g. antivibration gloves), vibration isolators (e.g. resilient materials) and suspension systems (e.g. seats). 		
1	Working Groups under TC		
WG 2	Hand-arm vibration		

1.5.7 Chains, Ropes, Webbing, Slings & Accessories

	ISO/TC 111 Round steel link chains, chain slings, components and accessories		
	21 Standards	0 Projects	National delegates: 0
Scope	<p>Standardization in the field of:</p> <ul style="list-style-type: none"> - round steel link chains (excluding anchor chains and those used in mining); - sling hooks; - shackles, eyebolts, terminal links, joining links and terminal fittings for slings and other accessories. <p>To deal with the following aspects of the above- mentioned items: terminology, material, dimensions and tolerances, basic design criteria, proof testing, working load, destructive and non-destructive tests relating to required mechanical properties, inspection, certification and marking.</p> <p>Excluded:</p> <ul style="list-style-type: none"> - anchor chains covered by ISO/TC 8; - mining chains covered by ISO/TC 82. 		
2	Sub-Committees		
SC 1	Chains and chain slings		
SC 3	Components and accessories		

	CEN/TC 168		Chains, ropes, webbing, slings and accessories - Safety	
	48 Standards	4 Projects	National delegates:	2 
Scope	Standardization in terms of safety of: (i) welded round steel link chains and chain slings; (ii) steel wire ropes, their terminations and wire rope slings; (iii) fibre ropes, fibre rope slings, flat textile slings and round slings; (iv) hooks and other accessories; used for lifting (lifting includes: raising, lowering and suspending) purposes.			
5	Working Groups under TC			
WG 1	Welded round steel link chains and chain slings			
WG 2	Steel wire ropes, their terminations and wire rope slings			
WG 3	Fibre ropes, fibre rope slings, flat textile slings and round slings			
WG 4	Hooks and other accessories			
WG 6	Load restraint assemblies			

1.5.8 Aerial Ropeways, Funicular Ropeways & Surface Lifts

	CEN/TC 242		Safety requirements for passenger transportation by rope	
	19 Standards	3 Projects	National delegates:	0
Scope	Safety standards for the construction and operation of aerial ropeways, funicular ropeways and surface lifts for passenger transportation.			
13	Working Groups under TC			
WG 1	Terminology			
WG 2	General requirements and calculations			
WG 3	Ropes			
WG 4	Tensioning devices and mechanical systems			
WG 5	Carriers			
WG 6	Electrical installations			
WG 8	Tests, maintenance, inspection			
WG 9	Recovery and evacuation			
WG 10	Operation			
WG 13	Safety of travelators for tourist or sporting use, used to transport passengers mainly in ski areas			
WG 14	Prevention and fight against fire			
WG 15	Workers safety			
WG 16	Freight cableway installation with restricted passenger transport			

