

Afterwork ILNAS Delegates

Tuesday, 26th March 2024

Introductory remarks

Jean-Philippe Humbert
Deputy Director

OLN – Latest developments

Jérôme Hoerold
Head of standardisation department

Technical standardization "Inclusive tool for performance and excellence to serve the economy"

3 growth sectors identified

CONSTRUCTION

INFORMATION AND
COMMUNICATION
TECHNOLOGIES

AEROSPACE

Identification of trans-
sectoral standardization
interactions

- Computer Aided Design (CAD)
- Building Information Modelling (BIM)
- 3D printing
- ...

- Space data processing
- Space traffic management
- Smart Mobility
- ...

CONFORMITY

SUSTAINABILITY

B. Reinforcement of the OLN team

**Dr. Lucas CICERO**

- Joined ILNAS in December 2022
- Key responsibilities:
 - Sector manager “Aerospace & Standardisation” and “ISO/CASCO”
 - Coordinator of the new domain “Sustainability & Standardisation”

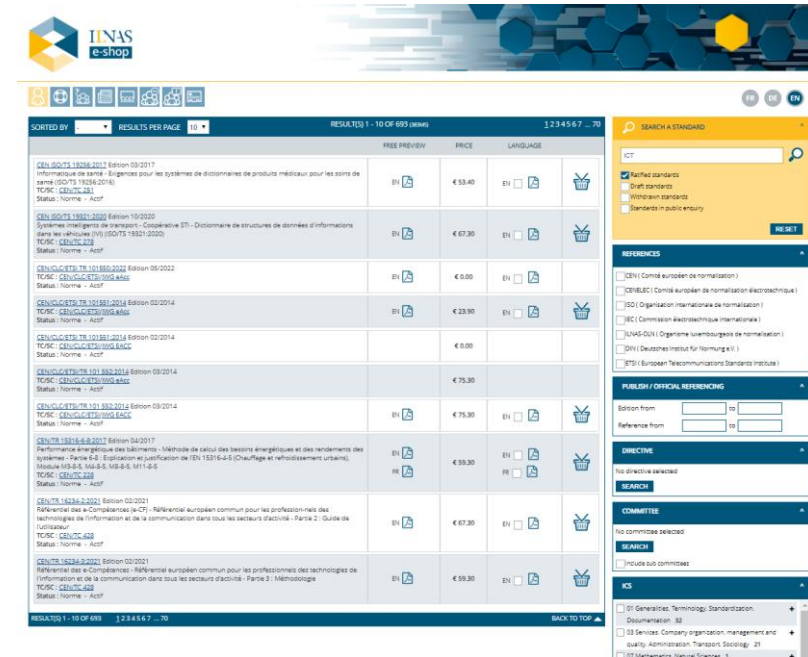

**Ms Victoria MLETZAK**

- Joined ILNAS in September 2023
- Key responsibilities:
 - Sector manager “Construction & Standardisation”
 - Project manager “Gender Responsive Standards”

From September 2023, ILNAS/OLN has an in-house sector manager for each growth sector identified in the national standardization strategy.

Dynamic search function

- Live: Introduced in February 2024
- Objective: A powerful tool which allows to fine-tune search results step by step
- Search criteria's:
 - Status of the standard
 - Publisher
 - Edition / Reference date
 - Linked European Directive
 - Technical Committee
 - ICS Code

Notification system

- Currently under development: will go live shortly
- Objective: Stay informed about updates related to standards which are of a particular interest to you
- Select the standards you want to monitor and define the criteria's on which the notifications (e-mails) are based on
- Modify your notifications in your personal user account on the ILNAS e-shop

ILNAS “Standardisation & Innovation Award”

- Objective: Identify and promote best practices related to the usage of standards in innovative projects
- In 2022, the award has been won by ArcelorMittal for their project “*High strength steels for the design of steel structures*”

**Creation of National Standardisation Commissions (NSC)**

- Objective: Regroup international technical committees which are working on a specific topic in one NSC
- NSCs currently existing:
 - ILNAS/NSC 01 – Cybersecurity
 - ILNAS/NSC 02 – Conformity
 - ILNAS/NSC 03 – Quantum Computing
- NSCs currently being developed:
 - NSC on Artificial Intelligence
 - NSC related to the Construction sector
 - NSC related to the Aerospace sector
 - More to follow...

CEN/CLC JTC 22 “Quantum technologies”
ISO/IEC JTC 3 “Quantum technologies”
ISO/IEC JTC 1/WG 14 “Quantum Information Technology”

ICT sector

Nicolas Domenjoud
Responsable « ICT & Technical Standardization »

2024

- 87 national delegates in standardization representing 49 national organizations
- 199 technical committees/working groups with national delegates (INT + EU)
- 13 ETSI national members

Creation of **National Standardization Commissions**

- ✓ NSC 01 “Cybersecurity” in 2021
- ✓ NSC 03 “Quantum Technologies” in 2024
- ✓ NSC 0X “Artificial Intelligence” (planned in 2024)

Involvement of the NSB in **International ICT Standardization**

- ✓ Presidency of the NMC ISO/IEC JTC 1
- ✓ National HoD in ETSI General Assemblies
- ✓ LU representative in the MSP on ICT standardisation
- ✓ Sherpa Digital in the High Level Forum on EU standardisation

National Committee ILNAS/TC 108

Telecommunications – Vertical cabling techniques in residential and mixed-use buildings

Technical report on Quantum Technologies

- An overview of Quantum Technologies and related standardization developments
- Basis for the creation of the NSC 03

Standards analysis ICT

- Overview of national, European and international technical committees that develop and publish standards for the ICT sector, updated annually

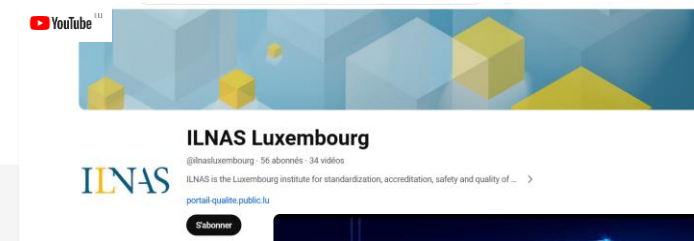

Technical sheets

- Blockchain and distributed ledgers
- Cloud Computing
- Digital Twin
- ICT for education and learning
- Quantum technology
- Secure Internet of Things
- Security and privacy in Cloud Computing
- Trustworthy Artificial Intelligence
- Health Informatics

Videos on ICT Technical standardization

- Videos published regularly on ICT technical standardization
 - ✓ Container Technology
 - ✓ Intelligent Transport Systems (to be published soon)

Trainings

- ✓ **05/06/2024** – Awareness session - Standardization in the ICT sector
- ✓ **07/05/2024** – Training - Standards for Interoperability and Portability in Cloud Computing
- ✓ **27/06/2024** – Training - AI Standards watch: standards relevant to the proposed AI Act
- ✓ **26/09/2024** – Training - Quantum technologies and technical standardization
- ✓ **05/12/2024** – Training - Workshop: Artificial intelligence and technical standardization

Events

- ✓ **25/04/2024** – Breakfast ILNAS/ETSI (including the presentation of the new version of the ANS TIC)
- ✓ **End of April 2024** – Meeting of the NSC 03 “Quantum Technologies” (open to the public) to prepare the kick-off meeting of ISO/IEC JTC 3

Construction sector

Victoria Mletzak
Responsable « Construction & Standardisation »

Technical report on sustainable construction

- An overview of the normative situation in the construction sector in the context of sustainable development,
- Published in November 2023,
- Available in English and French.

Standards analysis construction

- Overview of national, European and international technical committees that develop and publish standards for the construction sector,
- Updated annually: last update in March 2024,
- Available in English and French.

Technical sheets

- Acoustics,
- BIM,
- Circular Economy,
- Eurocodes,
- Timber Structures,
- Sustainable Construction,
- Smart Cities,
- Welding.