1.5.9 Live Working

IEC	IEC/TC 78		Live working	
	64 Standards	10 Projects	National delegates:	0
Scope	To prepare International standards for tools, equipment and devices for utilization in Live Working, including their performance requirements, care and maintenance. Excluded: Work practices and methods for Live Working. To prepare technical publications related to the utilization of tools, equipment and devices on, and in the vicinity of, live parts of electrical installations and systems.			
29	Working Groups under TC			
WG 1	Terminology and symbols			
WG 11	Technical support			
WG 12	Tools and equipment			
WG 13	Protective equipment			
WG 14	Diagnostic equipment			
WG 15	Arc Flash Protection			
PT 78-901	To develop an IEC Technical Report for correlating the results of arc test methods to electrotechnical applications in order to select the proper electric arc protective equipment			
PT 78-902	Guidance for the selection, use and maintenance of electrical arc flash personal protective equipment			
PT 78-903	Guidance for Insulating hand tools for work on or near conductor rail systems operating at voltages up to 1500 V DC			
PT 78-904	Live working in the presence of RF fields			
PT 61472-2	Preliminary Work Item for calculation of the minimum approach distances at medium voltage level			
PT 62819	To develop IEC 62819 Ed.1.0: Live working - Eye, face and head protectors against the effects of electric arc - Test methods and requirements			
PT 63232	Electric arc performance of hand protection equipment - Test standard			
PT 63247	Integration of EN 50321-1 to IEC 63247			
MT 60050-651-60743	Maintenance of IEC 60050-651 and IEC 60743			
MT 60855-1	Maintenance of 60855-1: Live working - Insulating foam-filled tubes and solid rods - Part 1: Tubes and rods of a circular cross-section			
MT 60895	Maintenance of IEC 60895: Live working - Conductive clothing for use at nominal voltage up to 800 kV A.C. and ± 600 kV D.C.			
MT 60903-984	Maintenance of IEC 60903: Live working - Gloves of insulating material and of IEC 60984: Sleeves of insulating material for live working			
MT 61057	Maintenance of 61057: Aerial devices with insulating boom used for live working			
MT 61111-61112	Maintenance of IEC 61111 and IEC 61112			
MT 61243-1	Live working – Voltage detectors – Part 1: Capacitive type to be used for voltages exceeding 1 kV a.c.			
MT 61318	Maintenance of IEC 61318: Live working - Conformity assessment applicable to tools, devices and equipment			
MT 61482-1-1	Maintenance of IEC 61482-1-1: Live working - Protective clothing against the thermal hazards of an electric arc - Part 1-1: Test methods - Method 1: Determination of the arc rating (ATPV or EBT50) of flame resistant materials for clothing			
MT 61482-2	Maintenance of IEC 61482-2: Part 2: Live working - Protective clothing against the thermal hazards of an electric arc - Part 2: Requirements			
MT 62192	Maintenance of IEC 62192: Live working - Insulating ropes			
MT 61328/62263	Maintenance of IEC TR 61328 and IEC TR 62263			
JWG 34	Voltage detecting - indicating systems and phase comparators Managed by SC 17C			
ahG 17	Electrical testing on insulating protective products			
ahG 18	Review the existing scope of IEC/TC 78			

GENELEC	CLC/TC 78 Equipment and tools for live working		
	67 Standards	12 Projects	National delegates: 0
Scope	To prepare CENELEC standards for work equipment, devices and tools, including personal protective equipment used for work on or near live electrical systems or installations.		
9	Working Groups under TC		
WG 05	Revision of EN 50321		
WG 06	Elaboration of Annex ZZ Electrical insulating gloves and sleeves		
WG 07	Revision of EN 50365		
WG 08	Revision of EN 50340		
WG 09	Revision of EN 50528		
WG 10	Revision of EN 50374		
WG 11	Revision of EN 50286		
WG 12	Harmonisation of IEC EN 62819 with PPE regulation		
WG 13	Cleaning for low and medium voltage equipment		

1.5.10 Measuring Equipment for Electrical & Electromagnetic Quantities

IEC	IEC/TC 85 Measuring equipment for electrical and electromagnetic quantities		
	92 Standards	12 Projects	National delegates: 0
Scope	To prepare international standards for equipment, systems, and methods used in the fields of measurement, test, recurrent test, monitoring, evaluation, generation and analysis of steady state and dynamic (including temporary and transients) electrical and electromagnetic quantities, as well as their calibrators. Such equipment includes devices for testing the safety of power distribution systems and connected equipment, devices for monitoring the power distribution systems, electrical measuring transducers, signal generators, recorders together with their accessories. NOTE: Product safety aspects are covered by TC 66.		
11	Working Groups under TC		
WG 8	Equipment for testing, monitoring or measuring the protective measures in energy distribution system		
WG 20	Equipment for measuring and monitoring of steady state and dynamic quantities in Power Distribution Systems		
WG 22	Waveform parameter measurements		
WG 24	Uncertainty Definition and Determination Process		
PT 85-1	Terminology		
MT 23	Revision of IEC 60051 series: Direct acting indicating analogue electrical measuring instruments and their accessories (Parts 1-9)		
MT 25	Maintenance 60477		
MT 27	Panel mounted equipment - Electrical measuring instruments - Dimensions for panel mounting		
JWG 26	Electrical safety in low voltage distribution systems up to 1.000 VAC and 1.500 VDC – Equipment for testing, measuring or monitoring of protective measures – Part 18: DC EV Supply Equipment Monitoring Device linked to TC 69		
JWG 12	Requirements for measurements used to control DER and loads Managed by TC 8		
AG CAG	Chair Advisory Group		