Smart Cities

- **ISO/IEC JTC 1/WG 11** : Smart Cities
- **ISO/TC 268** : Sustainable Cities and Communities
- **ISO/TC 268/SC 1** : Smart Community Infrastructures
- **ISO/TC 268/SC 2** : Sustainable Cities and Communities - Sustainable Mobility and Transportation
- **ITU-T/SG 5** : Environment, EMF & circular economy
- **ITU-T/SG 20** : IoT, smart cities & communities
- **CEN/TC 465** : Sustainable Cities and Communities
- **ETSI/ISG CIM** : Cross cutting Context Information Management

Construction & Renovation

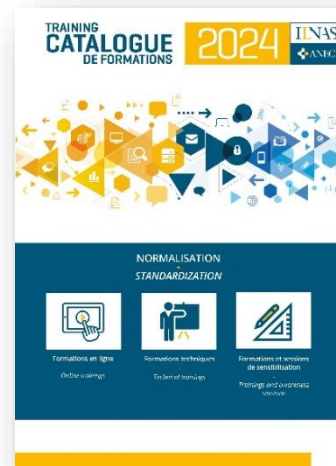

- **ISO/TC 59/SC 17** : Buildings and civil engineering works - Sustainability
- **ISO/TC 163** : Thermal performance and energy use in the built environment
- **ISO/TC 205** : Building environment design (WG 2, WG3)
- **ISO/TC 71/SC 8** : Environmental management for concrete and concrete structures
- **CEN/TC 88** : Thermal insulating materials and products
- **CEN/TC 89** : Thermal performance of buildings and building components
- **CEN/TC 156/WG 21** : Energy performance calculation of ventilation and cooling system
- **CLC/TC 205** : Home and Building Electronic Systems (HBES)
- **CEN/TC 350** : Sustainability of construction works
- **CEN/TC 371** : Energy performance of buildings
- **CEN/TC 104/WG 19** : Concrete and related products - Decarbonisation, resource efficiency and sustainability

Standardization deliverables

- National standard on the acoustic performance criteria for residential buildings (2022)
- National annexes on concrete in construction (2023)
- National annex to EN 16907-2 for defining soil/rock classes for excavation (in progress)
- National annex to EN 1916 on pipes and fittings in unreinforced concrete, steel fiber-reinforced concrete and reinforced concrete (in progress)
- Revision of the national annexes to EN Eurocodes (planned for 2025)

16 April 2024
Technical training

BIM and technical standardization

05 November 2024
Awareness session

Sustainable construction and technical standardization

19 December 2024
Awareness session

Introduction to technical standardization in the construction sector

New collaboration

- In order to guarantee continuous improvement of its products and services, and to strengthen Luxembourg's position in the European and international standards context, ILNAS is planning to initiate a collaboration project with Austrian Standards International.
- A comparative analysis and an action plan are currently being finalized. These documents will highlight the strategies and opportunities for a collaboration planned in relation to the construction sector.

2022-2023: +108% license sales

2024: National network composed of 9 reading stations

152 national delegates in construction

Relaunch of the project “education about standardization” at secondary and higher education levels

- Awareness campaigns on the subject;
- Support and promote education, innovation and research projects in the field;
- Promote the development and use of standards;
- Provide training opportunities for students and recent graduates, such as internships;
- Support students in their standards research.

Gender Representation

- The **Working Party on Regulatory Cooperation and Standardization Policies** (WP.6 UNECE):
“encourages regulatory coherence in specific sectors that have a critical impact on sustainable development (...)”.
- As a signatory to the declaration on "**Gender-Responsive Standards and Standards Development**" and member of the WP.6, ILNAS is committed to implementing the measures needed to guarantee balanced gender representation:
 - When developing standards,
 - In the content of standards, and
 - In technical committees.
- A **Gender Action Plan** is currently being drawn up, and ILNAS is open to collaborations to raise awareness on the subject.

Aerospace sector

Lucas Cicero
Project manager

Standards analysis

Global overview of the European and international technical committees which develop and publish standards in the space sector. Annual update.

Organization of the Workshop « Technical Standardization in Space and Cybersecurity »

27th June 2023

Dedicated event to standardization supporting the cybersecurity challenges in the space context.

Participation to Workshop « Secure Communication via Satellite »

25th October 2023

Contribution to a round-table which focused on the impact of standards on secured satellite communications.

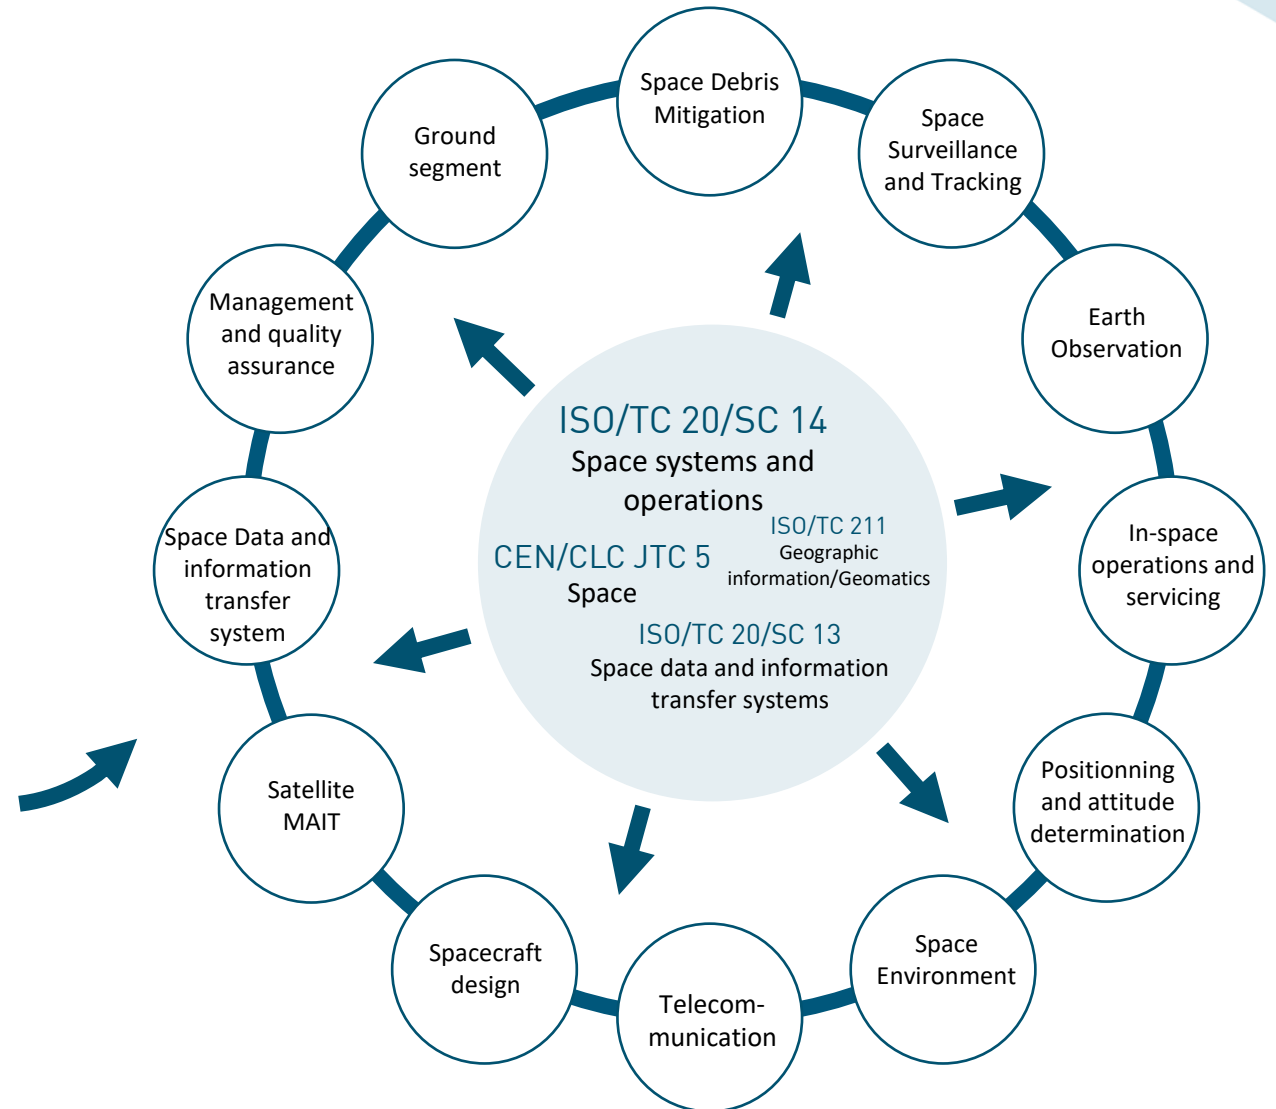

Luxembourg participation to space standardization

- **10 national participations** to international technical committees related to space domain.
- Plenary sessions of the main technical committees are followed by ILNAS.

Set-up of National Standardization Committees « Space »

European and international technical committees covered a broad areas of topics

- Delegates' expertise can not cover all the different domains addressed by the technical committees
- **Set-up of national standardization commissions with narrower topics**

Change in development paradigm

The increase of satellites in orbit caused by *New Space* approach engendered a need of coordination.

New objectives

- Mars and Moon exploration
- Exploration and utilization of space resources
- Inhabitation of Moon

A new legal framework

With the future publication of the European Space Law, legal requirements will have to be fulfilled