GENELEC	CLC/TC 85X Measuring equipment for electrical and electromagnetic quantities		
	83 Standards	10 Projects	National delegates: 0
Scope	<p>To develop European standards for equipment and systems for measuring, testing, monitoring, generating, and analyzing simple and complex electrical and electromagnetic quantities, as well as their calibrators.</p> <p>These standards apply to measuring equipment for industrial, commercial and building electrical installations (networks) always with the aim to preserve the quality of power supply in order to avoid malfunction and overheating of the connected devices, in particular due to an alteration of the mains voltage.</p> <p>The development of harmonized standards is also intended to meet the challenges of controlling energy consumption and is likely to be used as a support to the Technical Bodies involved in the Smart Grid and Smart Metering activities, or to be used as a support for EC Directives.</p> <p>Equipment in the scope of CLC/TC 85X include power meters and power quality instruments, calibrated measurement devices, signal generators, monitoring equipment, recorders and electrical measuring transducers, and devices for testing, measuring or monitoring of protective measures as given by European installation standards, together with their accessories.</p>		
2	Working Groups under TC		
WG 1	Pre-standardization, standardization and maintenance in the field of measurement applications		
WG 2	Testing and monitoring of protective measures		

1.5.11 Temporary Works Equipment

cen	CEN/TC 53 Temporary works equipment		
	27 Standards	3 Projects	National delegates: 0
Scope	<p>Standardization of temporary works equipment used for maintenance, building, construction work and for temporary structures made of the same equipment. The products and systems are normally intended for repeated use. Standardization of machinery is excluded.</p>		
4	Working Groups under TC		
WG 3	Tubes and fittings		
WG 4	Mobile access towers		
WG 10	Guardrails for temporary works		
WG 16	Basic requirements		

2 NATIONAL PARTICIPATION IN STANDARDIZATION

2.1 Participation Statistics in the Construction Sector

Figure 1 shows the participation of national standardization delegates within the different standardization organization. The total number corresponds to national delegates who have registered for an active participation in a technical committee, a subcommittee and/or a working group. Some of them are registered in multiple standardization organizations, which is why the sum of delegates in each organization does not equal the total number.

Figure 1: Number of national delegates registered in the standardization organizations

As of March 2023, 141 national delegates from 67 national organizations (see Figure 2) are participating in technical standardization.

Figure 2: Number of national organizations involved in technical standardization per standardization organization

Figure 3 further details the number of technical committees (TC), sub-committees (SC) and working groups (WG) in which Luxembourg participates through its national delegates.

Figure 3: Details of the participation of national organizations in standardization organizations in March 2023

In March 2023, for the construction sector:

- Luxembourg has:
 - 141 delegates involved in standardization who are representing 67 national organizations.
- Luxembourg is represented in:
 - 44 technical committees,
 - 41 technical sub-committees,
 - 83 working groups.

2.2 National Delegates in the Construction Sector

2.2.1 List of technical committees with national delegates

This section lists all the technical committees, sub-committees and working groups related to the construction sector in which national delegates are involved.

N°	Technical Committees	Designation
1	CEN/CLC/JTC 14	Energy management and energy efficiency in the framework of energy transition
2	CEN/CLC/JTC 14/WG 5	Energy management and energy efficiency in the framework of energy transition; Guarantees of Origine and Energy Certificates
3	CEN/TC 10	Lifts, escalators and moving walks
4	CEN/TC 104	Concrete and related products
5	CEN/TC 104/SC 1	Concrete and related products; Concrete - Specification, performance, production and conformity; Execution of concrete structures
6	CEN/TC 104/SC 2	Concrete and related products; Execution of concrete structures
7	CEN/TC 104/SC 8	Concrete and related products; Protection and repairs of concrete structures
8	CEN/TC 121/SC 4	Welding and allied processes; Quality management in the field of welding
9	CEN/TC 125/WG 5	Application of external rendering and internal plastering
10	CEN/TC 126	Acoustic properties of building elements and of buildings
11	CEN/TC 128	Roof covering products for discontinuous laying and products for wall cladding
12	CEN/TC 128/SC 7	Roof covering products for discontinuous laying and products for wall cladding; Roofing products from metal sheet
13	CEN/TC 128/SC 9	Roof covering products for discontinuous laying and products for wall cladding; Prefabricated accessories for roofing
14	CEN/TC 128/SC 9/WG 1	Roof covering products for discontinuous laying and products for wall cladding; Prefabricated accessories for roofing; Walkways and safety hooks
15	CEN/TC 135	Execution of steel structures and aluminium structures
16	CEN/TC 135/WG 14	Execution of steel structures and aluminium structures; Execution of aluminium structures and steel structures with cold formed structural sheeting
17	CEN/TC 135/WG 17	Product category rules complementary to EN 15804 for Steel and Aluminium structural products for use in construction works
18	CEN/TC 135/WG 2	Execution of steel structures and aluminium structures; Technical requirements for the execution of steel structures
19	CEN/TC 147	Cranes - Safety
20	CEN/TC 160	Protection against falls from height including working belts
21	CEN/TC 160/WG 1	Protection against falls from height including working belts; General requirements
22	CEN/TC 160/WG 2	Protection against falls from height including working belts; Personal fall arresting systems, components and systems
23	CEN/TC 162	Protective clothing including hand and arm protection and lifejackets
24	CEN/TC 162/WG 3	Protective clothing including hand and arm protection and lifejackets; Protective clothing against chemicals, infective agents and radioactive contamination
25	CEN/TC 165/WG 9	Waste water engineering; Concrete pipes

N°	Technical Committees	Designation
26	CEN/TC 168	Chains, ropes, webbing, slings and accessories - Safety
27	CEN/TC 168/WG 4	Chains, ropes, webbing, slings and accessories - Safety; Hooks and other accessories
28	CEN/TC 189	Geosynthetics
29	CEN/TC 189/WG 1	Geosynthetics; ad hoc group Asphalt reinforcement
30	CEN/TC 189/WG 2	Geosynthetics; Terminology, identification, sampling and classification
31	CEN/TC 189/WG 3	Geosynthetics; Mechanical testing
32	CEN/TC 189/WG 4	Geosynthetics; Hydraulic testing
33	CEN/TC 189/WG 5	Geosynthetics; Durability
34	CEN/TC 191/SC 1	Fixed firefighting systems; Smoke and heat control systems and components
35	CEN/TC 191/SC 1/WG 5	Fixed firefighting systems; Smoke and heat control systems and components; Design and calculation methods for smoke and heat exhaust ventilation systems
36	CEN/TC 191/SC 1/WG 9	Fixed firefighting systems; Smoke and heat control systems and components; Smoke control in covered vehicle parks
37	CEN/TC 191/WG 10	Fixed firefighting systems; Water mist systems
38	CEN/TC 226	Road equipment
39	CEN/TC 227	Road materials
40	CEN/TC 227/WG 1	Road materials; Bituminous mixtures
41	CEN/TC 229	Precast concrete products
42	CEN/TC 231	Mechanical vibration and shock
43	CEN/TC 250/SC 1	Structural Eurocodes; Eurocode 1 - Actions on structures
44	CEN/TC 250/SC 1/WG 2	Structural Eurocodes; Eurocode 1 - Actions on structures; Atmospheric icing of structures
45	CEN/TC 250/SC 1/WG 4	Structural Eurocodes; Eurocode 1 - Actions on structures; Actions on structures exposed to fire
46	CEN/TC 250/SC 2	Structural Eurocodes; Eurocode 2 - Design of concrete structures
47	CEN/TC 250/SC 2/WG 1	Structural Eurocodes; Eurocode 2 - Design of concrete structures; Coordination and Editorial Panel
48	CEN/TC 250/SC 2/WG 1/TG 2	Structural Eurocodes; Eurocode 2 - Design of concrete structures; Coordination and Editorial Panel; TG2
49	CEN/TC 250/SC 3	Structural Eurocodes; Eurocode 3 - Design of steel structures
50	CEN/TC 250/SC 3/WG 1	Structural Eurocodes; Eurocode 3 - Design of steel structures; General rules for buildings
51	CEN/TC 250/SC 3/WG 10	Structural Eurocodes; Eurocode 3 - Design of steel structures; Part 1 - 10:Material toughness
52	CEN/TC 250/SC 3/WG 12	Structural Eurocodes; Eurocode 3 - Design of steel structures; Evolution of EN 1993-1-12 - High strength steels
53	CEN/TC 250/SC 3/WG 18	Structural Eurocodes; Eurocode 3 - Design of steel structures; Evolution of EN 1993-5 - Piling
54	CEN/TC 250/SC 3/WG 2	Structural Eurocodes; Eurocode 3 - Design of steel structures; Fire
55	CEN/TC 250/SC 3/WG 20	Structural Eurocodes; Eurocode 3 - Design of steel structures; Evolution for EN 1993-1-13
56	CEN/TC 250/SC 3/WG 3	Structural Eurocodes; Eurocode 3 - Design of steel structures; Evolution of EN 1993-1-3 - Cold-formed members
57	CEN/TC 250/SC 3/WG 8	Structural Eurocodes; Eurocode 3 - Design of steel structures; Evolution of EN 1993-1-8 - Joints and connections