Standardization

20th November 2024
Informative session

Introduction to standardization in space domain

Conformity assessment sector

A. National context

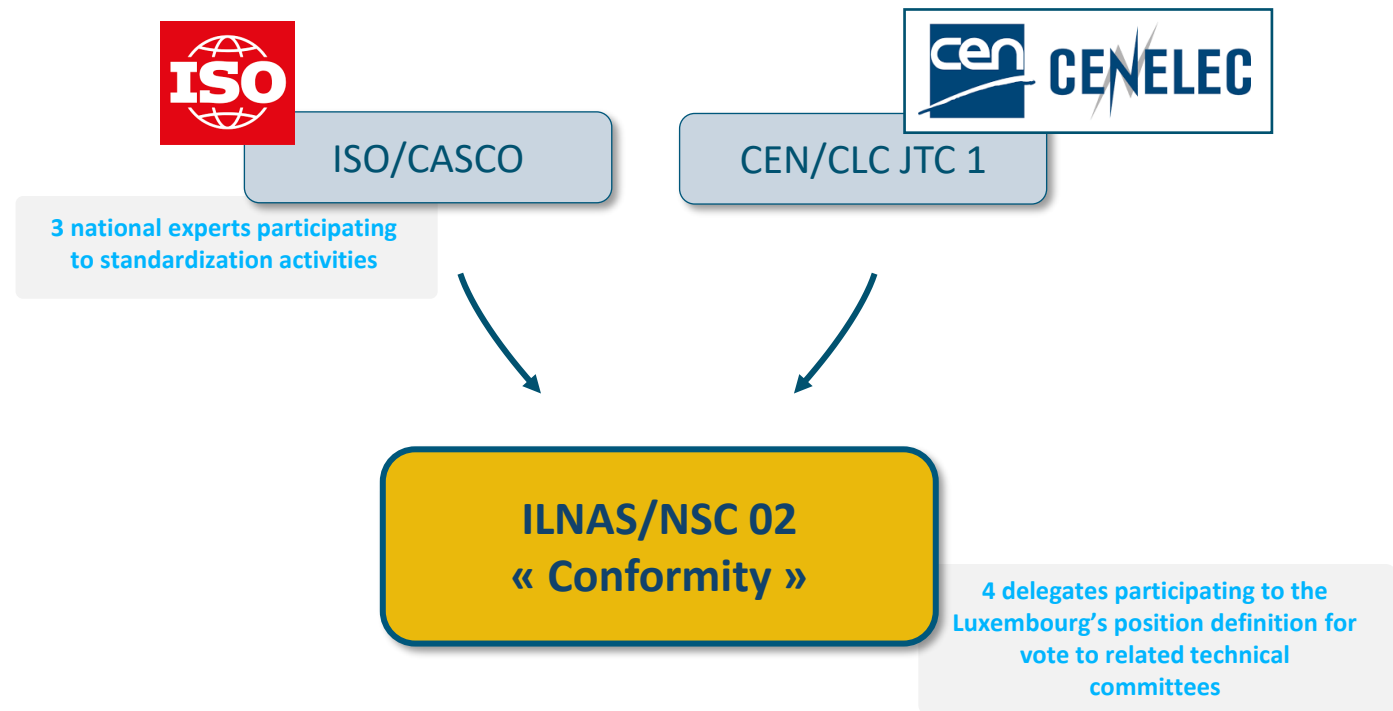

National standardization policy « CASCO » 2022-2030

The policy defines the different objectives related to the standardization activities of conformity assessment standardization

National Standardization Commission ILNAS/NSC 02 « Conformity »

Creation of a *forum* to discuss standardization activities and to take national consensual decision for European and international ballots

Informative session following beginning of revision activities of ISO/IEC 17020
25th January 2023

2 registered experts

Consultative session for the systematic review of ISO/IEC 17025:2017 standard
15th February 2023

Standard confirmed

Consultative session for the systematic review of ISO/IEC 17011:2017 standard
2nd March 2023

Standard confirmed

Organization of a breakfast - introduction to conformity assessment

25th May 2023

Presentation of the different activities/actors contributing to the chain of trustworthiness related to conformity assessment