N°	Technical Committees	Designation
58	CEN/TC 250/SC 3/WG 9	Structural Eurocodes; Eurocode 3 - Design of steel structures; Part 1 - 9:Fatigue
59	CEN/TC 250/SC 4	Structural Eurocodes; Eurocode 4 - Design of composite steel and concrete structures
60	CEN/TC 250/SC 3/WG 22	Structural Eurocodes; EN 1993-1-14 – Design assisted by FEM
61	CEN/TC 250/SC 4/WG 4	Structural Eurocodes; Eurocode 4; Design of composite steel and concrete structures; Evolution of EN 1994-1-1, EN 1994-1-2 and EN 1994-2
62	CEN/TC 250/SC 5	Structural Eurocodes; Eurocode 5 : Design of timber structures
63	CEN/TC 250/SC 5/WG 4	Structural Eurocodes; Eurocode 5 : Design of timber structures; Structural fire design
64	CEN/TC 250/SC 7	Structural Eurocodes; Eurocode 7 - Geotechnical design
65	CEN/TC 250/SC 7/WG 1	General rules and coordination
66	CEN/TC 250/SC 7/WG 2	Structural Eurocodes; Eurocode 7 - Geotechnical design; Ground investigation
67	CEN/TC 250/SC 7/WG 3	Structural Eurocodes; Eurocode 7 - Geotechnical design; Geotechnical constructions
68	CEN/TC 250/SC 8	Structural Eurocodes; Eurocode 8 - Earthquake resistance design of structures
69	CEN/TC 250/SC 8/WG 4	Structural Eurocodes; Eurocode 8 - Earthquake resistance design of structures; Seismic action and site classification
70	CEN/TC 254	Flexible sheets for waterproofing
71	CEN/TC 254/WG 9	Flexible sheets for waterproofing; Underlays for discontinuous roof coverings
72	CEN/TC 256	Railway applications

163	ISO/TC 59/SC 13	Buildings and civil engineering works; Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM)
164	ISO/TC 94/SC 13	Personal safety -- Protective clothing and equipment; Protective clothing
165	ISO/TC 94/SC 13/WG 3	Personal safety -- Protective clothing and equipment; Protective clothing; Protective clothing against chemicals agents
166	ISO/TC 94/SC 13/WG 6	Personal safety -- Protective clothing and equipment; Protective clothing; Protective clothing against hazardous biological agents
167	ISO/TC 94/SC 14	Personal safety -- Protective clothing and equipment; Fire-fighter's personal equipment
168	ISO/TC 94/SC 14/WG 4	Personal safety -- Protective clothing and equipment; Fire-fighter's personal equipment; Hazardous materials incidents (hazmat)

Table 1: List of technical committees in the construction sector with a participation of national delegates – March 2023

2.2.2 List of national delegates in the construction sector

This section lists all the national delegates registered in a technical committee, sub-committee or working group related to the construction sector.

N°	Name	First Name	Company
1	AKBARIEH	Arghavan	Université du Luxembourg
2	ALSWAITTI	Mohammed	Université du Luxembourg
3	ARNOLDY	René	Foyer Assurances S.A.
4	AUBRY	Carole	Luxcontrol S.A.
5	AYED	Anna-Christine	+Impakt Luxembourg S.à.r.l.
6	BACKES	Anne-Laure	DuPont de Nemours Luxembourg S.à r.l.
7	BALL	Jean-Bernard	PASS INGENIERIE & EXPERTISE SARL
8	BARTHELME	Marc	Administration des bâtiments publics
9	BASTIEN	Jean-Claude	OTIS Luxembourg S.à r.l.
10	BELICA	Andrej	Astron Buildings S.A.
11	BENETTO	Enrico	Luxembourg Institute of Science and Technology (LIST)
12	BERTHOME	Jean-Marie	ORGANISATION GESTION ET CONTRÔLE S.A.
13	BINDER	Martin	ST QUADRAT Fall Protection S.A.
14	BLASEN	Georges	Administration des Ponts et Chaussées
15	BLONDEL	Arnaud	Stugalux Construction S.A.
16	BOERI	Pamela	Institut Luxembourgeois de Régulation

N°	Name	First Name	Company
17	BOGDAN	Teodora	ArcelorMittal S.A.
18	BOLLEN	Jan	ArcelorMittal S.A.
19	BORRES	Stéphane	AlliA Insurance Brokers S.A.
20	BRAND	Catherine	CRTI-B GIE
21	BRAUN	Matthias	spannverbund Luxembourg S.A.
22	BRUCH	Erwin	SECOLUX S.A.
23	BUGIEL	Andreas	DuPont de Nemours Luxembourg S.à r.l.
24	BUKNYS	Arunas	FANUC Europe S.A.
25	BUTTEL	Luc	Administration de l'Environnement
26	CAJOT	Louis-Guy	ArcelorMittal Belval & Differdange S.A.
27	CAJOT	Louis-Guy	SECO EXPERT S.A.
28	CALLEJAS	David	FALLPROTEC S.A.
29	CANDEIAS	Miguel	ArcelorMittal Belval & Differdange S.A.
30	CHARLIER	Marion	ArcelorMittal Belval & Differdange S.A.
31	DAVID-CLOS	Elke	DuPont de Nemours Luxembourg S.à r.l.
32	DE CARTIER D'YVES	Patrick	SECOLUX S.A.
33	DE MULLEWIE	Georges	SECOLUX S.A.
34	DERAVET	Marcel	IFSB S.A.
35	DIEDERICH	Romain	DuPont de Nemours Luxembourg S.à r.l.
36	DJEDAI	Mohamed	HITEC Luxembourg S.A.
37	DRETTAS	Christos	ArcelorMittal S.à r.l.
38	DUMBRUCK	Roger	SECOLUX S.A.
39	DUNKER	Wolfgang	SECOLUX S.A.
40	DUYCKAERTS	Olivier	Star Navigator S.àrl.
41	EISCHEN	Christophe	AIB-Vinçotte Luxembourg a.s.b.l.
42	EITNER	Volker	Geopartner S.à r.l.
43	EL ADIB	Kamal	Luxcontrol S.A.
44	FENUCCI	Mathieu	SECO EXPERT S.A.
45	FERNANDES	Gilberto	Administration des Ponts et Chaussées
46	FERRAND	Dominique	ILNAS
47	FERRONE	Andrew	Administration des services techniques de l'agriculture
48	FERY	Bruno	EBRC S.A.
49	FOURNY	David	SOCOTEC Luxembourg S.à r.l.
50	FRANCOIS	Antoine	EBRC S.A.
51	GAMBA	Antonio	ArcelorMittal S.A.
52	GIBON	Thomas	Luxembourg Institute of Science and Technology (LIST)
53	GILL	Chris	Viking S.A.
54	GLORIEUX	Antoine	ArcelorMittal S.A.
55	GRIFFATON	Simon	PREFALUX S.A.
56	GUIPON	Mélanie	Luxembourg Institute of Science and Technology (LIST)