1 delegate registered

Future domains of conformity assessment activities

conformity (EN)

Sustainability sector

Environmental concerns

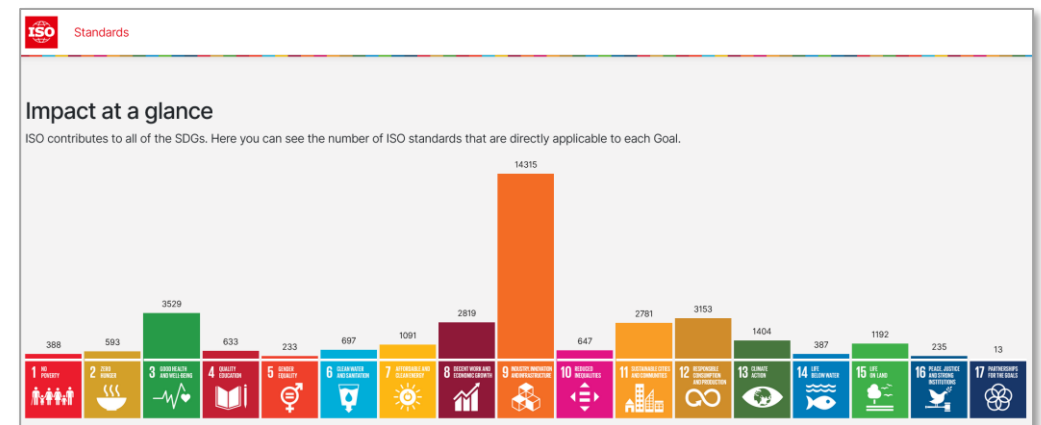

Sustainable development has become a crucial issue for the entire international community in order to meet the challenges of climate change and environmental degradation

Usage of standards

“The standards provide a solid base on which innovation can thrive and are essential tools to help governments, industry and consumers contribute to the achievement of every one of the SDGs” (ISO)

CEN and CENELEC Journey towards the UN Sustainable Development Goals (SDGs)

Development of a new domain

Following a preliminary analysis, activities related to sustainability have been initiated by ILNAS in October 2023, in collaboration of EIG ANEC (standardization department).

Active follow-up of technical committees

The technical committees related to the sub-domains identified by ILNAS and the ministry of the Economy are monitored in order to define and propose relevant services in-line with the national strategies and market needs.