N°	Name	First Name	Company
57	HACKENBERGER	Bernd	SISTO Armaturen S.A.
58	HADDAD	Hedieh	Université du Luxembourg
59	HANUS	François	ArcelorMittal Belval & Differdange S.A.
60	HEINEN	Laurent	Ordre des Architectes et Ingénieurs-Conseils
61	HEINTZ	Robert	EURASOL S.A.
62	HILGERS	Carsten	CFL
63	HIRTZ	Thierry	Administration des bâtiments publics
64	HITAJ	Claudia	Luxembourg Institute of Science & Technology
65	HUET	Stéphane	ORGANISATION GESTION ET CONTRÔLE S.A.
66	IGOS	Elorri	Luxembourg Institute of Science and Technology (LIST)
67	JUNG	Thierry	CFL
68	KATSAVRIAS	Evangelos	Astron Buildings S.A.
69	KIRSCH	Thécla	Ökozentler Pafendall A.s.b.l.
70	KNEIP	André	Foyer Assurances S.A.
71	KOLBER	Carine	Simon-Christiansen & Associés S.A.
72	KOLODKA	Marc	CFL
73	LAMBERT	Gaetan	Lifteurop S.A.
74	LAMBERT	Arnaud	Tractel Secalt S.A.
75	LANG	Eva-Maria	Chambre des Métiers
76	LEQUEUX	Jean-Marie	EQIOM BETONS S.A.
77	LOSANGE	Christophe	CODIPROLUX S.A.
78	MAISONNEUVE	Gaétan	Cabinet d'expertise LNExp
79	MAJERUS	Samuel	Simon-Christiansen & Associés S.A.
80	MANGERS	Jeff	Université du Luxembourg
81	MARAI	Péter	Lindab S.A.
82	MARTINS	João	ArcelorMittal Commercial RPS S.à.r.l.
83	MUELLER	Ralph	CFL
84	MULHALL	Douglas	+Impakt Luxembourg S.à.r.l.
85	NEY	Michel	BETONS FEIDT S.A.
86	NOËL	Xavier	Vinçotte Luxembourg A.s.b.l.
87	NOWAK	Stéphane	DuPont de Nemours Luxembourg S.à r.l.
88	OBIALA	Renata	ArcelorMittal S.A.
89	ODENBREIT	Christoph	Université du Luxembourg
90	OLY	René	Astron Buildings S.A.
91	PASCUAL	Mickaël	Neobuild S.A.
92	PETIT	Marc	Administration des bâtiments publics
93	PETRY	Jérôme	Ministère de l'Economie
94	PETUCCO	Claudio	Luxembourg Institute of Science and Technology (LIST)
95	POCHET	Albin	Goodyear S.A.
96	POLETTI	Benoît	INCERT GIE

N°	Name	First Name	Company
97	PONCIN	Marc	Luxcontrol S.A.
98	PREIS	Alain	SECOLUX S.A.
99	PRÜM	Cécile	ArcelorMittal Belval & Differdange S.A.
100	RADEMACHER	Dennis	ArcelorMittal Commercial Sections S.A.
101	RAINGEVAL	Pascal	SECO Expert S.A.
102	RECH	Christian	CIMALUX S.A.
103	RECKINGER	Georges	Schroeder & Associés S.A.
104	RENAULD	Sébastien	EBRC S.A.
105	RENAULT	Thibaut	Energie & Environnement
106	RICHARD	Sébastien	EBRC S.A.
107	ROCK	Annick	Ministère du Logement
108	RUGANI	Benedetto	Luxembourg Institute of Science and Technology (LIST)
109	RÜTZE	Roger	Enovos Luxembourg S.A.
110	SAIED	Mahmoud	ArcelorMittal Belval & Differdange S.A.
111	SAYYAREH	Shahin	Université du Luxembourg
112	SCHANTZEN	Steve	Administration des bâtiments publics
113	SCHAUBROECK	Thomas	Luxembourg Institute of Science and Technology (LIST)
114	SCHINTGEN	Guy	
115	SCHLEICH	Jean-Baptiste	
116	SCHUMACHER	Kim	Ministère de l'Environnement, du Climat et du Développement durable
117	SCHWALL	François	Neobuild S.A.
118	SIMON	Claude	CIMALUX S.A.
119	STATUCKI	David	Schroeder & Associés
120	STEICHEN	Claude	Administration des Ponts et Chaussées
121	SYRETT	Alison	Sigma 4 Constructions S.A.
122	TENEUL	Jean-François	DuPont de Nemours Luxembourg S.à r.l.
123	THILLEN	Ines	MFPRA - Service national de la sécurité dans la fonction publique
124	THYES	Léon	IN-SITU S.A.
125	TIBOLT	Mike	ArcelorMittal Belval & Differdange S.A.
126	TOMASINI	Folco	FOLCO TOMASINI S.à r.l.
127	TRESSER	Markus	Luxembourg Institute for Building and Technology S.A.
128	URIOS	Thomas	ArcelorMittal Belval & Differdange S.A.
129	VERHAMME	Geoffroy	SECOLUX S.A.
130	VIOLA	Moreno	CRTI-B GIE
131	WALDMANN-DIEDERICH	Danièle	Université du Luxembourg
132	WAUTELET	Thibaut	+Impakt Luxembourg S.à r.l.
133	WEBER	Ernst	ArcelorMittal Commercial RPS S.à r.l.
134	WEYDERT	Romain	RW CONSULT S.à r.l.
135	WOLF	Sébastien	ArcelorMittal Bissen & Bettembourg S.A.
136	WOLTER	Thomas	Chaux de Contern S.A.

N°	Name	First Name	Company
137	YANG	Jie	Université du Luxembourg
138	ZANON	Riccardo	ArcelorMittal S.A.
139	ZDJELAR	Eric	ORGANISATION GESTION ET CONTRÔLE S.A.
140	ZIGNALE	Daniel	BIM Consult S.à.r.l.
141	ZINCK	Sébastien	Luxembourg Institute of Science and Technology (LIST)

Table 2: List of national delegates in the construction sector – March 2023

CONCLUSIONS

Construction is one of the high potential growth sectors identified in the “National standardization strategy 2020-2030”. ILNAS actively supports national stakeholders willing to be involved in technical standardization for this specific sector, in line with the [Luxembourg's policy for the technical standardization of the construction sector 2020-2025](#). The main objective of this policy is to foster and strengthen the involvement of national players in standardization work, as well as the use of standards through three flagship projects:

- Promote the technical standardization of the construction sector;
- Strengthen the promotion of technical standardization in the construction sector and the involvement of the market in this process;
- Support and strengthen standardization education and related research activities.

The standards analysis for the construction sector is the basis for carrying out this policy. ILNAS actively supports national stakeholders willing to be involved in technical standardization and provides the tools to inform and to help the national market.

Any interested stakeholder can consult the full content of published standards free-of-charge (in read-only mode) on [ILNAS reading stations](#) or buy them on the [ILNAS e-shop](#). In addition, ILNAS offers the possibility to each national economic actor to contribute to the development of national, European and international standards by registering as a national delegate through ILNAS (free of charge). Free [video trainings](#) are also available on the ILNAS YouTube channel in order to get acquainted with technical standardization and related services offered at national level.

The construction sector is already one of the most active in terms of national standardization development, with several national standards already published. ILNAS welcomes any new proposal for national standards in order to support the construction sector and its stakeholders.

The fourth industrial revolution requires the construction sector to evolve with new technologies and to use modern tools that will increase productivity in a sustainable way. Building Information Modelling (BIM) is one of the revolutionary technologies in construction that will play a major role in the digitalization of buildings. In this context, ILNAS already offers a "[BIM and technical standardization](#)" training course to inform national stakeholders about the standardization of this technology and show how to get involved.

ILNAS, with the support of ANEC EIG, is at your disposal to support you in technical standardization:

MAKE STANDARDS YOURS!
